- Key drivers/advantages of LGPS pooling:
 - economies of scale
 - cost savings

4. Brexit – What Now ?

- Article 50 TEU requires two years' notice of withdrawal:
 - Terms of leaving would be renegotiated during that period with possible extension
 - UK would still be expected to remain in line with EU laws
 - EU directives and regulations would cease to apply at the end of that period
- What would replace EU membership? A number of possible structural options

4. Brexit – Potential Options

4. Brexit – Short Term Impact on Investments

4. Brexit – What can be considered now?

- Pension Schemes
 - Sponsor strength/covenant
 - Exposure of sponsors to market volatility
 - Risk Management Process
- Potential impact on contracts

 - Representations and Warranties
 - Break clauses

- Investment restrictions in IMAs – geographic, UCITS etc

4. Brexit – What can be considered now? cont.

- Investment Managers will be affected by significant changes in the legislative framework (eg UCITS, AIFMD, MIFID, CRD IV etc)
- Pension Schemes may be impacted by structural changes to others' business models

4. Brexit – Looking Ahead: Law and Regulation

- EU law constitutes one-sixth of UK statute book
 - This does not include “regulations” – which have a direct effect on member states
- UK may choose to implement/retain EU legislation in any event, but will have no influence over new laws
- Much of UK pensions law has origins in EU legislation but has been enacted domestically – will there be deviations going forward?
- What about EU legislation in the pipeline?
- Status Quo for now

Any 
questions?
