Note: all references to the *IFRS for SMEs* Accounting Standard in the Authoritative Guidance are to the draft Third edition of the *IFRS for SMEs* Accounting Standard exposed in September 2022 unless otherwise stated.

The International Non-Profit Accounting Guidance (INPAG) is set out in the Preface and Sections 1–38. INPAG includes a glossary in Annex A. Terms defined in the glossary are in bold type the first time that they appear in each section unless defined within the section. INPAG is accompanied by a Basis for Conclusions and Implementation Guidance, which includes illustrative examples.

The Preface, Sections 1–10 and Section 35 were published as drafts in Exposure Draft 1. This document provides links to the previously published sections and also shows the Sections to be published in Exposure Draft 3 [ED3], due in 2024.

---

1 Status refers to whether the *IFRS for SMEs* Standard has been updated to reflect NPO-specific requirements. Further explanation can be found in the Invitation to comment.

The Preface and Sections 1–10 were included in Exposure Draft 1, which closed for comment on 31 March 2023.

Feedback received on Exposure Draft 1 will be incorporated into the final version of INPAG.
Section 11 – Financial Instruments

Scope of this section

G11.1 Section 11 Financial instruments deals with recognising, derecognising, measuring and disclosing financial instruments (financial assets and financial liabilities). Part I of Section 11 applies to basic financial instruments and is relevant to all NPOs. Part II of Section 11 applies to other, more complex financial instruments and transactions. If an entity enters into only basic financial instrument transactions, then Part II of Section 11 is not applicable. However, even NPOs with only basic financial instruments shall consider the scope of Part II of Section 11 to ensure they are exempt.

Part I – Basic financial instruments

Introduction to Part I of Section 11

G11.2 A financial instrument is a contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

G11.3 Part I of Section 11 requires an amortised cost model for all basic financial instruments, except for issued financial guarantee contracts, and investments in non-convertible preference shares and non-puttable ordinary or preference shares that are publicly traded or whose fair value can otherwise be measured reliably without undue cost or effort.

G11.4 Basic financial instruments within the scope of Part I of Section 11 are those that satisfy the conditions in paragraph G11.7. Examples of financial instruments that normally satisfy those conditions include:

(a) cash;
(b) demand and fixed-term deposits when the entity is the depositor – for example, bank accounts;
(c) commercial paper and commercial bills held;
(d) accounts, notes and loans receivable and payable;
(e) bonds and similar debt instruments;
(f) investments in non-convertible preference shares and non-puttable ordinary and preference shares;
(g) commitments to receive a loan if the commitment cannot be net settled in cash; and
(h) issued financial guarantee contracts.

G11.5 Examples of financial instruments that do not normally satisfy the conditions in paragraph G11.7, and are therefore within the scope of Part II of Section 11, include:

(a) asset-backed securities, such as collateralised mortgage obligations, repurchase agreements and securitised packages of receivables;
(b) options, rights, warrants, futures contracts, forward contracts and interest rate swaps that can be settled in cash or by exchanging another financial instrument;
(c) financial instruments that qualify and are designated as hedging instruments in accordance with the requirements in Part II of Section 11;
(d) commitments to make a loan to another entity; and
(e) commitments to receive a loan if the commitment can be net settled in cash.
Scope of Part I of Section 11

G11.6 Part I of Section 11 applies to all financial instruments meeting the conditions of paragraph G11.7 except for the following:

(a) investments in controlled entities and associates and joint arrangements that are accounted for in accordance with Section 9 Consolidated and separate financial statements, Section 14 Investments in associates or Section 15 Joint arrangements.

(b) financial instruments that meet the definition of an NPO’s own equity, including the equity component of compound financial instruments issued by the NPO (see Section 22 Liabilities and equity).

(c) leases to which Section 20 Leases or paragraph G11.60(f) apply. However, the derecognition requirements in paragraphs G11.43–G11.48 apply to the derecognition of lease receivables recognised by a lessor and lease payables recognised by a lessee, and the impairment requirements in paragraphs G11.31–G11.42 apply to lease receivables recognised by a lessor.

(d) employers’ rights and obligations under employee benefit plans, to which Section 28 Employee benefits applies.

(e) reimbursement assets that are accounted for in accordance with Section 21 Provisions and contingencies (see paragraph G21.10).

(f) rights and obligations within the scope of Section 23 Revenue that are financial instruments, except for receivables and those that Section 23 specifies are accounted for in accordance with this section.

Basic financial instruments

G11.7 An entity shall account for the following financial instruments as basic financial instruments in accordance with Part I of Section 11:

(a) cash;

(b) a debt instrument (such as an account, note or loan receivable or payable) that meets the conditions in paragraph G11.8 and/or paragraph G11.9;

(c) a commitment to receive a loan that:
   (i) cannot be settled net in cash; and
   (ii) when the commitment is executed, is expected to meet the conditions in paragraph G11.8.

(d) an investment in non-convertible preference shares and non-puttable ordinary shares; and

(e) issued financial guarantee contracts.

G11.8 A debt instrument that satisfies all of the conditions in (a)–(d) shall be accounted for in accordance with Part I of Section 11:

(a) returns to the holder (the lender/creditor) assessed in the currency in which the debt instrument is denominated are either:
   (i) a fixed amount;
   (ii) a fixed rate of return over the life of the instrument;
   (iii) a variable return that, throughout the life of the instrument, is equal to a single referenced quoted or observable interest rate (such as SONIA); or
   (iv) some combination of such fixed and variable rates, provided that both the fixed and variable rates are positive (for example, an interest rate swap with a positive fixed rate and negative variable rate would not meet this criterion).

For fixed and variable rate interest returns, interest is calculated by multiplying the rate for the applicable period by the principal amount outstanding during the period.
(b) there is no contractual provision that could, by its terms, result in the holder (the lender/creditor) losing the principal amount or any interest attributable to the current period or prior periods. The fact that a debt instrument is subordinated to other debt instruments is not an example of such a contractual provision. A party may pay or receive reasonable compensation on early termination of a contract and still meet this condition.

(c) contractual provisions that permit or require the issuer (the borrower) to prepay a debt instrument or permit or require the holder (the lender/creditor) to put it back to the issuer (ie to demand repayment) before maturity are not contingent on future events other than to protect:

(i) the holder against a change in the credit risk of the issuer or the instrument (for example, defaults, credit downgrades or loan covenant violations) or a change in control of the issuer; or

(ii) the holder or issuer against changes in relevant taxation or law.

(d) there are no conditional returns or repayment provisions except for the variable rate return described in (a) and prepayment provisions described in (c).

G11.9 A debt instrument that does not meet all of the conditions in paragraph G11.8(a)–(d) shall nevertheless be accounted for in accordance with Part I of Section 11 if the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. A debt instrument with contractual terms that introduce exposure to unrelated risks or volatility – for example, changes in equity prices or commodity prices – is unlikely to meet this requirement. For this assessment, ‘interest’ includes reasonable compensation for the time value of money, credit risk, and other basic lending risks and costs – for example, liquidity risk, administrative costs associated with holding the instrument and lender's profit margin – consistent with a basic lending arrangement.

G11.10 Examples of debt instruments that would normally satisfy the conditions in paragraph G11.8(a)(iv) include:

(a) a bank loan that has a fixed interest rate for an initial period that then reverts to a quoted or observable variable interest rate after that period; and

(b) a bank loan with interest payable at a quoted or observable variable interest rate plus a fixed rate throughout the life of the loan – for example, SONIA plus 200 basis points.

G11.11 An example of a debt instrument that would normally satisfy the conditions set out in paragraph G11.8(b)–(c) would be a bank loan that permits the borrower to terminate the arrangement early, even though the borrower may be required to pay a penalty to compensate the bank for its costs of the borrower terminating the arrangement early.

G11.12 Other examples of financial instruments that would normally satisfy the conditions in paragraph G11.8 are:

(a) trade accounts and notes receivable and payable, and loans from banks or other third parties.

(b) accounts payable in a foreign currency. However, any change in the account payable because of a change in the exchange rate is recognised in surplus or deficit as required by paragraph G30.11.

(c) loans to or from controlled entities or associates that are due on demand.

(d) a debt instrument that would become immediately receivable if the issuer defaults on an interest or principal payment (such a provision does not violate the conditions in paragraph G11.8).

G11.13 Examples of financial instruments that do not satisfy the conditions in paragraph G11.8 or G11.9 (and are therefore within the scope of Part II of Section 11) include:

(a) an investment in another entity’s equity instruments other than nonconvertible preference shares and non-puttable ordinary and preference shares (see paragraph G11.7(d));
(b) an interest rate swap that returns a cash flow that is positive or negative, or a forward commitment to purchase a commodity or financial instrument that is capable of being cash-settled and that, on settlement, could have positive or negative cash flow, because such swaps and forwards do not meet the condition in paragraph G11.8(a);

(c) options and forward contracts, because returns to the holder are not fixed and the condition in paragraph G11.8(a) is not met; and

(d) investments in convertible debt, because the return to the holder can vary with the price of the issuer’s equity shares instead of just with market interest rates.

G11.14 Reassessment of a financial instrument classified at initial recognition in accordance with paragraphs G11.7–G11.9 shall occur only if contractual terms are modified in a way that leads to the derecognition of the financial instrument.

Initial recognition of financial assets and liabilities

G11.15 An NPO shall recognise a financial asset or a financial liability only when the NPO becomes a party to the contractual provisions of the instrument.

Initial measurement

G11.16 When a financial asset or financial liability is recognised initially, an NPO shall measure it at the transaction price (including transaction costs except in the initial measurement of financial assets and liabilities that are subsequently measured at fair value through surplus or deficit) unless the arrangement constitutes, in effect, a financing transaction for either the NPO (for a financial liability) or the counterparty (for a financial asset) to the arrangement. An arrangement constitutes a financing transaction if payment is deferred beyond normal business terms – for example, providing interest-free credit to a buyer for the sale of goods – or is financed at a rate of interest that is not a market rate, for example, an interest-free or below market interest rate loan made to an employee. If the arrangement constitutes a financing transaction, the NPO shall measure the financial asset or financial liability at the present value of the future payments discounted at a market rate of interest for a similar debt instrument as determined at initial recognition.

Subsequent measurement

G11.17 At the end of each reporting period, an NPO shall measure financial instruments as follows, without any deduction for transaction costs the NPO may incur on sale or other disposal:

(a) debt instruments that meet the conditions in paragraph G11.7(b) shall be measured at amortised cost using the effective interest method. Paragraphs G11.19–G11.24 provide guidance on determining amortised cost using the effective interest method. Debt instruments that are classified as current assets or current liabilities shall be measured at the undiscounted amount of the cash or other consideration expected to be paid or received (ie net of impairment – see paragraphs G11.25–G11.42) unless the arrangement constitutes, in effect, a financing transaction (see paragraph G11.16).

(b) commitments to receive a loan that meet the conditions in paragraph G11.7(c) shall be measured at cost (which sometimes is nil) less impairment.

(c) investments in non-convertible preference shares and non-puttable ordinary or preference shares shall be measured as follows (Section 12 provides guidance on fair value):

(i) if the shares are publicly traded or their fair value can otherwise be measured reliably without undue cost or effort, the investment shall be measured at fair value with changes in fair value recognised in surplus or deficit; and

(ii) all other such investments shall be measured at cost less impairment.
(d) issued financial guarantee contracts are measured at the higher of:

(i) the expected credit losses measured in accordance with paragraphs G11.32–G11.42; and
(ii) the amount initially recognised, if any, amortised on a straight-line basis over the life of the guarantee.

Impairment or uncollectability must be assessed for financial assets in (a), (b) and (c)(ii). Paragraphs G11.25–G11.42 provide guidance.

G11.18 Dividends are recognised in surplus or deficit only when:

(a) the NPO's right to receive payment is established;
(b) it is probable that the economic benefits associated with the dividend will flow to the NPO; and
(c) the amount of the dividend can be measured reliably.

Amortised cost and effective interest method

G11.19 The amortised cost of a financial asset or financial liability at each reporting date is the net of the following amounts:

(a) the amount at which the financial asset or financial liability is measured at initial recognition;
(b) minus any repayments of the principal;
(c) plus or minus the cumulative amortisation using the effective interest method of any difference between the amount at initial recognition and the maturity amount;
(d) minus, in the case of a financial asset, any reduction (directly or through the use of an allowance account) for impairment or uncollectability.

Financial assets and financial liabilities that have no stated interest rate, that do not relate to an arrangement that constitutes a financing transaction and that are classified as current assets or current liabilities are initially measured at an undiscounted amount in accordance with paragraph G11.16. Consequently, (c) does not apply to them.

G11.20 The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or a group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the carrying amount of the financial asset or financial liability. The effective interest rate is determined on the basis of the carrying amount of the financial asset or liability at initial recognition. Under the effective interest method:

(a) the amortised cost of a financial asset (liability) is the present value of future cash receipts (payments) discounted at the effective interest rate; and
(b) the interest expense (income) in a period equals the carrying amount of the financial liability (asset) at the beginning of a period multiplied by the effective interest rate for the period.

G11.21 When calculating the effective interest rate, an NPO shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) and known credit losses that have been incurred, but it shall not consider expected credit losses.

G11.22 When calculating the effective interest rate, an NPO shall amortise any related fees, finance charges paid or received (such as ‘points’), transaction costs and other premiums or discounts over the expected life of the instrument, except as follows. The NPO shall use a shorter period if that is the period to which the fees, finance charges paid or received, transaction costs, premiums or discounts relate. This will be the case when the variable to which the fees, finance charges paid or received, transaction costs, premiums or discounts relate is repriced to market rates before the expected maturity of the instrument. In such a case, the appropriate amortisation period is the period to the next such repricing date.
For variable rate financial assets and variable rate financial liabilities, periodic re-estimation of cash flows to reflect changes in market rates of interest alters the effective interest rate. If a variable rate financial asset or variable rate financial liability is recognised initially at an amount equal to the principal receivable or payable at maturity, re-estimating the future interest payments normally has no significant effect on the carrying amount of the asset or liability.

If an NPO revises its estimates of payments or receipts (excluding changes in estimates of expected credit losses), the NPO shall adjust the carrying amount of the financial asset or financial liability (or group of financial instruments) to reflect actual and revised estimated cash flows. The NPO shall recalculate the carrying amount by computing the present value of estimated future cash flows at the financial instrument's original effective interest rate. The NPO shall recognise the adjustment as income or expense in surplus or deficit at the date of the revision.

Impairment of trade receivables and contract assets and financial assets measured at cost

Recognition

At the end of each reporting period, an NPO shall assess whether there is objective evidence of impairment of any trade receivables and contract assets within the scope of Section 23, and any financial assets that are measured at cost in accordance with paragraphs G11.17(b) and G11.17(c)(ii). If there is objective evidence of impairment, the NPO shall recognise an impairment loss in surplus or deficit immediately.

Objective evidence that a financial asset or group of assets is impaired includes observable data that come to the attention of the holder of the asset about the following loss events:

(a) significant financial difficulty of the issuer or obligor;
(b) a breach of contract, such as a default or delinquency in interest or principal payments;
(c) the creditor, for economic or legal reasons relating to the debtor's financial difficulty, granting to the debtor a concession that the creditor would not otherwise consider;
(d) it has become probable that the debtor will enter bankruptcy or other financial reorganisation; or
(e) observable data indicating that there has been a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, even though the decrease cannot yet be identified with the individual financial assets in the group, such as adverse national or local economic conditions or adverse changes in industry conditions.

Other factors may also be evidence of impairment, including significant changes with an adverse effect that have taken place in the technological, market, economic or legal environment in which the debtor or issuer operates.

An NPO shall assess the following financial assets individually for impairment:

(a) all equity instruments regardless of significance; and
(b) other financial assets that are individually significant.

An NPO shall assess other financial assets for impairment either individually or grouped on the basis of similar credit risk characteristics.

Measurement

An NPO shall measure an impairment loss as follows:
(a) for a financial asset measured at amortised cost in accordance with paragraph G11.17(a), the impairment loss is the difference between the asset’s carrying amount and the present value of estimated cash flows discounted at the asset’s original effective interest rate.

(b) for a financial asset measured at cost less impairment in accordance with paragraphs G11.17(b) and G11.17(c)(ii) the impairment loss is the difference between the asset’s carrying amount and the best estimate (which will necessarily be an approximation) of the amount (which might be zero) that the entity would receive for the asset if it were to be sold at the reporting date.

Reversal

G11.30 If, in a subsequent period, the amount of an impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor’s credit rating), the NPO shall reverse the previously recognised impairment loss either directly or by adjusting an allowance account. The reversal shall not result in a carrying amount of the financial asset (net of any allowance account) that exceeds what the carrying amount would have been had the impairment not previously been recognised. The NPO shall recognise the amount of the reversal in surplus or deficit immediately.

Impairment of other financial assets measured at amortised cost

G11.31 At the end of each reporting period, an NPO shall recognise an allowance for expected credit losses on any financial assets measured at amortised cost in accordance with paragraph G11.17(a) that are not trade receivables or contract assets in the scope of Section 23. An entity shall recognise in surplus or deficit, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the allowance for expected credit losses at the reporting date to the amount that is required to be recognised in accordance with paragraphs G11.32–11.42.

Measurement of expected credit losses

G11.32 An NPO shall measure expected credit losses of a financial instrument in a way that reflects:

(a) an unbiased and probability-weighted amount that is determined by evaluating alternative possible outcomes;

(b) the time value of money; and

(c) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions. For the purposes of this paragraph only, ‘undue cost or effort’ refers to the extent information shall be obtained to apply (c). It is not an undue cost or effort exemption as discussed in paragraphs G2.33–G2.36.

G11.33 Expected credit losses are a probability-weighted estimate of credit losses (that is, the present value of all cash shortfalls) over the expected life of the financial instrument. The maximum period to consider when measuring expected credit losses is the maximum contractual period (including extension options) over which an NPO is exposed to credit risk. Because expected credit losses consider the amount and timing of payments, a credit loss arises even if the NPO expects to be paid in full but later than when contractually due.

G11.34 A cash shortfall is the difference between the cash flows that are due to an NPO in accordance with the contract and the cash flows that the NPO expects to receive. The estimate of expected cash shortfalls considers the probability of a foreclosure and the cash flows that would result from it – for example, cash flows from collateralised assets.

G11.35 An NPO may use practical expedients when measuring expected credit losses if they are consistent with the principles in paragraph G11.32.
G11.36 Expected credit losses on lease receivables shall be measured in a way consistent with the cash flows and the discount rate used in the measurement of the lease receivable in accordance with Section 20.

Financial guarantee contracts
G11.37 For a financial guarantee contract, the issuer is required to make payments to the holder only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, cash shortfalls (see paragraph G11.34) are the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that an NPO expects to receive from the holder, the debtor or any other party. If the asset is fully guaranteed, the estimation of cash shortfalls for a financial guarantee contract would be consistent with the estimations of cash shortfalls for the asset subject to the guarantee.

Probability-weighted outcome
G11.38 When measuring expected credit losses, an NPO need not identify every possible scenario. However, that measurement shall reflect at least two outcomes, the possibility that a credit loss occurs and the possibility that no credit loss occurs, even if the possibility of a credit loss occurring is very low.

G11.39 The average credit losses of a group of financial instruments with shared risk characteristics may be a reasonable estimate of the probability-weighted amount. In other situations when financial assets are individually significant – for example, a loan to a related party – the identification of scenarios that specify the amount and timing of the cash flows for particular outcomes and the estimated probability of those outcomes will probably be needed.

Time value of money
G11.40 Expected credit losses shall be discounted to the reporting date, using the effective interest rate determined at initial recognition. If a financial instrument has a variable interest rate, expected credit losses shall be discounted using the current effective interest rate determined in accordance with paragraph G11.23.

Reasonable and supportable information
G11.41 An NPO shall use reasonable and supportable information to estimate expected credit losses. It may source data, both internally (NPO-specific data) and externally. Possible data sources include: internal historical credit-loss experience; internal ratings; the credit-loss experience of other entities; and external ratings, reports and statistics. An NPO with insufficient sources of NPO-specific data may make use of the experience of its peer group for the comparable financial instrument (or groups of financial instruments).

G11.42 Historical information is an important anchor or base from which to measure expected credit losses. However, an NPO shall adjust historical data such as credit loss experience to reflect, and be directionally consistent with, changes in related observable data from period to period (such as changes in unemployment rates, property prices, commodity prices, payment status or other factors that are indicative of credit losses). In some cases, the best reasonable and supportable information could be the unadjusted historical information, depending on the nature of the historical information and when it was calculated, compared to circumstances at the reporting date and the characteristics of the financial instrument being considered.

Derecognition of a financial asset
G11.43 An NPO shall derecognise a financial asset only when either:

(a) the contractual rights to the cash flows from the financial asset expire or are settled;
(b) the NPO transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
(c) the NPO, despite having retained some significant risks and rewards of ownership, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer – in this case, the entity shall:

(i) derecognise the asset; and

(ii) recognise separately any rights and obligations retained or created in the transfer.

The carrying amount of the transferred asset shall be allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations shall be measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised in accordance with this paragraph shall be recognised in surplus or deficit in the period of the transfer.

G11.44 If a transfer does not result in derecognition because the NPO has retained significant risks and rewards of ownership of the transferred asset, the NPO shall continue to recognise the transferred asset in its entirety and shall recognise a financial liability for the consideration received. The asset and liability shall not be offset. In subsequent periods, the NPO shall recognise any income on the transferred asset and any expense incurred on the financial liability.

G11.45 If a transferor provides non-cash collateral (such as debt or equity instruments) to the transferee, the accounting for the collateral by the transferor and the transferee depends on whether the transferee has the right to sell or repledge the collateral and on whether the transferor has defaulted. The transferor and transferee shall account for the collateral as follows:

(a) if the transferee has the right by contract or custom to sell or repledge the collateral, the transferor shall reclassify that asset in its Statement of Financial Position (for example, as a loaned asset, pledged equity instruments or repurchase receivable) separately from other assets;

(b) if the transferee sells collateral pledged to it, it shall recognise the proceeds from the sale and a liability measured at fair value for its obligation to return the collateral;

(c) if the transferor defaults under the terms of the contract and is no longer entitled to redeem the collateral, it shall derecognise the collateral and the transferee shall recognise the collateral as its asset initially measured at fair value or, if it has already sold the collateral, derecognise its obligation to return the collateral; and

(d) except as provided in (c), the transferor shall continue to carry the collateral as its asset and the transferee shall not recognise the collateral as an asset.

Derecognition of a financial liability

G11.46 An NPO shall derecognise a financial liability (or a part of a financial liability) only when it is extinguished – ie when the obligation specified in the contract is discharged, is cancelled or expires.

G11.47 If an existing borrower and lender exchange financial instruments with substantially different terms, the entities shall account for the transaction as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, an NPO shall account for a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) as an extinguishment of the original financial liability and the recognition of a new financial liability.

G11.48 The NPO shall recognise in surplus or deficit any difference between the carrying amount of the financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed.
Disclosures

G11.49 The following disclosures make reference to disclosures for financial liabilities measured at fair value through surplus or deficit. Entities that have only basic financial instruments (and therefore do not apply Part II of Section 11) will not have any financial liabilities measured at fair value through surplus or deficit and hence will not need to provide such disclosures.

Disclosure of accounting policies for financial instruments

G11.50 In accordance with paragraph G8.5, an NPO shall disclose material accounting policy information. Information about the measurement basis (or bases) for financial instruments used in preparing the financial statements is expected to be material accounting policy information.

Statement of Financial Position – categories of financial assets and financial liabilities

G11.51 An NPO shall disclose the carrying amounts of each of the following categories of financial assets and financial liabilities at the reporting date, in total, either in the Statement of Financial Position or in the notes:

- financial assets measured at fair value through surplus or deficit (paragraph G11.17(c)(i) and paragraphs G11.64–G11.65);
- financial assets that are debt instruments measured at amortised cost (paragraph G11.17(a));
- financial assets that are equity instruments measured at cost less impairment (paragraph G11.17(c)(ii) and paragraphs G11.64–G11.65);
- financial liabilities measured at fair value through surplus or deficit (paragraphs G11.64–G11.65);
- financial liabilities measured at amortised cost (paragraph G11.17(a));
- loan commitments measured at cost less impairment (paragraph G11.17(b)); and
- issued financial guarantee contracts (paragraph G11.17(d)).

G11.52 An NPO shall disclose information that enables users of its financial statements to evaluate the significance of financial instruments for its financial position and performance. For example, for long-term debt, such information would normally include the terms and conditions of the debt instrument (such as interest rate, maturity, repayment schedule, and restrictions that the debt instrument imposes on the NPO).

G11.53 If a reliable measure of fair value is no longer available, or is not available without undue cost or effort when such an exemption is provided, for any financial instruments that would otherwise be required to be measured at fair value through surplus or deficit in accordance with this Guidance, the NPO shall disclose that fact, the carrying amount of those financial instruments and, if an undue cost or effort exemption has been used, the reasons why a reliable fair value measurement would involve undue cost or effort.

Transferred financial assets that do not qualify for derecognition

G11.54 If an NPO has transferred financial assets to another party in a transaction that does not qualify for derecognition (see paragraphs G11.43–G11.45), the NPO shall disclose the following for each class of such financial assets:

- the nature of the assets;
- the nature of the risks and rewards of ownership to which the NPO remains exposed; and
- the carrying amounts of the assets and of any associated liabilities that the NPO continues to recognise.
Collateral

G11.55 When an NPO has pledged financial assets as collateral for liabilities or **contingent liabilities**, it shall disclose the following:

(a) the carrying amount of the financial assets pledged as collateral; and
(b) the terms and conditions relating to its pledge.

Defaults and breaches on loans payable

G11.56 For **loans payable** recognised at the reporting date for which there is a breach of terms or a default of principal, interest, sinking fund or redemption terms that have not been remedied by the reporting date, an NPO shall disclose the following:

(a) details of that breach or default;
(b) the carrying amount of the related loans payable at the reporting date; and
(c) whether the breach or default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue.

Items of income, expense, gains or losses

G11.57 An NPO shall disclose the following items of income, expense, gains or losses:

(a) income, expense, gains or losses, including changes in fair value, recognised on:
   (i) financial assets measured at fair value through surplus or deficit;
   (ii) financial liabilities measured at fair value through surplus or deficit;
   (iii) financial assets measured at amortised cost;
   (iv) financial liabilities measured at amortised cost; and
   (v) issued financial guarantee contracts.

(b) total interest income and total interest expense (calculated using the effective interest method) for financial assets or financial liabilities that are not measured at fair value through surplus or deficit; and

(c) the amount of any impairment loss for each class of financial asset.

Quantitative and qualitative information about amounts arising from expected credit losses

G11.58 An NPO shall explain the inputs, assumptions and estimation techniques used to apply the requirements in paragraphs G11.32–G11.42. For this purpose, the NPO shall disclose:

(a) the basis of inputs and assumptions and the estimation techniques used to measure the expected credit losses;

(b) how forward-looking information has been incorporated into the determination of expected credit losses, including the use of macroeconomic information; and

(c) changes in the estimation techniques or significant assumptions made during the reporting period and the reasons for those changes.

G11.59 To explain the changes in the allowance for expected credit losses and the reasons for those changes, an NPO shall provide, by class of financial instrument, a reconciliation from the opening balance to the closing balance of the allowance, in a table. The NPO shall disclose information about the changes in the allowance for financial assets separately from those for expected credit losses on issued financial guarantee contracts.
Part II – Other financial instrument issues

Scope of Part II of Section 11

G11.60 Part II of Section 11 applies to all financial instruments except the following:

(a) those covered by Part I of Section 11.

(b) investments in controlled entities and, associates and joint arrangements that are accounted for in accordance with Section 9 Consolidated and separate financial statements, Section 14 Investments in associates or Section 15 Joint arrangements.

(c) employers' rights and obligations under employee benefit plans (see Section 28 Employee benefits);

(d) rights under insurance contracts unless the insurance contract could result in a loss to either party as a result of contractual terms that are unrelated to:

   (i) changes in the insured risk;
   (ii) changes in foreign exchange rates; or
   (iii) a default by one of the counterparties;

(e) financial instruments that meet the definition of an NPO’s own equity, including the equity component of compound financial instruments issued by the NPO (see Section 22 Liabilities and equity);

(f) leases within the scope of Section 20 Leases. Consequently, Part II of Section 11 applies to leases that could result in a loss to the lessor or the lessee as a result of contractual terms that are unrelated to:

   (i) changes in the price of the leased asset;
   (ii) changes in foreign exchange rates;
   (iii) changes in lease payments based on variable market interest rates; or
   (iv) a default by one of the counterparties;

(g) reimbursement assets that are accounted for in accordance with Section 21 Provisions and contingencies (see paragraph G21.10).

G11.61 Most contracts to buy or sell a non-financial item such as a commodity, inventory or property, plant and equipment are excluded from this section because they are not financial instruments. However, Part II of Section 11 applies to all contracts that impose risks on the buyer or seller that are not typical of contracts to buy or sell non-financial items. For example, Part II of Section 11 applies to contracts that could result in a loss to the buyer or seller as a result of contractual terms that are unrelated to changes in the price of the non-financial item, changes in foreign exchange rates or a default by one of the counterparties.

G11.62 In addition to the contracts described in paragraph G11.61, Part II of Section 11 applies to contracts to buy or sell non-financial items if the contract can be settled net in cash or another financial instrument, or by exchanging financial instruments as if the contracts were financial instruments, with the following exception: contracts that were entered into and continue to be held for the purpose of the receipt or delivery of a non-financial item in accordance with the NPO’s expected purchase, sale or usage requirements are not financial instruments for the purposes of Section 11.

Initial recognition of financial assets and liabilities

G11.63 An NPO shall recognise a financial asset or a financial liability only when the NPO becomes a party to the contractual provisions of the instrument.
Initial measurement

G11.64 When a financial asset or financial liability is recognised initially, an NPO shall measure it at its fair value, which is normally the transaction price.

Subsequent measurement

G11.65 At the end of each reporting period, an NPO shall measure all financial instruments within the scope of Part II of Section 11 at fair value and recognise changes in fair value in surplus or deficit, except as follows:

(a) some changes in the fair value of hedging instruments in a designated hedging relationship are required to be recognised in the Statement of Changes in Net Assets by paragraph G11.80; and

(b) equity instruments that are not publicly traded and whose fair value cannot otherwise be measured reliably without undue cost or effort and contracts linked to such instruments that, if exercised, will result in delivery of such instruments, shall be measured at cost less impairment.

G11.66 Dividends are recognised in surplus or deficit only when:

(a) the NPO's right to receive payment is established;

(b) it is probable that the economic benefits associated with the dividend will flow to the NPO; and

(c) the amount of the dividend can be measured reliably.

G11.67 If a reliable measure of fair value is no longer available without undue cost or effort for an equity instrument, or a contract linked to such an instrument that if exercised will result in the delivery of such instruments, that is not publicly traded but is measured at fair value through surplus or deficit, its fair value at the last date that the instrument was reliably measurable without undue cost or effort, is treated as the cost of the instrument. The NPO shall measure the instrument at this cost amount less impairment until it is able to determine a reliable measure of fair value without undue cost or effort.

Fair value

G11.68 An NPO shall apply the guidance on fair value in Section 12 to fair value measurements in accordance with Section 11.

G11.69 The fair value of a financial liability that is due on demand is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

Impairment of financial assets measured at cost or amortised cost

G11.70 An NPO shall apply the guidance on impairment in paragraphs G11.25–G11.42 to financial assets measured at cost less impairment in accordance with Part II of Section 11.

Derecognition of a financial asset or financial liability

G11.71 An NPO shall apply the derecognition requirements in paragraphs G11.43–G11.48 to financial assets and financial liabilities to which Section 11 applies.

Hedge accounting

G11.72 If specified criteria are met, an NPO may designate a hedging relationship between a hedging instrument and a hedged item in such a way as to qualify for hedge accounting. Hedge accounting permits the
gain or loss on the hedging instrument and on the hedged item to be recognised in surplus or deficit at the same time.

G11.73 To qualify for hedge accounting, an NPO shall comply with all of the following conditions:

(a) the NPO designates and documents the hedging relationship so that the risk being hedged, the hedged item and the hedging instrument are clearly identified and the risk in the hedged item is the risk being hedged with the hedging instrument.

(b) the hedged risk is one of the risks specified in paragraph G11.74.

(c) the hedging instrument is as specified in paragraph G11.75.

(d) the NPO expects the hedging instrument to be highly effective in offsetting the designated hedged risk. The **effectiveness of a hedge** is the degree to which changes in the fair value or cash flows of the hedged item that are attributable to the hedged risk are offset by changes in the fair value or cash flows of the hedging instrument.

G11.74 This Guidance permits hedge accounting only for the following risks:

(a) interest rate risk of a debt instrument measured at amortised cost;

(b) foreign exchange or interest rate risk in a **firm commitment** or a **highly probable forecast transaction**;

(c) price risk of a commodity that an NPO holds or in a firm commitment or highly probable forecast transaction to purchase or sell a commodity; and

(d) foreign exchange risk in a net investment in a **foreign operation**.

Foreign exchange risk of a debt instrument measured at amortised cost is not in the list because hedge accounting would not have any significant effect on the **financial statements**. Basic accounts, notes and loans receivable and payable are normally measured at amortised cost (see paragraph G11.4(d)). This would include payables denominated in a foreign currency. Paragraph G30.11 requires any change in the **carrying amount** of the payable because of a change in the exchange rate to be recognised in surplus or deficit. Consequently, both the change in fair value of the hedging instrument (the cross-currency swap) and the change in the carrying amount of the payable relating to the change in the exchange rate would be recognised in surplus or deficit and should offset each other except to the extent of the difference between the spot rate (at which the **liability** is measured) and the forward rate (at which the swap is measured).

G11.75 This Guidance permits hedge accounting only if the hedging instrument has all of the following terms and conditions:

(a) it is an interest rate swap, a foreign currency swap, a foreign currency forward exchange contract or a commodity forward exchange contract that is expected to be highly effective in offsetting a risk identified in paragraph G11.74 that is designated as the hedged risk;

(b) it involves a party external to the **reporting NPO** (ie external to the group, segment or individual NPO being reported on);

(c) its **notional amount** is equal to the designated amount of the principal or notional amount of the hedged item;

(d) it has a specified maturity date not later than:

(i) the maturity of the financial instrument being hedged;

(ii) the expected settlement of the commodity purchase or sale commitment; or

(iii) the occurrence of the highly probable forecast foreign currency or commodity transaction being hedged.

(e) it has no prepayment, early termination or extension features.
Hedge of fixed interest rate risk of a recognised financial instrument or commodity price risk of a commodity held

G11.76 If the conditions in paragraph G11.73 are met and the hedged risk is the exposure to a fixed interest rate risk of a debt instrument measured at amortised cost or the commodity price risk of a commodity that it holds, the NPO shall:

(a) recognise the hedging instrument as an asset or liability and the change in the fair value of the hedging instrument in surplus or deficit; and
(b) recognise the change in the fair value of the hedged item related to the hedged risk in surplus or deficit and as an adjustment to the carrying amount of the hedged item.

G11.77 If the hedged risk is the fixed interest rate risk of a debt instrument measured at amortised cost, the NPO shall recognise the periodic net cash settlements on the interest rate swap that is the hedging instrument in surplus or deficit in the period in which the net settlements accrue.

G11.78 The NPO shall discontinue the hedge accounting specified in paragraph G11.76 if:

(a) the hedging instrument expires or is sold or terminated;
(b) the hedge no longer meets the conditions for hedge accounting specified in paragraph G11.73; or
(c) the NPO revokes the designation.

G11.79 If hedge accounting is discontinued and the hedged item is an asset or liability carried at amortised cost that has not been derecognised, any gains or losses recognised as adjustments to the carrying amount of the hedged item are amortised into surplus or deficit using the effective interest method over the remaining life of the hedged item.

Hedge of variable interest rate risk of a recognised financial instrument, foreign exchange risk or commodity price risk in a firm commitment or highly probable forecast transaction or a net investment in a foreign operation

G11.80 If the conditions in paragraph G11.73 are met and the hedged risk is:

(a) the variable interest rate risk in a debt instrument measured at amortised cost;
(b) the foreign exchange risk in a firm commitment or a highly probable forecast transaction;
(c) the commodity price risk in a firm commitment or highly probable forecast transaction; or
(d) the foreign exchange risk in a net investment in a foreign operation,

the NPO shall recognise in the Statement of Changes in Net Assets the portion of the change in the fair value of the hedging instrument that was effective in offsetting the change in the fair value or expected cash flows of the hedged item. The NPO shall recognise in surplus or deficit in each period any excess (in absolute amount) of the cumulative change in the fair value of the hedging instrument over the cumulative change in the fair value of the expected cash flows of the hedged item since inception of the hedge (sometimes called hedge ineffectiveness). The hedging gain or loss recognised in the Statement of Changes in Net Assets shall be reclassified to surplus or deficit, subject to the requirements in paragraph G11.82. However, the cumulative amount of any exchange differences that relate to a hedge of a net investment in a foreign operation recognised in the Statement of Changes in Net Assets shall not be reclassified to surplus or deficit on disposal or partial disposal of the foreign operation.

G11.81 If the hedged risk is the variable interest rate risk in a debt instrument measured at amortised cost, the NPO shall subsequently recognise in surplus or deficit the periodic net cash settlements from the interest rate swap that is the hedging instrument in the period in which the net settlements accrue.

G11.82 The NPO shall discontinue prospectively the hedge accounting specified in paragraph G11.80 if:

(a) the hedging instrument expires or is sold or terminated;
(b) the hedge no longer meets the criteria for hedge accounting in paragraph G11.73;
(c) in a hedge of a forecast transaction, the forecast transaction is no longer highly probable; or
(d) the NPO revokes the designation.

If the forecast transaction is no longer expected to take place or if the hedged debt instrument measured at amortised cost is derecognised, any gain or loss on the hedging instrument that was recognised in the Statement of Changes in Net Assets shall be reclassified to surplus or deficit.

Disclosures

G11.83 An NPO applying Part II of Section 11 shall make all of the disclosures required in Part I of Section 11, incorporating in those disclosures financial instruments that are within the scope of Part II of Section 11 as well as those within the scope of Part I of Section 11. In addition, if the NPO uses hedge accounting, it shall make the additional disclosures in paragraphs G11.84–G11.86.

G11.84 An NPO shall disclose the following separately for hedges of each of the four types of risks described in paragraph G11.74:

(a) a description of the hedge;
(b) a description of the financial instruments designated as hedging instruments and their fair values at the reporting date; and
(c) the nature of the risks being hedged, including a description of the hedged item.

G11.85 If an NPO uses hedge accounting for a hedge of fixed interest rate risk or commodity price risk of a commodity held (paragraphs G11.76–G11.79), it shall disclose the following:

(a) the amount of the change in fair value of the hedging instrument recognised in surplus or deficit for the period; and
(b) the amount of the change in fair value of the hedged item recognised in surplus or deficit for the period.

G11.86 If an NPO uses hedge accounting for a hedge of variable interest rate risk, foreign exchange risk, commodity price risk in a firm commitment or highly probable forecast transaction or a net investment in a foreign operation (paragraphs G11.80–G11.82), it shall disclose the following:

(a) the periods when the cash flows are expected to occur and when they are expected to affect surplus or deficit;
(b) a description of any forecast transaction for which hedge accounting had previously been used but which is no longer expected to occur;
(c) the amount of the change in fair value of the hedging instrument that was recognised in the Statement of Changes in Net Assets during the period (paragraph G11.80);
(d) the amount that was reclassified to surplus or deficit for the period (paragraphs G11.80 and G11.82); and
(e) the amount of any excess of the cumulative change in fair value of the hedging instrument over the cumulative change in the fair value of the expected cash flows that was recognised in surplus or deficit for the period (paragraph G11.80).
Comparison of Section 11 with the IFRS for SMEs Accounting Standard

Section 11 of INPAG has been drawn from Section 11 of the IFRS for SMEs Accounting Standard, with changes only to terminology and to align with the statements required by INPAG. The main differences between Section 11 of the draft Third edition of the IFRS for SMEs Accounting Standard and Section 11 of INPAG are as follows:

- Any references to share-based payments have been removed from this section, as it is proposed that a section on share-based payments is not included in INPAG.
- INPAG Section 11 uses different terminology, referring specifically to NPOs rather than entities more generally, and to other sections of INPAG rather than the IFRS for SMEs Accounting Standard.
- The examples provided in Section 11 of the draft Third edition of the IFRS for SMEs Accounting Standard have been relocated to the INPAG Implementation Guidance. Examples of monetary assets and liabilities arising from binding grant arrangements have been added.

Specific matter for comment

Section 12

Section 12 Fair value measurement will be included in ED3.
Section 13 – Inventories

Scope of this section

G13.1 This section sets out the principles for recognising and measuring inventories. Inventories are assets:

(a) held for sale in the ordinary course of operations;
(b) held for distribution to service recipients in the ordinary course of operations;
(c) held for use in fundraising (or similar circumstances where the items will be transferred to another party in the course of the NPO’s fundraising activities eg prizes);
(d) in the process of production for such sale or distribution; or
(e) in the form of materials or supplies to be consumed in the production process or in the rendering of services.

G13.2 This section applies to all inventories, except:

(a) financial instruments (see Section 11 Financial instruments); and
(b) biological assets related to agricultural activity and agricultural produce at the point of harvest (see Section 34 Specialised activities).

G13.3 This section applies to the presentation and disclosure of refund assets held in inventory representing expected product returns. An NPO shall recognise and measure refund assets in accordance with paragraphs G23.115–G23.121.

G13.4 This section does not apply to the measurement of inventories held by producers of agricultural and forest products, agricultural produce after harvest, and minerals and mineral products, to the extent that they are measured at fair value less costs to sell through surplus or deficit.

Recognition of inventories

G13.5 An NPO shall not recognise inventories where it has elected to apply one of the following permitted exceptions in respect of those inventories:

(a) low-value items donated to the NPO for resale or to be transferred to another party in the course of the NPO’s fundraising activities, recognised as revenue when the items are sold or fundraising activity takes place, in accordance with paragraph G23.37(a);
(b) items (other than non-current assets or high-value items) donated to the NPO for distribution to service recipients or for the NPO’s own use, recognised as revenue and an expense when the items are distributed or used in accordance with paragraph G23.37(b);
(c) work in progress that comprises services in-kind donated to the NPO that are not recognised as revenue, an asset or an expense in accordance with paragraph G23.37(c); and
(d) work in progress that comprises services to be provided for no or nominal consideration and the NPO elects to expense the costs as they are incurred.

Measurement of inventories

G13.6 An NPO shall measure inventories at the lower of cost and estimated selling price less costs to complete and sell, except where paragraph G13.7 and/or paragraph G13.8 applies.

G13.7 Where inventories are acquired through a donation, their initial cost shall be measured at fair value in accordance with paragraph G23.33.
G13.8 Inventories held for distribution at no or nominal consideration or for use by the NPO in meeting its objectives shall be measured at the lower of cost (or deemed cost for donated inventories in accordance with paragraph G13.7), adjusted for any loss of service potential and replacement cost.

Cost of inventories

G13.9 An NPO shall include in the cost of inventories all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Costs of purchase

G13.10 The costs of purchase of inventories comprise the purchase price, import duties and other taxes (other than those subsequently recoverable by the NPO from the taxing authorities) and transport, handling and other costs directly attributable to the acquisition of finished goods, materials and services. Trade discounts, rebates and other similar items are deducted in determining the costs of purchase.

G13.11 An NPO may purchase inventories on deferred settlement terms. In some cases, the arrangement effectively contains an unstated financing element – for example, a difference between the purchase price for normal credit terms and the deferred settlement amount. In these cases, the difference is recognised as interest expense over the period of the financing and is not added to the cost of the inventories.

Costs of conversion

G13.12 The costs of conversion of inventories include costs directly related to the units of production, such as direct labour. They also include a systematic allocation of fixed and variable production overheads that are incurred in converting materials into finished goods. Fixed production overheads are those indirect costs of production that remain relatively constant regardless of the volume of production, such as depreciation and maintenance of factory buildings and equipment and the cost of factory management and administration. Variable production overheads are those indirect costs of production that vary directly, or nearly directly, with the volume of production, such as indirect materials and indirect labour.

Allocation of production overheads

G13.13 An NPO shall allocate fixed production overheads to the costs of conversion on the basis of the normal capacity of the production facilities. Normal capacity is the production expected to be achieved on average over a number of periods or seasons under normal circumstances, taking into account the loss of capacity resulting from planned maintenance. The actual level of production may be used if it approximates normal capacity. The amount of fixed overhead allocated to each unit of production is not increased as a consequence of low production or idle plant. Unallocated overheads are recognised as an expense in the period in which they are incurred. In periods of abnormally high production, the amount of fixed overhead allocated to each unit of production is decreased so that inventories are not measured above cost. Variable production overheads are allocated to each unit of production on the basis of the actual use of the production facilities.

Joint products and by-products

G13.14 A production process may result in more than one product being produced simultaneously. This is the case, for example, when joint products are produced or when there is a main product and a by-product. When the costs of raw materials or conversion of each product are not separately identifiable, an NPO shall allocate them between the products on a rational and consistent basis. The allocation may be based, for example, on the relative sales value of each product either at the stage in the production process when the products become separately identifiable or at the completion of production. Most
by-products, by their nature, are immaterial. When this is the case, the NPO shall measure them at selling price less costs to complete and sell and deduct this amount from the cost of the main product. As a result, the **carrying amount** of the main product is not materially different from its cost.

### Other costs included in inventories

**G13.15** An NPO shall include other costs in the cost of inventories only to the extent that they are incurred in bringing the inventories to their present location and condition.

**G13.16** Paragraph G11.76(b) requires that, in some circumstances, the change in the fair value of the hedging instrument in a hedge of fixed interest rate risk or commodity price risk of a commodity held adjusts the carrying amount of the commodity.

### Costs excluded from inventories

**G13.17** Examples of costs excluded from the cost of inventories and recognised as expenses in the period in which they are incurred are:

(a) abnormal amounts of wasted materials, labour or other production costs;
(b) storage costs, unless those costs are necessary during the production process before a further production stage;
(c) administrative overheads that do not contribute to bringing inventories to their present location and condition; and
(d) selling costs.

### Cost of inventories of a service provider

**G13.18** To the extent that service providers have inventories, they measure them at the costs of their production. These costs consist primarily of the labour and other costs of personnel directly engaged in providing the service, including supervisory personnel and attributable overheads. Labour and other costs relating to sales and general administrative personnel are not included but are recognised as expenses in the period in which they are incurred. The cost of inventories of a service provider does not include profit margins or non-attributable overheads that are often factored into prices charged by service providers.

### Cost of agricultural produce harvested from biological assets

**G13.19** Section 34 requires that inventories comprising agricultural produce that an NPO has harvested from its biological assets shall be measured on initial recognition at their fair value less estimated costs to sell at the point of harvest. This becomes the cost of the inventories at that date for application of this section.

### Techniques for measuring cost, such as standard costing, retail method and most recent purchase price

**G13.20** An NPO may use techniques such as the standard cost method, the retail method or most recent purchase price for measuring the cost of inventories if the result approximates cost. Standard costs take into account normal levels of materials and supplies, labour, efficiency and capacity utilisation. They are regularly reviewed and, if necessary, revised in the light of current conditions. The retail method measures cost by reducing the sales value of the inventory by the appropriate percentage gross margin.
Cost formulas

G13.21 An NPO shall measure the cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects by using specific identification of their individual costs.

G13.22 An NPO shall measure the cost of inventories, other than those dealt with in paragraph G13.21, by using the first-in, first-out (FIFO) or weighted average cost formula. An NPO shall use the same cost formula for all inventories having a similar nature and use to the NPO. For inventories with a different nature or use, different cost formulas may be justified. The last-in, first-out (LIFO) method is not permitted by INPAG.

Impairment of inventories

G13.23 Section 27 Impairment of assets requires an NPO to assess at the end of each reporting period whether any inventories are impaired, i.e., the carrying amount is not fully recoverable (for example, because of damage, obsolescence or declining selling prices). If an item (or group of items) of inventory is impaired, those paragraphs require the NPO to measure the inventory at its selling price less costs to complete and sell (or for inventories held for distribution at no or nominal consideration or for use by the NPO in delivering its objectives, the cost adjusted for any loss of service potential or replacement cost) and to recognise an impairment loss. Those paragraphs also require a reversal of a prior impairment in some circumstances.

Recognition as an expense

G13.24 When inventories are sold, distributed to service recipients or used by the NPO, the NPO shall recognise the carrying amount of those inventories as an expense in the period in which the related revenue is recognised.

G13.25 Some inventories may be allocated to other asset accounts – for example, inventory used as a component of self-constructed property, plant or equipment. Inventories allocated to another asset in this way are accounted for subsequently in accordance with the section of INPAG relevant to that type of asset.

Disclosures

G13.26 An NPO shall disclose the following:

(a) the **accounting policies** adopted in measuring inventories, including the cost formula used;
(b) the total carrying amount of inventories and the carrying amount in classifications appropriate to the NPO;
(c) the amount of inventories recognised as an expense during the period;
(d) impairment losses recognised or reversed in surplus or deficit in accordance with Section 27;
(e) a description of any inventories not recognised because they do not meet the recognition criteria due to the NPO being unable to reliably measure the inventories; and
(f) the total carrying amount of inventories pledged as security for liabilities.

G13.27 If an NPO elects to use the permitted exceptions in paragraph G13.5, the NPO shall disclose which permitted exception or exceptions have been used, provide a description of the inventories for which the exception or exceptions have been used, and provide an explanation of why the NPO has elected to use the permitted exception(s).
Measurement

Fair value
AG13.1 Guidance in determining fair value is found in Section 12 Fair value measurement [ED3].
AG13.2 Section 12 establishes a fair value hierarchy that categorises the inputs to valuation techniques used to measure fair value into three levels. An NPO shall apply that hierarchy in determining the fair value of donated inventories.
AG13.3 Where an NPO needs to refer to level 3 inputs (that is, unobservable inputs) to determine the fair value of the donated inventories, the NPO may use the cost to the donor (where this is known) as deemed fair value.

Loss of service potential
AG13.4 Where an NPO decides to recognise inventories held for distribution at no or nominal consideration or for use by the NPO in delivering its objectives, after initial recognition, its measurement must take into account any loss of service potential.
AG13.5 The service potential of the inventories takes into account the current age, functionality and condition of the inventories held by the NPO.
AG13.6 In order to reflect the current age, functionality and condition, the following factors are considered:
   (a) physical obsolescence: this relates to any loss of service potential due to the physical deterioration of the inventories resulting from physical damage or age;
   (b) functional obsolescence: this relates to any loss of service potential resulting from inefficiencies in the inventories that are being valued compared with its modern equivalent; and
   (c) economic obsolescence: this relates to any loss of utility caused by economic or other factors outside the control of the NPO.

Reliable measurement
AG13.7 Paragraph G2.86 states that for an asset to be recognised, it must be measured. Where an asset cannot be reliably measured, it is not recognised.
AG13.8 It is expected that the majority of donated inventories can be measured reliably. Rarely, there may be circumstances where an NPO is unable to reliably measure inventories. For example, where an NPO responding to an emergency receives large volumes of donated items, distributes them almost immediately and does not have the systems or resources to keep accurate records without delaying the response to the emergency.
AG13.9 In these circumstances, it will not be possible for the NPO to apply a permitted exception (paragraph G13.5) to those inventories. This is because it will not be possible to reliably measure the asset and the related revenue and expense that are all required to be recognised when the items are used or distributed (see paragraph G23.37(b)). In these circumstances, the NPO shall not recognise inventories in respect of these donated items. Instead, the NPO shall make the disclosure required by paragraph G13.26(e).
Comparison of Section 13 with the *IFRS for SMEs* Accounting Standard

Section 13 of INPAG has been drawn from Section 13 of the *IFRS for SMEs* Accounting Standard. The main differences between Section 13 of the draft Third edition of the *IFRS for SMEs* Accounting Standard and Section 13 of INPAG are as follows:

- INPAG Section 13 uses different terminology, referring specifically to NPOs rather than entities more generally.
- INPAG Section 13 broadens the scope of the section to include inventory held for distribution and fundraising and specifically inventory held for distribution to service recipients in the course of an NPO’s ordinary operations. Additional measurement requirements are included for these types of inventories.
- Commodity brokers and dealers that measure their inventories at fair value less costs to sell through profit and loss has been removed as these activities are expected to not be relevant to NPOs.
- INPAG Section 13 includes a requirement that inventory received for no or nominal cost is to be measured at fair value (subject to permitted exceptions).
- INPAG Section 13 includes permitted exceptions that allow certain types of donated inventory to not be recognised until it is sold or transferred to another party in the course of fundraising activities, or to not be recognised until it has been distributed to service recipients. These permitted exceptions provide pragmatic relief for NPOs in recognising and measuring these kinds of inventories.
- INPAG Section 13 sets the expectation that all donated inventories can be reliably measured, providing additional guidance, and requires additional disclosure if inventories have not been recognised because a reliable measurement cannot be obtained.
- Additional application guidance has been developed for Section 13 that further explains the main amendments from Section 13 of the draft Third edition of the *IFRS for SMEs* Accounting Standard. It also provides NPO-specific guidance that cost to the donor can be used to approximate fair value for donated inventory.
- INPAG Section 13 requires that use of the permitted exceptions be disclosed.

Specific matter for comment

Sections 14–20 will be included in ED3.
Section 21 – Provisions and contingencies

Scope of this section
G21.1 This section applies to all provisions (ie liabilities of uncertain timing or amount), contingent liabilities and contingent assets except those provisions covered by other sections of this Guidance. These include provisions relating to:

(a) leases (Section 20 Leases). However, this section deals with operating leases that have become onerous.
(b) revenue (Section 23 Revenue). However, this section deals with enforceable grant arrangements and contracts with customers that have become onerous.
(c) employee benefit obligations (Section 28 Employee benefits).
(d) income tax (Section 29 Income tax).
(e) contingent consideration of an acquirer in a business combination (Section 19 Business combinations and goodwill).

G21.2 The requirements in this section do not apply to executory contracts unless they are onerous contracts. Executory contracts are contracts under which neither party has fulfilled any of its obligations or both parties have partially fulfilled their obligations to an equal extent.

G21.3 The word ‘provision’ is sometimes used in the context of such items as depreciation, impairment of assets and uncollectable receivables. Those are adjustments of the carrying amounts of assets instead of recognition of liabilities and therefore are not covered by this section.

Initial recognition
G21.4 An NPO shall recognise a provision only when:

(a) the NPO has an obligation at the reporting date as a result of past events;
(b) it is probable (ie more likely than not) that the NPO will be required to transfer economic benefits in settlement; and
(c) the amount of the obligation can be estimated reliably.

G21.5 The NPO shall recognise the provision as a liability in the Statement of Financial Position and shall recognise the amount of the provision as an expense, unless another section of this Guidance requires the cost to be recognised as part of the cost of an asset such as inventories or property, plant and equipment.

G21.6 The condition in paragraph G21.4(a) (obligation at the reporting date as a result of a past event) means that the NPO has no realistic alternative to settling the obligation. This can happen when the NPO has a legal obligation that can be enforced by law or when the NPO has a constructive obligation because the past event (which may be an action of the NPO) has created valid expectations in other parties that the entity will discharge the obligation. Obligations that will arise from the NPO’s future actions (ie the future conduct of its activities) do not satisfy the condition in paragraph G21.4(a), no matter how likely they are to occur and even if they are contractual. To illustrate, because of operational pressures or legal requirements, an NPO may intend or need to carry out expenditure to operate in a particular way in the future (for example, by fitting safety equipment in an operational building). Because the NPO can avoid the future expenditure by its future actions – for example, by changing its method of operation

---

2 This section uses the term provision in a way that differs in some respects from the definition of a liability in paragraph G2.59 and the Glossary. For the purpose of this section, a liability is a present obligation of the NPO arising from past events, the settlement of which is expected to result in an outflow from the NPO of resources embodying economic benefits.
or selling the operational building – it has no present obligation for that future expenditure and no provision is recognised.

G21.7 A restructuring is a programme that is planned and controlled by management and materially changes either the scope of an activity undertaken by an NPO or the manner in which that activity is conducted. A constructive obligation to restructure arises only when an NPO:

(a) has a detailed formal plan for the restructuring identifying at least:
   (i) the activities concerned;
   (ii) the principal locations affected;
   (iii) the location, function and approximate number of employees who will be compensated for terminating their services;
   (iv) the expenditures that will be undertaken; and
   (v) when the plan will be implemented.

(b) has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

Initial measurement

G21.8 An NPO shall measure a provision at the best estimate of the amount required to settle the obligation at the reporting date. The best estimate is the amount an NPO would rationally pay to settle the obligation at the end of the reporting period or to transfer it to a third party at that time:

(a) when the provision involves a large population of items, the estimate of the amount reflects the weighting of all possible outcomes by their associated probabilities. Where there is a continuous range of possible outcomes, and each point in that range is as likely as any other, the mid-point of the range is used.

(b) when the provision arises from a single obligation, the individual most likely outcome may be the best estimate of the amount required to settle the obligation. However, even in such a case, the NPO considers other possible outcomes. When other possible outcomes are either mostly higher or mostly lower than the most likely outcome, the best estimate will be a higher or lower amount than the most likely outcome.

When the effect of the time value of money is material, the amount of a provision shall be the present value of the amount expected to be required to settle the obligation. The discount rate (or rates) shall be a pre-tax rate (or rates) that reflect(s) current market assessments of the time value of money. The risks specific to the liability shall be reflected either in the discount rate or in the estimation of the amounts required to settle the obligation, but not both.

G21.9 An NPO shall exclude gains from the expected disposal of assets from the measurement of a provision.

G21.10 When some or all of the amount required to settle a provision may be reimbursed by another party (for example, through an insurance claim), the NPO shall recognise the reimbursement as a separate asset only when it is virtually certain that the NPO will receive the reimbursement on settlement of the obligation. The amount recognised for the reimbursement shall not exceed the amount of the provision. The reimbursement receivable shall be presented in the Statement of Financial Position as an asset and shall not be offset against the provision. In the Statement of Income and Expenses, the NPO may offset any reimbursement from another party against the expense relating to the provision.

Subsequent measurement

G21.11 An NPO shall charge against a provision only those expenditures for which the provision was originally recognised.
G21.12 An NPO shall review provisions at each reporting date and adjust them to reflect the current best estimate of the amount that would be required to settle the obligation at that reporting date. Any adjustments to the amounts previously recognised shall be recognised in surplus or deficit unless the provision was originally recognised as part of the cost of an asset (see paragraph G21.5). When a provision is measured at the present value of the amount expected to be required to settle the obligation, the unwinding of the discount shall be recognised as a finance cost in surplus or deficit in the period it arises.

Contingent liabilities

G21.13 A contingent liability is either a possible but uncertain obligation or a present obligation that is not recognised because it fails to meet one or both of the conditions (b) and (c) in paragraph G21.4. An NPO shall not recognise a contingent liability as a liability, except for contingent liabilities assumed in a business combination (see paragraph 19.10J). Disclosure of a contingent liability is required by paragraph G21.16 unless the possibility of an outflow of resources is remote. When an NPO is jointly and severally liable for an obligation, the part of the obligation that is expected to be met by other parties is treated as a contingent liability.

Contingent assets

G21.14 An NPO shall not recognise a contingent asset as an asset. Disclosure of a contingent asset is required by paragraph G21.17 when an inflow of economic benefits is probable. However, when the flow of future economic benefits to the NPO is virtually certain, then the related asset is not a contingent asset, and its recognition is appropriate.

Disclosures

Disclosures about provisions

G21.15 For each class of provision, an NPO shall disclose all of the following:

(a) a reconciliation showing:

(i) the carrying amount at the beginning and end of the period;
(ii) additions during the period, including adjustments that result from changes in measuring the discounted amount;
(iii) amounts charged against the provision during the period; and
(iv) unused amounts reversed during the period.

(b) a brief description of the nature of the obligation and the expected amount and timing of any resulting payments;

(c) an indication of the uncertainties about the amount or timing of those outflows; and

(d) the amount of any expected reimbursement, stating the amount of any asset that has been recognised for that expected reimbursement.

Comparative information for prior periods is not required.

Disclosures about contingent liabilities

G21.16 Unless the possibility of any outflow of resources in settlement is remote, an NPO shall disclose, for each class of contingent liability at the reporting date, a brief description of the nature of the contingent liability and, when practicable:

(a) an estimate of its financial effect, measured in accordance with paragraphs G21.8-G21.12;
Disclosures about contingent assets

G21.17 If an inflow of economic benefits is probable (more likely than not) but not virtually certain, an NPO shall disclose a description of the nature of the contingent assets at the end of the reporting period and, unless it would involve undue cost or effort, an estimate of their financial effect, measured using the principles set out in paragraphs G21.8–G21.12. If such an estimate would involve undue cost or effort, the NPO shall disclose that fact and the reasons why estimating the financial effect would involve undue cost or effort.

Prejudicial disclosures

G21.18 In extremely rare cases, disclosure of some or all of the information required by paragraphs G21.15–G21.17 can be expected to prejudice seriously the position of the NPO in a dispute with other parties on the subject matter of the provision, contingent liability or contingent asset. In such cases, an NPO need not disclose the information, but shall disclose the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed.

Comparison of Section 21 with the IFRS for SMEs Accounting Standard

Section 21 of INPAG has been drawn from Section 21 of the IFRS for SMEs Accounting Standard, with changes only to terminology and to align with the statements required by INPAG. The main differences between Section 21 of the draft Third edition of the IFRS for SMEs Accounting Standard and Section 21 of INPAG are as follows:

• INPAG Section 21 uses different terminology, referring specifically to NPOs rather than entities more generally, and to other sections of INPAG rather than the IFRS for SMEs Accounting Standard.
• The reference to obligations arising as a result of a past event has been updated to obligations arising as a result of past events in line with the concepts and pervasive principles.
• The examples provided in Section 21 of the draft Third edition of the IFRS for SMEs Accounting Standard have been relocated to the INPAG Implementation Guidance. The example of warranties has been removed and a new example relating to onerous contracts has been added.

Specific matter for comment

Question 3: Provisions and contingencies

(a) Do you agree that an illustrative example on warranties is removed from the Implementation Guidance and a new example on onerous contracts added? If not, why not?

Section 21, illustrative example 3

Section 22 – Liabilities and equity

Section 22 will be included in ED3.
Section 23 – Revenue

Scope of this section
G23.1 This section specifies the accounting for revenue by NPOs.

G23.2 Section 23 applies to all revenue except:
   (a) equity contributions received (see Section 22 Liabilities and equity [ED3]);
   (b) lease agreements within the scope of Section 20 Leases [ED3];
   (c) insurance contracts;
   (d) financial instruments and other contractual rights or obligations within the scope of Section 9 Consolidated and separate financial statements, Section 11 Financial instruments, Section 14 Investments in associates and Section 15 Joint arrangements that are not grants and donations; and
   (e) non-monetary exchanges between entities in the same line of business to facilitate sales to customers or potential customers.

G23.3 A transaction may be partially within the scope of this section and partially within the scope of the other INPAG sections as set out in paragraph G23.2 (for example, a lease agreement that includes the provision of services). If the other section specifies how to separate or initially measure any parts of the transaction, then an NPO shall first apply the separation or measurement requirements in that section. Otherwise, the NPO shall apply this section to separate or initially measure those parts of the transaction.

Structure of Section 23
G23.4 This section comprises two parts: Part I Revenue from grants and donations and Part II Revenue from contracts with customers (see Figure 23.1).

G23.5 Part I relates to accounting for revenue from grants, donations and similar income. It is revenue that arises from a transaction in which an NPO receives cash, a service, good or other asset from another entity or individual without directly providing any cash, or a service, good or other asset in return to the provider of those resources. This form of revenue is sometimes known as non-exchange revenue, non-reciprocal revenue or unrequited revenue.

G23.6 Part II relates to accounting for revenue from contracts with customers. This is revenue that an NPO earns from providing services, goods or other assets to customers (be they an entity or individual), usually at a market rate. This form of revenue is sometimes known as commercial revenue, exchange revenue, reciprocal revenue or requited revenue.

G23.7 The part of Section 23 that an NPO is required to apply to a revenue transaction depends on the economic substance of that transaction. As a consequence, there may be situations where it is necessary to apply both parts of Section 23 to an individual transaction. Also, an NPO may be required to treat an element of a transaction as a grant expense (where Section 24 Part I Expenses on grants and donations will apply). For example, goods or services provided at a significant subsidy may, in substance, be the provision of a grant, along with the goods or services). Paragraphs AG23.3–AG23.13 and Figure 23.1 provide additional guidance, separating a transaction into separate elements where revenue transactions involve a subsidy being received or given by an NPO.

Principles for revenue recognition and measurement
G23.8 The general principles for recognising revenue are as follows:
   (a) a revenue transaction that does not impose specified enforceable grant obligations (EGOs) on the NPO or does not require the satisfaction of promises in a contract with customers is recognised as revenue when the amounts are received or, if earlier, become receivable;
(b) a revenue transaction that imposes specified EGOs on the NPO or requires the satisfaction of promises in a contract with customers is recognised as revenue only when the EGOs or promises are met; and

(c) amounts received before the revenue recognition criteria are satisfied are recognised as a liability.

G23.9 A liability recognised in accordance with paragraph G23.8(c) is subsequently derecognised, and revenue recognised, when the EGOs or promises are met.

G23.10 An NPO shall measure revenue at the fair value of the asset received or receivable, or the reduction in a liability where the grant provider forgives an NPO’s obligation.

Initial recognition of revenue from enforceable grant arrangements or contracts with customers

5 step model

G23.11 For revenue transactions that impose specified EGOs on the NPO or require the satisfaction of promises in a contract with customers, Parts I and II share a common 5 step revenue recognition model. The objective of the model is for an NPO to recognise revenue that reflects the amount to which the NPO expects to be entitled for meeting each EGO or promise. This is applicable to revenue from grants and donations where there is an enforceable grant arrangement (EGA) and to all revenue from contracts with customers. Each step is summarised below, highlighting the differences in terminology depending on which part applies to the transaction.

<table>
<thead>
<tr>
<th>Step</th>
<th>Part I Revenue from grants and donations with enforceable grant arrangements</th>
<th>Part II Revenue from contracts with customers</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 – Identify the existence and nature of grant arrangements and contracts.</td>
<td>Identify if there is an EGA, and if so, identify the nature of the arrangement.</td>
<td>Identify the contract(s) with a customer.</td>
</tr>
<tr>
<td>2 – Identify the EGOs or promises.</td>
<td>Identify the EGOs in the EGA that arise from undertakings given by the NPO.</td>
<td>Identify the promises in the contract. ‘Promises’ is used to refer to both the actions an NPO will undertake (equivalent to undertakings in Part I) and the obligation to carry out those actions (equivalent to EGOs in Part I).</td>
</tr>
<tr>
<td>3 – Determine the transaction amount or price.</td>
<td>Determine the transaction amount (the total amount of the grant).</td>
<td>Determine the transaction price.</td>
</tr>
<tr>
<td>4 – Allocate the transaction amount or price to the EGOs or promises.</td>
<td>Allocate the transaction amount to EGOs (where there is more than one EGO).</td>
<td>Allocate the transaction price to the promises in the contract (where there is more than one promise).</td>
</tr>
<tr>
<td>5 – Recognise revenue when (or as) the NPO satisfies an EGO or promise.</td>
<td>Recognise revenue when (or as) the NPO satisfies an EGO.</td>
<td>Recognise revenue when (or as) the NPO satisfies a promise.</td>
</tr>
</tbody>
</table>
An NPO may need to refer to Part II for more complex, less common grant transactions. Paragraphs AG23.37–AG23.40 set out how Part II is to be applied to such grants. Paragraph AG23.62 includes guidance on applying Part II to less complex contracts with customers.

**Unsatisfied transactions**

G23.12 When an EGA (Part I) or a contract with a customer (Part II) is wholly unsatisfied, an NPO shall not recognise any asset, liability or revenue associated with the EGA or contract. The recognition of assets, liabilities and revenues commences when one party to the EGA or contract starts to satisfy their obligations under the arrangement.

G23.13 EGAs and contracts with customers will be wholly unsatisfied if the NPO has not yet met any of its stated EGOs in the EGA or promises in a contract and the grant provider or customer has not yet paid, and is not yet obligated to pay, consideration to the NPO.

**Revenue in foreign currencies**

G23.14 An NPO may receive revenue in a foreign currency. Measurement of revenue in a foreign currency may be affected by the point at which amounts are translated from the foreign currency to the reporting currency.

G23.15 The effect of changes in foreign exchange rates after the inception of an EGA or contract with a customer are accounted for in accordance with Section 30 *Foreign currency translation*.

**Principal versus agent considerations**

G23.16 When another party is involved in satisfying the requirements of an EGA or contract with a customer, an NPO shall determine whether the nature of its obligation is to satisfy the requirements itself (that is, the NPO is a principal) or to arrange for those requirements to be met by the other party (that is, the NPO is an agent). An NPO shall determine whether it is a principal or an agent for each EGO in an EGA and each promise in a contract. An NPO cannot be an agent unless it has a present obligation to the grant provider or customer.

G23.17 An NPO is a principal if:

(a) it is primarily responsible for meeting the requirements of the EGA or contract;
(b) when the NPO transfers goods to a *service recipient* or customer, the NPO obtains control of the specified goods as inventory before it transfers them to the service recipient or customer (that is, the NPO has inventory risk before the goods are transferred); or
(c) when the NPO provides services to a service recipient or customer, it obtains control of the specified service or right to the specified good or service before:
   (i) it provides the services to the service recipient or customer; or
   (ii) it directs another party who is acting on the NPO’s behalf to provide the service to the service recipient or customer.

If none of the circumstances in (a)-(c) apply, the NPO is an agent.

G23.18 An NPO that is a principal shall recognise the gross amount of revenue to which the NPO expects to be entitled for satisfying the requirements of an EGA or contract.

G23.19 An NPO that is an agent shall recognise the amount of any management or administration charge, fee or commission to which the NPO expects to be entitled in exchange for arranging for the requirements of the EGA or contract to be satisfied as revenue.
Presentation

G23.20 An NPO shall apply Section 36 Fund accounting [ED3] to determine the presentation of grant revenue as from funds with restrictions or funds without restrictions.

Part I – Revenue from grants and donations

Scope of Part I

G23.21 Part I specifies the accounting for revenue from grants, donations and similar income (hereafter referred to as grant revenue) as described in G23.5.

G23.22 The accounting for expenditure by an NPO on grants, donations and similar transfers is specified in Section 24 Part I Expenses on grants and donations.

Types of grant revenue

G23.23 Grant revenue may arise:

(a) from transactions that:

(i) impose no constraints on the NPO’s ability to use the grant revenue; or

(ii) impose requirements that constrain an NPO’s ability to use the grant revenue, without requiring the NPO to undertake specific activities or identifying distinct services, goods and other assets; or

(b) from EGAs that have:

(i) only one EGO;

(ii) multiple distinct EGOs.

G23.24 An EGA is a grant arrangement where both the donor and the grant recipient have both rights and obligations, enforceable through legal or equivalent means. An EGA includes at least one EGO.

G23.25 An EGA can arise through a written grant agreement, an oral agreement or be implied by a party’s or a sector’s customary practices. In determining whether a grant arrangement is enforceable, an NPO must consider the substance rather than the legal form of the grant arrangement.

G23.26 An EGA must specify:

• the outcome the NPO is expected to achieve;

• the activities that the NPO is required to undertake with the resources; or

• the distinct services, goods and other assets that the NPO will use internally or transfer externally.

G23.27 This undertaking by the grant recipient in an EGA is an EGO. An EGO creates a present obligation.

G23.28 An arrangement with an NPO that does not specify the outcomes, activities or identify distinct services, goods and other assets may nevertheless include requirements that constrain an NPO’s ability to use the grant revenue.

G23.29 If these requirements do not meet the definition of an EGO, the requirement will not create a present obligation when resources are transferred.

G23.30 An arrangement with a grant provider that is not enforceable through legal or equivalent means and does not give both parties both rights and obligations is categorised as an other funding arrangement (OFA). The type of grant revenue will determine its recognition and measurement.
Identify the grant revenue transaction

G23.31 For a grant arrangement to be enforceable, it must be enforceable through legal or equivalent means. Enforceability can arise from various mechanisms, so long as the mechanism(s) provide each entity with the ability to hold the parties accountable for the satisfaction of their obligations.

Grant revenue from transactions from other funding arrangements

G23.32 Grant revenue from transactions under an OFA will result in an asset (cash, goods, services or another asset) and revenue for an NPO. The NPO will usually recognise both the asset and revenue when the asset is received or when the amount becomes receivable.

G23.33 The NPO shall measure the grant revenue and the asset (cash, receivable or other asset) at the fair value of the asset at the point at which it is recognised. Fair value shall be determined in accordance with Section 12 Fair value measurement [ED3]

Subsequent measurement

G23.34 After initial recognition, an NPO shall subsequently measure:

(a) cash and receivable assets in accordance with Section 11 Financial instruments; and
(b) all other assets in accordance with the relevant section of INPAG (examples include Section 13 Inventories and Section 17 Property, plant and equipment).

Donations in-kind

G23.35 Donations in-kind include donations of non-cash items such as goods and other assets, and services such as volunteer time. Donations in-kind are recognised and measured in accordance with paragraphs G23.32–G23.33 except as outlined in paragraphs G23.36–G23.40.

G23.36 NPOs may apply permitted exceptions to the general recognition and measurement requirements for grant revenue under an OFA. This is because the cost of complying with the general requirements may exceed the benefits to the users of the financial statements of such compliance. These exceptions are not permitted in relation to grant revenue from EGAs.

G23.37 An NPO may elect to depart from the general recognition and measurement requirements by:

(a) recognising revenue from low-value assets donated for resale or to be transferred to another party in the course of the NPO's fundraising activities, when the items are sold or the fundraising activity has taken place, measured at the amount of the consideration received or receivable;
(b) recognising revenue from items donated for distribution to service recipients or for an NPO's own use when the items are distributed or used, measured at the fair value of the items at the time they are distributed or used; and
(c) not recognising revenue in respect of any services in-kind, except those that are critical to the NPO's mission.

G23.38 Services in-kind that are critical to an NPO's mission are those services in–kind without which an NPO would have to materially reduce the level of its activities. Paragraphs AG23.35–AG23.36 provide additional guidance on determining which services are critical to an NPO's mission.

G23.39 When applying a permitted exception, the NPO shall apply that exception to all items within a class of inventories or other assets.

G23.40 Donations in-kind may only be recognised when they can be measured reliably. For services in-kind that are critical to the NPO's mission but cannot be reliably measured, an NPO is required to make the disclosures in paragraph G23.63.
Revenue from transactions with enforceable grant arrangements

G23.41 An NPO shall apply the 5 step model set out in paragraph G23.11. Part I provides guidance on common NPO transactions. The guidance in Part II can be used for more complex, less common transactions. Paragraphs AG23.37–AG23.40 set out how Part II is to be applied.

Enforceable grant arrangements with a single enforceable grant obligation

G23.42 Where an EGA has a single EGO, an NPO may be able to apply the 5 step model without a detailed analysis for some or all of the steps. An NPO may apply the 5 step model as follows to such transactions:

<table>
<thead>
<tr>
<th>Step</th>
<th>Action required</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 – Identify the grant arrangement (paragraph G23.44).</td>
<td>Completed by applying paragraphs G23.4–G23.7 to identify an arrangement and determine that the arrangement is an EGA.</td>
</tr>
<tr>
<td>2 – Identify the EGO (paragraphs G23.45–G23.50).</td>
<td>Detailed analysis may not be required.</td>
</tr>
<tr>
<td>3 – Determine the transaction amount (paragraphs G23.51–G23.52).</td>
<td>No analysis required, as this is the total amount of the grant.</td>
</tr>
<tr>
<td>4 – Allocate the transaction amount to the EGOs (paragraphs G23.53–G23.56).</td>
<td>Not required as the total amount of the grant is allocated to the single EGO.</td>
</tr>
<tr>
<td>5 – Recognise revenue when (or as) the NPO satisfies an EGO (paragraphs G23.57–G23.59).</td>
<td>The EGO may be recognised over time or at a point in time (see paragraphs AG23.50–AG23.51). Depending on the nature of the EGO, detailed analysis may not be required.</td>
</tr>
</tbody>
</table>

G23.43 An NPO shall:

(a) recognise an enforceable grant arrangement liability for the amount of grant received and for which the EGO has yet to be satisfied;
(b) recognise revenue and derecognise the EGA liability as or when the EGO is satisfied;
(c) recognise revenue and an enforceable grant arrangement asset for the amount of the transaction consideration to which the NPO is entitled for progress towards complete satisfaction of the EGO and for which the grant is yet to be received; and
(d) derecognise the EGA asset as the consideration is received.

Enforceable grant arrangements with a number of distinct enforceable grant obligations

Step 1 – Identifying an enforceable grant arrangement

G23.44 An NPO will have completed this step by applying paragraphs G23.4–G23.7 to identify an arrangement and determine that the arrangement is an EGA.

Step 2 – Identifying enforceable grant obligations in an enforceable grant arrangement

G23.45 An undertaking in an EGA must create an EGO.

G23.46 At the inception of an EGA, an NPO shall assess its commitments in the arrangement and identify as an EGO each of its separate and distinct undertakings to:
(a) achieve a specified outcome or group of outcomes (or to employ best endeavours to achieve a specified outcome or group of outcomes);
(b) carry out a specified activity or group of activities;
(c) transfer a distinct good or service (or a distinct bundle of goods or services) to service recipients; and
(d) use a distinct good or service (or a distinct bundle of goods or services) internally.

G23.47 If an NPO determines that the EGA has a single EGO, it shall apply paragraphs G23.42–G23.43 in accounting for the EGA.

Enforceable grant obligations and resources

G23.48 An EGA will generally explicitly state the outcomes, activities, services or goods that are required by an EGO. However, these may be implied by the customary practices of an NPO, a grant provider, or a sector in some jurisdictions.

G23.49 Generally, EGOs do not include administrative tasks such as monthly monitoring reports.

Identifying separate enforceable grant obligations

G23.50 An EGO is separate and distinct if both of the following criteria are met:

(a) an outcome or activity (which may be the transfer of goods or services to service recipients) is separate from other outcomes or activities in the EGA; and
(b) the resources (including goods or services) required to complete the outcome or activity by the EGA are separate from other resources required by the EGA.

Step 3 – Determining the transaction amount

G23.51 The transaction amount is the amount of the grant to which an NPO expects to be entitled for satisfying its EGOs. An NPO shall consider the terms of the EGA and its customary practices to determine the transaction amount.

G23.52 For the purpose of determining the transaction amount, an NPO shall assume that the grant will be received in accordance with the terms of the EGA as it exists at the transaction date and that it will not be cancelled, renewed or modified in the future.

Step 4 – Allocating the transaction amount to enforceable grant obligations

G23.53 An NPO shall allocate the transaction amount to each EGO identified in the EGA on a stand-alone value basis that is relative to the estimated costs.

G23.54 The stand-alone value is the cost (including costs such as employee costs) the NPO expects to incur to satisfy an EGO. Where a grant is only intended to contribute towards part of the costs of a specified activity or deliverable under an EGO, the stand-alone value shall be adjusted to reflect any specific amount identified in the EGA or to reflect the proportion of the activity or deliverable intended in the EGA.

G23.55 An NPO shall use the observable price of a good or service as the stand-alone value when the NPO acquires those goods and services in an observable market. Otherwise, the NPO shall estimate the stand-alone value.

G23.56 When estimating a stand-alone value, an NPO shall take into account all information that is reasonably available to it, including market conditions, NPO-specific factors and negotiations with the grant provider. An NPO shall apply estimation methods consistently in similar circumstances.
Step 5 – Recognising grant revenue when (or as) the NPO satisfies an enforceable grant obligation

G23.57 An NPO shall recognise grant revenue from a transaction with an EGA when (or as) the NPO satisfies an EGO. An NPO satisfies an EGO by completing the activity or deliverable (which may be the transfer of goods or services to service recipients) using the required resources. EGOs may be satisfied over time or at a point in time (see paragraphs AG23.50–AG23.51).

G23.58 Grant revenue is measured at the value of the transaction amount allocated to the EGO that has been met or partially met.

G23.59 Where an NPO has received a grant in advance of meeting its EGOs, it shall recognise an EGA liability. It shall recognise an EGA asset where an EGO has been met ahead of the amount being receivable.

Enforceable grant arrangement costs

G23.60 An NPO shall account for the costs incurred in fulfilling an EGA in accordance with the relevant section of INPAG for those costs (for example, Section 13 Inventories, Section 17 Property, plant and equipment and Section 18 Intangible assets other than goodwill).

Disclosure

G23.61 An NPO shall disclose the revenue it recognised from grants, donations and other income, disaggregated into categories, showing separately, at a minimum, revenue arising from transactions:

(a) that are OFAs, disaggregated into:
   (i) revenue received or receivable in cash;
   (ii) revenue received as gifts in-kind; and
   (iii) revenue received as services in-kind;

(b) with EGAs.

Grant revenue without enforceable grant arrangements

G23.62 If an NPO elects to use the permitted exceptions in paragraph G23.37, the disclosures in G13.27 shall be made.

G23.63 When an NPO receives services in-kind that are critical to the NPO’s mission but does not recognise those services in-kind (in accordance with paragraph G23.36(c)) because the value of the services cannot be reliably measured, the NPO shall disclose:

(a) a description of the services received;
(b) an explanation of why the services are critical to the NPO’s mission; and
(c) any quantitative information available to the NPO – for example, the number of hours or days of each type of service in-kind received.

G23.64 An NPO is encouraged (but not required) to disclose its best estimate of the value of any gifts in-kind or services in-kind that it has received but not recognised as revenue.

G23.65 An NPO shall disclose the opening and closing balances of any receivables from grants, donations and similar income without EGAs if not otherwise separately presented or disclosed.

Grant revenue with enforceable grant arrangements

G23.66 Unless the amounts are presented separately in the Statement of Income and Expenses by applying other sections of INPAG, an NPO shall disclose the amount of impairment losses recognised for the
reporting period on any receivables or EGA assets arising from an NPO’s EGAs, which the NPO shall disclose separately from other impairment losses for the reporting period.

G23.67 An NPO shall disclose:
(a) the opening and closing balances of receivables, EGA assets and EGA liabilities, if not otherwise separately presented or disclosed;
(b) revenue recognised in the reporting period that was included in the EGA liability balance at the beginning of the period; and
(c) revenue recognised in the reporting period from EGOs satisfied or partially satisfied in previous periods.

G23.68 An NPO shall disclose information about its EGOs in EGAs, including a description of:
(a) when the NPO typically satisfies its EGOs (for example, upon delivery, as services are rendered or upon completion of service); and
(b) the significant grant payment terms.

G23.69 For EGOs that an NPO satisfies over time, the NPO shall disclose the methods it used to recognise revenue.

G23.70 An NPO shall provide a quantitative or qualitative explanation of the significant unsatisfied EGOs and when they are expected to be satisfied. However, an NPO need not disclose such information if the EGO is part of an EGA that has an original expected duration of one year or less.

### Part II – Revenue from contracts with customers

#### Revenue recognition model

G23.71 Part II applies the 5 step revenue recognition model in paragraph G23.11 to contracts with customers. An NPO shall apply Part II consistently to contracts with similar characteristics and in similar circumstances.

G23.72 Part II specifies the accounting for an individual contract with a customer. An NPO may apply this section to a portfolio of similar contracts (or promises) if the NPO reasonably expects that the result of doing so would not differ materially from the result of applying this section to the individual contracts (or promises) within that portfolio.

#### Applying the revenue recognition model to simpler transactions

G23.73 Part II establishes the revenue recognition model for all revenue from contracts with customers, and as a consequence includes requirements for many complex features of revenue transactions that are not relevant for many NPO revenue transactions. For complex transactions, NPOs will need to apply the relevant requirements in this section. Paragraph AG23.62 provides guidance on when certain requirements will not be relevant to simpler transactions.

#### Step 1 – Identify the contract(s) with a customer

G23.74 An NPO shall apply the revenue recognition model to account for a contract with a customer that is within the scope of this section only when all of the following criteria are met:
(a) the parties to the contract have approved the contract and are committed to perform their respective obligations;
(b) the NPO can identify each party’s rights regarding the goods or services to be transferred;
(c) the NPO can identify the payment terms for the goods or services to be transferred; 
(d) the contract has commercial substance; and 
(e) it is probable that the NPO will collect the consideration to which it will be entitled in exchange for the goods or services to be transferred to the customer. 

G23.75 The criterion in paragraph G23.74(e) is met when the customer has the ability and intention to pay the consideration when due. 

G23.76 If a contract with a customer meets the criteria in paragraph G23.74 at inception, reassessment is only required if there is an indication of a significant change in relevant facts and circumstances. 

G23.77 If a contract with a customer does not meet the criteria in paragraph G23.74, an NPO shall initially recognise any consideration received from the customer as a liability and continue to reassess the contract until the criteria are met. 

G23.78 An NPO shall recognise the consideration initially recognised as a liability in accordance with paragraph G23.77 as revenue when either: 

(a) the contract is complete and all, or substantially all, of the consideration promised by the customer has been received and is non-refundable; or 
(b) the contract is terminated and the consideration received is non-refundable. 

G23.79 Some contracts with customers may have no fixed duration or may automatically renew periodically. An NPO shall apply this section to the duration of the contract (that is, the contractual period) in which the parties to the contract have present enforceable rights and obligations, except for contract renewal options within the scope of paragraph G23.104. 

Combination of contracts 

G23.80 An NPO shall combine two or more contracts entered into at or near the same time with the same customer (or related parties of the customer) and account for the contracts as a single contract if one or more of the following criteria are met: 

(a) the contracts are negotiated as a package with a single commercial objective; 
(b) the amount of consideration to be paid in one contract depends on the price or performance of the other contract; or 
(c) the goods or services promised in the contracts (or some goods or services promised in each of the contracts) are a single promise in accordance with paragraphs G23.84–G23.92. 

Contract modifications 

G23.81 A contract modification is a change in the scope or price (or both) of a contract that is approved by the parties to the contract. A contract modification either creates new enforceable rights and obligations or changes such rights and obligations that already exist. 

G23.82 An NPO shall account for contract modifications as follows: 

(a) if the remaining goods or services are distinct from the goods or services transferred on or before the date of the contract modification, an NPO shall account for the contract modification as if it were a termination of the existing contract and the creation of a new contract. The transaction price for the new contract is the sum of: 

(i) the consideration included in the original estimate of the transaction price that had not been recognised as revenue; and 
(ii) any additional consideration promised as part of the contract modification.
(b) if the remaining goods or services are not distinct from the goods or services transferred on or before the date of the contract modification, an NPO shall account for the contract modification as if it were part of the existing contract. The effect that the contract modification has on the transaction price, and on the NPO’s measure of progress towards complete satisfaction of the promise, shall be recognised as an adjustment to revenue at the date of the contract modification (that is, on a cumulative catch-up basis).

G23.83 As an alternative to the treatment set out in paragraph G23.82(a) and instead of terminating the existing contract, an NPO may choose to account for a contract modification as a separate contract if:

(a) the modification increases the scope of the existing contract because of additional goods or services promised that are distinct from those in the existing contract; and

(b) the modification increases the price of the existing contract by an amount of consideration that reflects the NPO’s stand-alone selling price of the additional goods or services and any appropriate adjustments to that price to reflect the circumstances of that contract.

Step 2 – Identify the promises in the contract

G23.84 At contract inception, an NPO shall assess the goods and services promised in a contract with a customer and shall identify each promise to transfer a distinct good or service (or a distinct bundle of goods or services).

G23.85 If an NPO is to transfer a series of distinct goods or services that are substantially the same, the series shall be accounted for as a single promise if both of the following criteria are met:

(a) each distinct good or service in the series that the NPO promises to transfer to the customer would meet the criteria in paragraph G23.142 to be satisfied over time; and

(b) in accordance with paragraphs G23.152-G23.157, the same method would be used to measure the NPO’s progress towards complete satisfaction of the promise to transfer each distinct good or service in the series to the customer.

G23.86 A contract with a customer generally explicitly states the goods or services that an NPO promises to transfer. However, promises may be implied by an NPO’s customary business practices, published policies or specific statements if these create a valid expectation of the customer that the NPO will transfer a good or service to the customer.

G23.87 Promises do not include activities that an NPO must undertake to fulfil a contract unless those activities directly transfer a good or service to the customer (for example, set-up activities and administrative tasks that do not transfer a good or service to the customer).

Distinct goods or services

G23.88 A good or service that is promised by an NPO to a customer is distinct if both of the following criteria are met:

(a) the customer can benefit from the good or service either on its own or together with other resources that are readily available to the customer (that is, the good or service is capable of being distinct); and

(b) the NPO’s obligation to transfer the good or service is separate from other obligations in the contract (see paragraph G23.91).

G23.89 The criterion in paragraph G23.88(a) is satisfied for goods or services that the NPO regularly sells separately.

G23.90 For the purpose of applying the criterion in paragraph G23.88(a), readily available resources are:

(a) goods or services sold separately (by the NPO or another entity); or
(b) goods or services that the customer has already obtained from the NPO (including goods or services transferred to the customer under the contract) or from other transactions or events.

G23.91 The purpose of the criterion in paragraph G23.88(b) is to determine if the nature of the NPO’s obligation, within the context of the contract, is to transfer the good or service individually rather than to transfer a combined item or items to which the good or service is an input. Factors that indicate that two or more goods or services promised in a contract are inputs to a combined item or items and are therefore not distinct include, but are not limited to, the following:

(a) the NPO provides a significant service of integrating the goods or services with other goods or services promised in the contract into a bundle of goods or services that represent the combined output or outputs for which the customer has contracted. In other words, the NPO is using the goods or services as inputs to produce or deliver the combined output or outputs specified by the customer. A combined output or outputs might include more than one phase, element or unit. An example is a construction contract when an NPO provides an integration (or contract management) service to manage and co-ordinate the various construction tasks necessary for the construction of an asset.

(b) one or more of the goods or services significantly modifies or customises, or is significantly modified or customised by, one or more of the other goods or services promised in the contract. An example is a software contract when an NPO promises to provide existing software and to customise that software, if the customisation service significantly modifies the software.

(c) the goods or services are highly interdependent or highly interrelated. In other words, each of the goods or services is significantly affected by one or more of the other goods or services in the contract. For example, in some cases, two or more goods or services are significantly affected by each other because an NPO would not be able to fulfil its promise by transferring each of the goods or services independently.

G23.92 If a good or service promised to a customer is not distinct, an NPO shall combine that good or service with other goods or services in the contract until it identifies a bundle of goods or services that is distinct. In some cases, this will result in the NPO accounting for all the goods or services in a contract as a single promise.

Warranties

G23.93 An NPO might provide a warranty in connection with the sale of a product (whether a good or service).

G23.94 If a customer has the option to purchase a warranty separately (that is, there is a choice of purchasing the product either with or without a warranty), the warranty is distinct because the NPO promises to provide a service to the customer in addition to the product that has the functionality described in the contract. In those circumstances, an NPO shall account for the warranty as a separate promise in accordance with paragraphs G23.84–G23.92.

G23.95 If a customer does not have the option to purchase a warranty separately, an NPO shall account for the warranty in accordance with Section 21 Provisions and contingencies unless:

(a) the warranty is significant to the contract; and

(b) the warranty, or part of the warranty, provides the customer with a service in addition to the assurance that the product complies with agreed-upon specifications.

G23.96 If the conditions in paragraph G23.95 are met, the service that the warranty provides to the customer is a separate promise. Therefore, the NPO shall allocate the transaction price to the product and the service. If a warranty provides the customer with both a service and the assurance that the product complies with agreed-upon specifications, but an NPO cannot reasonably account for these components separately, the NPO shall account for both the components together as a single promise.
Non-refundable upfront fees

G23.97 In some contracts, an NPO charges a customer a non-refundable upfront fee at or near contract inception. Examples include joining fees in health club membership contracts, set-up fees in some service contracts and initial fees in some supply contracts.

G23.98 Often a non-refundable upfront fee relates to an activity that the NPO is required to undertake to fulfil the contract but that activity does not directly transfer a good or service to the customer. If a non-refundable upfront fee relates to the transfer of a good or service, an NPO shall evaluate whether to account for the good or service as a separate promise in accordance with paragraphs G23.84–G23.92. Otherwise, the non-refundable upfront fee is included in the transaction price and allocated to the promises in the contract.

G23.99 An NPO may charge a non-refundable fee that gives customers an option to renew the contract on similar terms. Such options that provide a customer with a material right identified in accordance with paragraph G23.100 are accounted for in accordance with paragraph G23.104, instead of as separate promises in accordance with paragraphs G23.84–G23.92.

Customer options for additional goods or services

G23.100 In some contracts, customers are granted the option to acquire additional goods or services for free or at a discount. If the option provides the customer with a material right that it would not receive without entering into that contract, the option gives rise to a separate promise in addition to the other promises in the contract. If customers are granted the option to acquire additional goods or services at a price that would reflect the stand-alone selling prices for that good or service, the option does not provide the customer with a material right and does not give rise to a separate promise.

G23.101 Options that may provide a material right to customers include sales incentives, customer award credits (or points), contract renewal options or other discounts on future goods or services.

G23.102 If an option provides a material right to a customer, the customer is in effect paying the NPO in advance for future goods or services. As a consequence, the NPO recognises revenue when those future goods or services are transferred or when the option expires.

G23.103 An NPO shall account for an option that provides a material right to a customer as a separate promise only when the effect of doing so is significant to the accounting for the individual contract.

G23.104 If a customer is granted an option to renew a contract on similar terms (that is, provide goods or services that are similar to the original goods or services in the contract) and the option provides the customer with a material right, an NPO shall not account for the option as a separate promise. Instead, an NPO shall account for a contract that includes such an option based on:

(a) the expected contract term (that is, including expected renewal periods); and
(b) the corresponding expected consideration (that is, the consideration that the NPO expects to receive in exchange for the goods or services that the NPO expects to provide).

Step 3 – Determine the transaction price

G23.105 An NPO shall consider the terms of the contract and its customary business practices to determine the transaction price. The transaction price is the amount of consideration to which the NPO expects to be entitled in exchange for transferring goods or services promised to a customer, excluding amounts collected on behalf of third parties (for example, some sales taxes).

G23.106 For the purpose of determining the transaction price, an NPO shall assume that the goods or services will be transferred to the customer in accordance with the existing contract and that the contract will not be cancelled, modified or renewed, except for contract renewal options within the scope of paragraph G23.104.
Variable consideration

G23.107 If the consideration promised in a contract includes a variable amount (for example, because of some discounts, rebates, refunds, penalties or performance bonuses), an NPO shall estimate the variable amount in the transaction price that reflects the amount that is expected to become due, determined in accordance with paragraphs G23.108–G23.114.

G23.108 An NPO shall first estimate an amount of variable consideration by using either of the following methods:

(a) the expected value — the expected value is the sum of probability-weighted amounts in a range of possible consideration amounts. An expected value may be an appropriate estimate of the amount of variable consideration if an NPO has a large number of contracts with similar characteristics.

(b) the most likely amount — the most likely amount is the single most likely amount in a range of possible consideration amounts (that is, the single most likely outcome of the contract). The most likely amount may be an appropriate estimate of the amount of variable consideration if the contract has only two possible outcomes (for example, an NPO either achieves a performance bonus or does not).

G23.109 An NPO shall apply one method consistently throughout the contract when estimating the amount of variable consideration. The information that an NPO uses to estimate the amount of variable consideration would typically be similar to the information that the NPO’s management uses during the bid-and-proposal process and in establishing prices for the goods or services promised to the customer.

G23.110 An NPO shall include in the transaction price some or all of an amount of variable consideration estimated in accordance with paragraph G23.108 only to the extent that it is highly probable that this amount will become due when the uncertainty associated with the variable consideration is subsequently resolved.

G23.111 At the end of each reporting period, an NPO shall update the estimate of variable consideration included in the transaction price to reflect any relevant changes in circumstances. An NPO shall account for changes in the estimate of the transaction price in accordance with paragraphs G23.136–G23.138.

Sales-based or usage-based royalties

G23.112 An NPO shall not apply paragraphs G23.108–G23.111 to a sales-based or usage-based royalty provided in exchange for a licence of intellectual property when the licence of intellectual property is the sole or predominant item to which the royalty relates. Instead, an NPO shall recognise revenue for such royalties when (or as) the later of the following events occurs:

(a) the subsequent sale or usage takes place; and

(b) when (or as) the promise to which some or all of the sales-based or usage-based royalty has been allocated has been satisfied (or partially satisfied).

Refund liabilities

G23.113 If an NPO receives consideration from a customer and expects to refund some or all of that consideration to the customer, the NPO shall recognise as a refund liability the amount of consideration that the NPO reasonably expects to refund to the customer. For example, the terms of a fixed-price service contract may require a customer to pay upfront and provide the customer with a full refund of the amount paid if the customer is dissatisfied with the service at any time. At the end of each reporting period, an NPO shall update the estimate of the refund liability (and transaction price) to reflect any relevant changes in circumstances. An NPO shall account for changes in the estimate of the transaction price in accordance with paragraphs G23.136–G23.138.

G23.114 To account for a refund liability relating to a sale with a right of return, an NPO shall apply paragraphs G23.115–G23.120.
Sale with a right of return

G23.115 In some contracts, an NPO transfers control of a product to a customer and also grants the customer the right to return the product for various reasons (such as dissatisfaction with the product) and receive any combination of the following:

(a) a full or partial refund of any consideration paid;
(b) a credit that can be applied against amounts owed, or that will be owed, to the NPO; and
(c) another product in exchange.

G23.116 Exchanges by customers of one product for another of the same type, quality, condition and price (for example, one colour or size for another) are not considered returns for the purposes of applying the requirements in paragraphs G23.117–G23.120.

G23.117 To account for revenue for the transfer of products with a right of return (and for some services that are provided subject to a refund), an NPO shall recognise the following:

(a) revenue only for products expected not to be returned;
(b) a refund liability for consideration received (or receivable) for products expected to be returned; and
(c) a refund asset, classified as inventory, for products expected to be returned (and corresponding adjustment to cost of sales).

G23.118 To determine the amount of consideration that should be recognised in accordance with paragraph G23.117(a), an NPO shall recognise revenue only to the extent that it is highly probable that the products will not be returned. The amount of consideration received (or receivable) that is not recognised as revenue shall be recognised as a refund liability in accordance with paragraph G23.117(b).

G23.119 A refund asset recognised by an NPO in accordance with paragraph G23.117(c) shall initially be measured at the former carrying amount of the product (for example, inventory), less:

(a) any expected costs to recover those products; and
(b) allowances for potential decreases in the value to the NPO of those products (for example, because of damage, obsolescence or declining selling prices).

G23.120 At the end of each reporting period, an NPO shall update its assessment of products expected to be returned. The NPO shall:

(a) recognise changes in the amount of revenue recognised as adjustments to the refund liability, and vice versa; and
(b) recognise adjustments to the asset recognised for products expected to be returned in cost of sales.

G23.121 Contracts in which a customer may return a defective product in exchange for a functioning product shall be evaluated in accordance with the guidance on warranties in paragraphs G23.93–G23.96.

Time value of money

G23.122 If payment is deferred beyond normal business terms, the arrangement constitutes a financing transaction (see paragraph G11.16). An NPO shall adjust the promised amount of consideration for the effects of the time value of money and recognise the interest revenue in accordance with Section 11. The NPO shall present interest revenue separately from revenue from contracts with customers.

G23.123 An NPO need not adjust the promised amount of consideration for the effects of the time value of money if the NPO expects, at contract inception, that the period between when the NPO transfers the good or service promised to a customer and when the customer pays for that good or service will be one year or less.
Non-cash consideration

G23.124 To determine the transaction price for contracts in which a customer promises consideration in a form other than cash, an NPO shall measure the non-cash consideration (or promise of non-cash consideration) at fair value. If an NPO cannot reasonably estimate the fair value of the non-cash consideration, the NPO shall measure the consideration indirectly by reference to the stand-alone selling price of the goods or services promised to the customer (or class of customer) in exchange for the consideration.

Step 4 – Allocate the transaction price to the promises in the contract

G23.125 An NPO shall allocate the transaction price to each promise identified in the contract on a relative stand-alone selling price basis in accordance with G23.127–G23.131, unless allocating discounts or variable amounts on an alternative basis in accordance with paragraphs G23.132–G23.133.

G23.126 Paragraphs G23.127–G23.138 do not apply if:

(a) a contract contains a single promise; or
(b) all promises in a contract are satisfied at the same point in time in accordance with paragraph G23.147.

However, paragraph G23.135 applies if an NPO accounts for a series of distinct goods or services as a single promise in accordance with paragraph G23.85 and the consideration promised in the contract includes a variable amount.

Allocation based on stand-alone selling prices

G23.127 An NPO shall determine the stand-alone selling price at contract inception of the distinct good or service underlying each promise in the contract and allocate the transaction price in proportion to those stand-alone selling prices.

G23.128 The stand-alone selling price is the price at which an NPO would sell a good or service promised in a contract separately to a customer. The best evidence of a stand-alone selling price is the observable price of a good or service when the NPO sells that good or service separately in similar circumstances and to similar customers.

G23.129 If a stand-alone selling price is not directly observable, an NPO shall estimate it. When estimating a stand-alone selling price, an NPO shall take into account all information that is reasonably available to the NPO, including market conditions, NPO-specific factors and information about the customer or class of customer. An NPO shall apply estimation methods consistently in similar circumstances.

G23.130 Suitable estimation methods include, but are not limited to, the following:

(a) adjusted market assessment approach – an NPO could evaluate the market in which it sells goods or services and estimate the price that a customer in that market would be willing to pay for those goods or services. That approach might also include referring to prices from the NPO’s competitors for similar goods or services and adjusting those prices as necessary to reflect the NPO’s costs and margins.
(b) expected cost plus a margin approach – an NPO could forecast its expected costs of transferring the good or service promised to a customer and then add an appropriate margin for that good or service.
(c) residual approach – only if the stand-alone selling price of a good or service is highly variable or uncertain, then an NPO may estimate the stand-alone selling price by reference to the total transaction price less the sum of the observable or estimated stand-alone selling prices of other goods or services promised in the contract.
G23.131 When estimating the stand-alone selling price for a customer’s option to acquire additional goods or services identified in accordance with paragraphs G23.100–G23.104, an NPO shall reflect the discount that the customer would obtain when exercising the option, adjusted for both:

(a) any discount that the customer could receive without exercising the option; and
(b) the likelihood that the option will be exercised.

Allocation of a discount
G23.132 A customer receives a discount if the sum of the stand-alone selling prices of the goods or services promised in the contract exceeds the promised consideration.

G23.133 An NPO shall allocate a discount to the entire contract on a relative stand-alone selling price basis, unless this basis does not depict the amount of consideration to which the NPO expects to be entitled in exchange for transferring the goods or services promised to the customer. In that case, the NPO shall allocate the discount using a method that reflects such an amount.

Allocation of variable consideration
G23.134 An NPO shall allocate variable consideration in a transaction price to the entire contract on a relative stand-alone selling price basis, unless this basis does not depict the amount of consideration to which the NPO expects to be entitled in exchange for transferring the goods or services promised to the customer. In that case, the NPO shall allocate the variable consideration using a method that reflects such an amount.

G23.135 An NPO shall allocate variable consideration in a transaction price to all the distinct goods or services promised in a series of distinct goods or services that forms part of a single promise in accordance with paragraph G23.85, unless this basis does not depict the amount of consideration to which the NPO expects to be entitled in exchange for transferring the goods or services promised to the customer. In that case, the NPO shall allocate the variable consideration using a method that reflects such an amount.

Changes in the transaction price
G23.136 After contract inception, an NPO’s estimate of the amount of consideration to which it expects to be entitled in exchange for transferring goods or services may change. For example, an NPO updates its estimate of variable consideration included in the transaction price to reflect any relevant changes in circumstances.

G23.137 To account for changes in the estimate of the transaction price, an NPO shall allocate any changes to promises in the contract on the same basis as at contract inception. Consequently, an NPO shall not reallocate the transaction price to reflect changes in stand-alone selling prices after contract inception. Amounts allocated to a promise that has been satisfied shall be recognised as revenue, or as a reduction of revenue, in the period in which the estimate of the transaction price changes.

G23.138 A change in transaction price as a result of a contract modification arises from separate and subsequent negotiation between the parties to the contract that changes the enforceable rights and obligations of those parties. Such a change shall be accounted for in accordance with paragraphs G23.81–G23.83.

Step 5 – Recognise revenue when (or as) the NPO satisfies a promise
G23.139 An NPO shall recognise revenue when (or as) the NPO satisfies a promise to transfer a good or service or bundle of goods or services to a customer. A good or service is transferred when (or as) the customer obtains control of that good or service.

G23.140 For each promise identified in accordance with paragraphs G23.84–G23.92, an NPO shall determine at contract inception whether the promise is satisfied over time (in accordance with paragraphs G23.142–G23.146) or satisfied at a point in time (in accordance with paragraphs G23.147–G23.151).
G23.141 Goods and services are assets, even if only momentarily, when they are received and used (as in the case of many services). Control of an asset refers to the ability to direct the use of and obtain substantially all of the remaining economic benefits that may flow from the asset.

Promises satisfied over time

G23.142 An NPO transfers control of a good or service over time, and therefore satisfies a promise over time, if one of the following criteria is met:
   (a) the customer receives and consumes the benefits of the NPO’s performance as the NPO performs (for example, routine or recurring services such as a cleaning service);
   (b) the NPO’s work carried out to date would not need to be substantially reperformed if another entity were to fulfil the remainder of the promise to the customer (for example, a freight logistics contract);
   (c) the NPO’s performance creates or enhances an asset that the customer obtains control of as the asset is created or enhanced (for example, in the case of a construction contract in which the customer controls the work in progress); or
   (d) the NPO’s performance creates an asset that cannot be readily redirected to another customer and the customer is obliged to compensate the NPO for work carried out to date (see paragraphs G23.145–G23.146).

G23.143 An asset created by an NPO’s performance cannot be readily redirected to another customer if:
   (a) to sell the asset in its completed state, the NPO would either recognise a significant loss or incur significant costs to rework the asset (for example, if an asset was highly customised for a particular customer); or
   (b) substantial contractual restrictions exist that preclude the NPO from selling the asset to another customer during the creation or enhancement of that asset (for example, if the NPO is legally obliged to sell the asset to the customer).

G23.144 An assessment of whether an asset can be readily redirected to a customer is made at contract inception. Reassessment of whether an asset can be readily redirected to a customer shall occur only if there is a contract modification that substantially changes the promise.

G23.145 An obligation for a customer to compensate an NPO for work carried out to date may arise from specific terms in the contract or laws that apply to that contract. An obligation for a customer to compensate the NPO exists if the NPO has either:
   (a) a present unconditional right to payment for work carried out to date; or
   (b) an enforceable right to demand or retain payment for work carried out to date if the contract were to be terminated before completion for reasons other than the NPO’s failure to perform as promised.

G23.146 An amount that would compensate an NPO for work carried out to date would be an amount that approximates the selling price of the goods or services transferred to date (for example, recovery of the cost incurred by the NPO in satisfying the promise plus a reasonable profit margin).

Promises satisfied at a point in time

G23.147 If a promise is not satisfied over time, an NPO satisfies the promise at a point in time. To determine the point in time at which a customer obtains control of a promised asset, an NPO shall consider indicators of the transfer of control, which include, but are not limited to, the following:
   (a) the NPO has a present right to payment for the asset;
   (b) the customer has legal title to the asset;
   (c) the customer has physical possession of the asset;
   (d) the customer has the significant risks and rewards of ownership of the asset; and
   (e) the customer has accepted the asset (see paragraphs G23.150–G23.151).
G23.148 The existence or absence of an indicator in paragraph G23.147 does not determine whether control of a promised asset has transferred. For example, an NPO may retain legal title of an asset that a customer controls as protection against the customer's failure to pay. Conversely, in a consignment arrangement, the other party (for example, a dealer or distributor) has physical possession of a product that an NPO controls. An NPO shall not recognise revenue upon delivery of a product to another party if the delivered product is held on consignment.

G23.149 Indicators that an arrangement is a consignment arrangement include, but are not limited to, the following:

(a) the product is controlled by the NPO until a specified event occurs, such as the sale of the product to a customer of the distributor or until a specified period expires;
(b) the NPO is able to require the return of the product or transfer the product to a third party (such as another distributor); and
(c) the distributor does not have an unconditional obligation to pay for the product (although it might be required to pay a deposit).

Customer acceptance

G23.150 Customer acceptance clauses allow a customer to cancel a contract or require an NPO to take remedial action if a good or service does not meet agreed-upon specifications. If a contract includes a customer acceptance clause, an NPO shall consider the effect of the clause when evaluating when a customer obtains control of the asset.

G23.151 If an NPO can objectively determine (that is, determine based on information available to the NPO) that control of a good or service has been transferred to the customer in accordance with the agreed-upon specifications in the contract, then customer acceptance is a formality that would not affect the NPO's determination of when the customer has obtained control of the good or service. However, if an NPO cannot objectively determine that the good or service provided to the customer is in accordance with the agreed-upon specifications in the contract, then the NPO would not be able to conclude that the customer has obtained control until the NPO receives the customer's acceptance.

Measuring progress towards complete satisfaction of a promise

G23.152 For each promise satisfied over time in accordance with G23.142–G23.146, an NPO shall recognise revenue over time by measuring its progress towards complete satisfaction of that promise.

G23.153 An NPO shall select a method of measuring progress that depicts the NPO's performance in transferring control of goods or services promised to a customer (that is, the satisfaction of the promise). An NPO shall apply a single method of measuring progress for each promise satisfied over time and shall apply that method consistently to similar promises and in similar circumstances.

G23.154 At the end of each reporting period, an NPO shall remeasure its progress towards complete satisfaction of a promise satisfied over time and update its measure of progress. Such changes to an NPO's measure of progress shall be accounted for as a change in accounting estimate in accordance with paragraphs G10.18–G10.22.

G23.155 In determining a method of measuring progress, an NPO shall consider the nature of the good or service that the NPO will transfer to the customer. Appropriate methods of measuring progress include methods that recognise revenue based on:

(a) measurements of the value to the customer of the goods or services transferred to date relative to the remaining goods or services to be transferred under the contract (referred to as output methods); and
(b) the NPO's efforts or inputs to the satisfaction of a promise relative to the total expected inputs to satisfy the promise (referred to as input methods).
G23.156 Common methods, and circumstances when they may be appropriate, include:

(a) an output method based on surveys of work completed, when the surveys provide an objective measure of an NPO’s performance to date;
(b) an output method based on units delivered, when each item transfers an equal amount of value to the customer on delivery;
(c) an output method based on time elapsed, when control of the goods or services is transferred evenly over time;
(d) an input method based on time elapsed, when an NPO’s efforts or inputs are expended evenly throughout the performance period; and
(e) an input method based on costs incurred, when there is a relationship between costs incurred and the transfer of control of goods or services to a customer.

G23.157 If an NPO has a right to consideration from a customer in an amount that corresponds directly with the value to the customer of the NPO’s work to date (for example, a service contract in which an NPO bills a fixed amount for each hour of service provided), the NPO may recognise revenue in the amount to which the NPO has a right to invoice.

Licensing

G23.158 A licence establishes a customer’s rights to the intellectual property of an NPO (such as software, technology, trademarks, patents, franchises, music and motion picture films).

G23.159 If a contract with a customer includes a promise to grant a licence (or licences) in addition to other goods or services, an NPO shall apply paragraphs G23.84–G23.92 to identify each of the promises in the contract. If the promise to grant a licence is not distinct from the other goods or services in the contract, an NPO shall apply paragraphs G23.139–G23.151 to determine whether the promise (which includes the licence) is satisfied either over time or at a point in time. If the promise to grant a licence is distinct from the other goods or services in the contract, an NPO shall apply paragraphs G23.160–G23.165 to determine whether the promise is satisfied over time or satisfied at a point in time.

G23.160 To determine if the promise to grant a licence is satisfied over time or satisfied at a point in time, an NPO shall consider whether the nature of the NPO’s promise in granting the licence provides the customer with either:

(a) a right to access the NPO’s intellectual property as it exists throughout the licence period; or
(b) a right to use the NPO’s intellectual property as it exists at the point in time at which the licence is granted.

G23.161 A licence provides a customer with a right to access an NPO’s intellectual property if the NPO expects to undertake activities that either:

(a) will significantly affect the benefit the customer obtains from the intellectual property by changing the substance of the intellectual property; or
(b) could significantly affect the benefit the customer obtains from the intellectual property by directly exposing the customer to any positive or negative effects of those activities.

G23.162 An NPO’s expected activities may be included in the terms of a contract or arise from those activities that the customer reasonably expects the NPO will undertake. The assessment of whether a licence provides a customer with a right to access an NPO’s intellectual property shall not include activities that result in the transfer of a good or service to the customer as those activities occur.

G23.163 Activities that change the substance of the intellectual property include activities that change the intellectual property’s design, content or ability to perform a function or task (for example, development activities that change the content to which the customer has rights). Activities that expose the customer to positive or negative effects of those activities include activities that support or maintain the value of...
intellectual property (for example, ongoing activities that maintain the value of the brand to which the customer has rights).

G23.164 If the criteria in paragraph G23.161 are met, the promise to grant a licence is satisfied over time because a customer receives and consumes the benefits of an NPO's performance of providing access to its intellectual property as the NPO performs. An NPO shall apply paragraphs G23.152–G23.157 to select an appropriate method to measure its progress towards complete satisfaction of that promise.

G23.165 If the criteria in paragraph G23.161 are not met, the licence provides the customer with a right to use the NPO's intellectual property as it exists at the point in time at which the licence is granted. Types of licences that often provide customers with a right to use an NPO's intellectual property include licences relating to software, biological compounds or drug formulas, and completed media content (for example, motion picture films, television shows and music recordings). An NPO shall apply paragraphs G23.147–G23.151 to determine the point in time at which the licence transfers to the customer. Revenue cannot be recognised for a licence that provides a right to use the NPO's intellectual property before the beginning of the period during which the customer is able to use and benefit from the licence.

Contract costs

Costs to obtain a contract

G23.166 An NPO may incur costs in its effort to obtain a contract with a customer. An NPO shall recognise such costs as an asset if:

(a) the costs would not have been incurred by the NPO if the contract had not been obtained (for example, a sales commission payable on obtaining a contract); and

(b) the costs are expected to be recovered.

G23.167 If an NPO is unable to identify whether costs to obtain a contract meet the criteria in paragraph G23.166 without undue cost or effort, the NPO shall recognise such costs as an expense when incurred.

G23.168 Costs to obtain a contract that would have been incurred regardless of whether the contract was obtained shall be recognised as an expense when incurred, unless those costs are explicitly chargeable to the customer regardless of whether the contract is obtained.

G23.169 An NPO may recognise the costs to obtain a contract that meet the criteria in paragraph G23.166 as an expense when incurred if the amortisation period of the assets that the NPO otherwise would have recognised is one year or less.

Costs of fulfilling a contract

G23.170 An NPO shall account for the costs incurred in fulfilling a contract with a customer in accordance with the relevant section of INPAG for those costs (for example, Section 13 Inventories, Section 17 Property, plant and equipment, Section 18 Intangible assets other than goodwill).

G23.171 If the costs incurred in fulfilling a contract are not within the scope of another section of INPAG, an NPO shall recognise those costs as an asset if:

(a) the costs relate directly to a contract or to an anticipated contract that the NPO can specifically identify (for example, direct costs of a specific anticipated contract);

(b) the costs generate or enhance resources of the NPO that will be used in satisfying (or in continuing to satisfy) promises in the future; and

(c) the costs are expected to be recovered.

G23.172 An asset recognised in accordance with paragraph G23.171 gives rise to resources that the NPO will use to satisfy future promises in the contract. Conversely, costs that relate to promises that are satisfied
(or partially satisfied) shall be recognised as expenses when incurred, as those costs relate to past performance.

**Measurement after recognition**

G23.173 After initial recognition, an NPO shall measure assets recognised in accordance with paragraph G23.166 or G23.171 at cost less accumulated amortisation and any accumulated impairment losses.

G23.174 An asset recognised in accordance with paragraph G23.166 or G23.171 shall be amortised in accordance with the pattern of transfer and revenue recognition of the goods or services to which the asset relates.

G23.175 If an asset has been recognised in accordance with paragraph G23.166 or G23.171, an NPO shall follow Section 27 *Impairment of assets* for recognising and measuring the impairment of the asset. However, an NPO shall apply paragraph G23.176 instead of paragraphs 27.11–27.20 to estimate the **recoverable amount** of such an asset.

G23.176 The recoverable amount of an asset recognised in accordance with paragraph G23.166 or G23.171 is:

(a) the remaining amount of consideration that the NPO expects to receive in exchange for the goods or services to which the asset relates; less
(b) the costs that relate directly to providing those goods or services and that have not been recognised as expenses.

G23.177 In applying paragraph G23.176(a), an NPO shall determine the amount of consideration that the NPO expects to receive by adjusting the transaction price for any consideration received to date and the effects of the customer's credit risk.

**Contract balances**

G23.178 When either party to a contract has performed, an NPO shall present the contract in the **Statement of Financial Position** as a contract asset or a contract liability, depending on the relationship between:

(a) the NPO's performance in transferring goods or services to the customer; and
(b) the customer's payment.

G23.179 If an NPO has received consideration (or consideration is due) from the customer before the NPO transfers a good or service to the customer, the NPO shall recognise a contract liability when the payment is made or the payment is due (whichever is earlier). A contract liability is an NPO's obligation to transfer goods or services to a customer for which the NPO has received consideration (or the amount is due) from the customer. When (or as) the NPO transfers those goods or services to the customer, the NPO shall derecognise the contract liability (or part of a contract liability) and recognise revenue in accordance with paragraphs G23.139–G23.157.

G23.180 If an NPO transfers a good or service to a customer before the customer pays consideration (or before payment is due), the NPO shall recognise a contract asset, excluding any amounts presented as a receivable. A contract asset is an NPO's right to consideration in exchange for goods or services that the NPO has transferred to a customer when that right is conditioned on something other than the passage of time (for example, the NPO transferring other goods or services promised in the contract). When the customer pays the consideration (or the consideration becomes due), the NPO shall derecognise the contract asset. An NPO shall assess a contract asset for impairment, and recognise any impairment loss, in accordance with Section 11.

G23.181 A receivable is an NPO's right to consideration that is unconditional. A right to consideration is unconditional if only the passage of time is required before payment of that consideration is due. For example, an NPO would recognise a receivable if it has a present right to payment even though that amount may be subject to refund in the future.

G23.182 An NPO shall present contract assets and receivables separately.
Customers' unexercised rights

G23.183 When an NPO receives an upfront non-refundable payment that gives the customer a right to receive a good or service in the future (for example, a gift card), this gives rise to a contract liability. However, customers might not exercise all of their contractual rights. Those unexercised rights are often referred to as breakage.

G23.184 If an NPO expects to be entitled to a breakage amount in a contract liability, the NPO shall recognise the expected breakage amount as revenue in proportion to the pattern of rights exercised by the customer when those future goods or services are transferred. If an NPO does not expect to be entitled to a breakage amount, the NPO shall recognise the expected breakage amount as revenue when the likelihood of the customer exercising its remaining rights becomes remote.

Disclosures

G23.185 An NPO shall disclose the revenue it recognised from contracts with customers disaggregated into categories, showing separately, at a minimum, revenue arising from:

(a) the sale of goods;
(b) the rendering of services;
(c) royalties;
(d) commissions; and
(e) any other significant types of revenue from contracts with customers.

G23.186 Unless the amounts are presented separately in the Statement of Income and Expenses by applying other sections of INPAG, an NPO shall disclose the amount of impairment losses recognised (by applying Section 11) for the reporting period on any receivables or contract assets arising from an NPO’s contracts with customers, which the NPO shall disclose separately from impairment losses from other contracts for the reporting period.

G23.187 An NPO shall disclose:

(a) the opening and closing balances of receivables, contract assets and contract liabilities from contracts with customers if not otherwise separately presented or disclosed;
(b) revenue recognised in the reporting period that was included in the contract liability balance at the beginning of the period; and
(c) revenue recognised in the reporting period from promises satisfied or partially satisfied in previous periods (for example, changes in estimates of variable consideration).

G23.188 An NPO shall disclose information about its promises in contracts with customers, including a description of:

(a) when the NPO typically satisfies its promises (for example, upon shipment, upon delivery, as services are rendered or upon completion of service);
(b) the significant payment terms (for example, when payment is typically due, whether the contract includes a financing transaction, and whether the consideration amount is variable);
(c) obligations for returns, refunds and other similar obligations; and
(d) types of warranties and related obligations.

G23.189 For promises that an NPO satisfies over time, the NPO shall disclose the methods it used to recognise revenue – for example, a description of the output methods or input methods used – and how those methods are applied.

G23.190 An NPO shall provide a quantitative or qualitative explanation of the significance of unsatisfied promises and when they are expected to be satisfied. However, an NPO need not disclose such information for a promise if either of the following conditions is met:
(a) the promise is part of a contract that has an original expected duration of one year or less; or
(b) the NPO recognises revenue from the satisfaction of the promise in accordance with paragraph G23.157.

G23.191 An NPO shall disclose:

(a) the closing balances of assets recognised from the costs incurred to obtain or fulfil a contract with a customer (in accordance with paragraphs G23.166 and G23.171) by main category of asset (for example, costs to obtain contracts with customers, pre-contract costs and set-up costs); and
(b) the amount of amortisation and any impairment losses recognised in the reporting period.

G23.192 If an NPO elects to use the options in paragraph G23.123 (making no adjustment for the time value of money) or paragraph G23.169 (costs of obtaining a contract), the NPO shall disclose that fact.

G23.193 If an NPO recognises the costs to obtain a contract as expenses when incurred because it is unable to identify whether those costs meet the criteria in paragraph G23.166 without undue cost or effort, the NPO shall disclose that fact and the reasons why identifying the costs that meet the criteria in paragraph G23.166 would involve undue cost or effort.

**Application Guidance: Section 23 – Revenue**

**Scope of this section**

**Applying Parts I and II**

AG23.1 Whether to use Part I *Revenue from grants and donations* or Part II *Revenue from contracts with customers* depends on the economic substance of each revenue transaction (see Figure 23.1). Where, for example, an organisation provides an NPO with cash to support its provision of services, and:

- the NPO has control of the *economic resources* transferred because it has discretion over how the cash is utilised without requiring further authorisation from the cash providing organisation; and
- the cash providing organisation does not receive directly cash, a service, good or other asset in return by NPO;

the economic substance of this transaction means that the NPO should apply Part I for accounting for revenue from grants, donations and similar transfers.

AG23.2 In contrast, where, for example, an organisation asks an NPO to provide it with a service for a fee, the economic substance of this transaction involves the NPO directly providing a service to the organisation in exchange for consideration and means that the NPO should apply Part II for accounting for revenue from contracts with customers.
An NPO is receiving cash, or a service, good or other asset from another entity or individual without directly providing cash, or a service, good or other asset in return, or is directly providing a service, good or other asset to an entity or individual in exchange for an amount of cash, or a service, good or other asset.

**Figure 23.1: Decision tree illustrating which Part to apply to a revenue transaction**

1. **Apply Part I Revenue from grants and donations to entire transaction.**
   - **Yes**
     - Has the NPO received cash, or a service, good or other asset from another entity or individual without directly providing cash, or a service, good or other asset in return to the provider of those resources?
   - **No**

2. **Apply Part II Revenue from contracts with customers to entire transaction.**
   - **Yes**
     - Has the NPO directly provided a service, good or other asset to an entity or individual in exchange for an amount of cash, or a service, good or other asset that is of approximately equivalent value?
     - **No**

3. **Difference is due to a commercial discount**
   - Is the amount received materially below or above equivalent value and not a commercial discount?
   - **Below**
   - **Above**

**Subject to materiality and cost-benefit considerations**

- Apply Section 24 Part I Expenses on grants and donations in presenting the difference between the amount received and equivalent value.
- Apply Part II Revenue from contracts with customers to the remaining amount of transaction.
- Apply Part I Revenue from grants and donations to the difference between the amount received and equivalent value.
- Apply Part II Revenue from contracts with customers to remaining amount of the transaction.
Economic substance of transactions – the amounts given and received are not of approximately equivalent value

Revenue – an NPO provides services, goods or other assets and receives an amount of cash, services, goods or other assets that is not of approximately equivalent value

AG23.3 An NPO may receive an amount that is either higher or lower than the value of the services, goods or other assets provided by the NPO. Where this is the case, the NPO shall determine how best to account for the substance of the transaction in accordance with paragraphs AG23.4–AG23.9.

Value received is below approximately equivalent value

AG23.4 Where the amount received by an NPO is below approximately equivalent value, the NPO shall determine whether the lower amount is because the NPO has provided a commercial discount or has provided a grant or donation to the other party by considering the substance of the transaction.

AG23.5 Where the goods, services or other assets are being provided at a commercial discount, the NPO shall apply Part II Revenue from contracts with customers in accounting for the transaction.

AG23.6 When the NPO is providing a grant or donation along with the services, goods or other assets, the NPO shall:

(a) apply Part II Revenue from contracts with customers in accounting for the revenue; and
(b) present or disclose the amount of grants or donations in accordance with Section 24 Part I Expenses on grants and donations. The grant or donation is the difference between the fair value of the services, goods or other assets provided, or to be provided, and the amount received or receivable.

AG23.7 An NPO may elect not to reflect the intention to make a donation or grant where the difference is not material or the cost of identifying the donation or grant exceeds the likely benefit to users of the financial statements.

Value received is above approximately equivalent value

AG23.8 When the amount received by an NPO is above approximately equivalent value, the NPO is, in substance, receiving a grant or donation in addition to the payment it receives for providing services, goods or other assets. The NPO shall therefore recognise the fair value of the services or goods to be provided in accordance with Part II Revenue from contracts with customers and the remainder (the grant or donation received) in accordance with Part I Revenue from grants and donations.

AG23.9 An NPO may elect not to separately account for the amount of the grant or donation in accordance with Part II where the cumulative effect of not accounting for such grants and donations is not material, or the cost of identifying the grants and donations exceeds the likely benefit to users of the financial statements.

Expenses – an NPO acquires services, goods or other assets in exchange for an amount of cash, services, goods or other assets below approximately equivalent value

AG23.10 An NPO may acquire goods or services for an amount that is less than the fair value of the goods or services to be received. The NPO shall determine whether it has received a commercial discount or a grant or donation by considering the substance of the transaction. An NPO that acquires goods or services for more than the fair value of the goods or services is in substance providing a grant to the other entity and shall apply Part I of Section 24 in accounting for that grant.

AG23.11 When the substance of the transaction is that the NPO has received a commercial discount, the NPO shall account for the acquisition of the services, goods or other assets in accordance with the relevant section of INPAG.
AG23.12 When the substance of the transaction is that the NPO has received a grant or donation, the grant or donation shall be recognised in accordance with Part I Revenue from grants and donations. The NPO shall recognise the receipt of a grant or donation for the difference between the fair value of the services and goods received and the amount transferred. The NPO shall account for the element that relates to the acquisition of the services, goods or other assets in accordance with the relevant section of INPAG.

AG23.13 An NPO may elect not to reflect the grant or donation received where the difference is not material or the cost of identifying the grant or donation exceeds the likely benefit to users of the financial statements.

An NPO is acquiring services, goods or other assets in exchange for an amount of cash, services, goods or other assets

Has the NPO acquired services, goods or other assets for an amount that is materially less than the fair value of the services and goods received?

Yes

Is the difference due to the NPO receiving a commercial discount?

No

Apply Part I Revenue from grants and donations for the difference between fair value and amount paid and other sections for remaining amount of transaction.

Yes

Apply other sections relevant to the transaction.

No

Has the NPO acquired services, goods or other assets for an amount that is materially more than the fair value of the services and goods received?

Yes

Apply Section 24 Part I Expenses on grants and donations to the difference between the amount paid and the fair value of the services, goods or other assets acquired.

Apply other sections relevant to the transaction to the remaining amount (fair value) of the transaction.

No

Not within the scope of Section 23.
Apply other sections.
Part I – Revenue from grants and donations

Terminology
AG23.14 NPOs may receive funds in the form of grants, donations and similar income. Section 23 Part I uses the term grant to encompass any cash, service, good or other asset that is transferred by a grant provider to an NPO without the NPO directly providing any cash, service, good or other asset in return. A grant may therefore arise not only from items commonly described as grants but also items that may otherwise be described as donations, gifts and similar transfers of resources.

AG23.15 In Section 23 Part I, the term resource includes goods, services and other assets, which may encompass cash, financial assets or non-current assets. References to goods or services are to be read as incorporating references to cash and other assets.

Identifying whether an enforceable grant arrangement exists

Enforceability
AG23.16 EGAs can be evidenced in several ways (see paragraphs G23.3–G23.9). An EGA can be written, oral or implied by an NPO’s customary practices. The practices and processes for establishing EGAs vary across legal frameworks, jurisdictions, sectors and entities. In addition, they may vary within an NPO (for example, they may depend on the grant provider or the nature of the NPO’s promise in an EGA).

Enforceability through legal or equivalent means
AG23.17 For a grant arrangement to be enforceable, it must be enforceable through legal or equivalent means. In determining whether a grant arrangement is enforceable, the NPO considers the substance rather than the legal form of the arrangement. Whether a grant arrangement is enforceable is based on an NPO’s assessment of the ability to enforce the specified terms and conditions of the grant arrangement and the satisfaction of the other parties’ stated obligations.

AG23.18 Enforceability can arise from various mechanisms. While these may be through legal systems, there may also be alternative processes that have equivalent effect, depending on the parties involved in the EGA and the jurisdictions in which they are based.

AG23.19 For example, in some jurisdictions, NPOs may be subject to a form of regulatory oversight, which regardless of the legal basis of an individual agreement require NPOs to act in accordance with defined rules and directives or potentially face censure. This broader regulatory oversight may provide the parties to a grant arrangement with the effective means to enforce the arrangement through appeal to a regulator, even if the specific agreement is not legally enforceable.

AG23.20 Generally, the ability of a grant provider to reduce or withhold future funding will not on its own be a valid enforcement mechanism. This is because there is no present obligation on the grant provider to provide the future funding, and the NPO has no right to receive future funding.

AG23.21 However, if the grant recipient is presently entitled to future funding through another EGA, and the terms of this other arrangement specifically allow the grant provider to reduce future funding if other EGAs are breached, this could be a valid enforcement mechanism. This will require the NPO to apply judgement based on the facts and circumstances, including any past history of funding being reduced where a grant provider had the right to do so.

AG23.22 Enforceability can arise from various mechanisms. An NPO should objectively assess all relevant factors at the transaction date to determine whether an arrangement is enforceable. In some jurisdictions, public sector entities are not legally able to enter into agreements in their own name, only that of the government. Alternative processes with equivalent effect to legal arrangements such as executive
orders or ministerial directives are in place to ensure that agreed-upon obligations in an arrangement are enforceable.

AG23.23 For an arrangement to be enforceable through 'equivalent means', the presence of an enforcement mechanism outside the legal system that is similar to the force of law without being legal in nature is required. This enforcement mechanism should:

(a) establish the right of the grant provider to obligate the NPO to complete the agreed obligation or be subject to remedies for non-completion; and

(b) establish the right of the NPO to obligate the grant provider to pay the agreed consideration.

**Enforceability as a result of rights and obligations**

AG23.24 An EGA includes both rights and obligations that are enforceable for both parties. Each party's enforceable right(s) and obligation(s) within the grant arrangement are interdependent and inseparable. This means that the grant provider has the ability to obligate the NPO recipient to complete the agreed obligation or be subject to remedies for not doing so, and the NPO is able to obligate the grant provider to pay the agreed grant amount even if these are rarely, if ever, exercised.

AG23.25 For a grant arrangement to be enforceable, the grant provider must be able to determine whether the NPO has complied with its obligations. If the obligations imposed on the NPO are not sufficiently specific, the grant provider will not be able to make this determination, and the grant agreement will not be an enforceable grant agreement.

AG23.26 For an NPO's obligations to be sufficiently specific for the grant arrangement to be enforceable, the terms of the agreement will refer to the outcomes the NPO has undertaken to achieve, the activities the NPO is required to carry out, or the goods or services that the NPO will either transfer to service recipients or use internally.

AG23.27 A general statement of intent by a grant provider that it may transfer cash, or deliver goods, services or other assets in a certain way is not usually in and of itself an enforceable arrangement. As the declaration is a general statement of intent, it will not create an EGA between a grant provider and an NPO under which both parties have rights and obligations.

AG23.28 The NPO's assessment of enforceability occurs at inception and subsequently when a significant external change indicates that there may be a change in the enforceability of that arrangement.

AG23.29 An arrangement is enforceable if the agreement includes:

(a) clearly specified rights and obligations for each involved party; and

(b) remedies for non-completion by each involved party, which can be enforced through the identified enforcement mechanisms.

**Accounting for grant arrangements**

AG23.30 An NPO will apply the recognition and measurement criteria in Section 23 Part I as follows:

(a) grant revenue from transactions without EGAs (whether an agreement is in place or not) is accounted for by applying paragraphs G23.32–G23.40; and

(b) grant revenue from transactions with EGAs is accounted for by applying paragraphs G23.41–G23.60.

AG23.31 Figure 23.2 below summarises the process for determining how to apply Part I of this section.
Step 1 – Identify if there is an enforceable grant arrangement
Is there a written, oral or similar agreement that confers both rights and obligations on both the NPO and the party providing resources? Is the agreement enforceable through legal or equivalent means, and does the agreement specify the outcomes to be achieved, activities to be carried out, or the goods and other assets that NPO will transfer to service recipients or use internally?

- **No**
  - Recognise revenue when the NPO controls the resources in the transaction and these can be measured reliably.
  - This will be when the NPO receives the amount or, if earlier, when the amount becomes receivable.
  - Revenue is recognised gross and is not reduced for any provisions or liabilities that rarely may exist. These are accounted for by applying other sections of INPAG.

- **Yes** – **enforceable grant arrangement exists**. Apply remainder of the 5 step model.

  Step 2 – Identify enforceable grant obligations in the enforceable grant arrangement. Assess what outcomes are to be achieved, what activities are to be carried out, or the goods and other assets that the NPO will transfer to service recipients or use internally exist and identify each distinct EGO.

  Step 3 – Determine the transaction amount. Consider the terms of the EGA and the NPO’s customary practices to determine the transaction amount (that is, the total grant amount).

  Step 4 – Allocate the transaction amount to enforceable grant obligations. Allocate the transaction amount to each EGO identified in the EGA on a relative stand-alone value basis. [Required where more than one EGO exists in an EGA].

  Step 5 – Recognise revenue when (or as) the NPO satisfies an enforceable grant obligation.
  If an amount is received for an EGO that has not yet been satisfied, the NPO shall recognise an EGA liability for the amount received. The NPO shall recognise revenue and derecognise the EGA liability as or when the EGO is satisfied.
  If the NPO is entitled to an amount for meeting (or partly meeting) an EGO but this has yet to be received, the NPO shall recognise revenue and an EGA asset for the amount the NPO is entitled to. The NPO shall derecognise the EGA asset as the amount is received.
  Revenue is presented as Income with restrictions in the Statement of Income and Expenses.

The NPO applies Section 36 to determine whether revenue is presented as income without restrictions or income with restrictions in the Statement of Income and Expenses.
Revenue from other funding arrangements

AG23.32 In circumstances where an OFA is required before resources can be transferred, an NPO will not identify the resources as controlled until such time as the NPO has a right to those resources. This is because the NPO cannot exclude or regulate the access of the grant provider to the resources to be transferred. The NPO will need to establish that it has control of the resources before it can recognise them as an asset.

Recognising revenue when an other funding arrangement becomes receivable

AG23.33 An NPO recognises revenue from an OFA when the resource is received or receivable, whichever is earlier. In most cases, this will be when the resource is received, as the NPO will usually not have a right to the resource prior to that point.

AG23.34 However, where an OFA is in place, it is possible that this will give the NPO the right to the resource at an earlier point. This right may enable the NPO to recognise revenue even if it has not already received the resource.

Services in-kind that are critical to an NPO’s mission

AG23.35 Services in-kind are critical to an NPO’s mission when, without those services, an NPO would have to materially reduce the level of its activities. An example would include an NPO whose mission is to provide a telephone counselling service, and where the majority of the counsellors are volunteers.

AG23.36 Administrative services such as accountancy or legal services provided to an NPO are not critical to an NPO’s mission unless such services are used to provide advice to service recipients.

Revenue from transactions with enforceable grant arrangements

Applying guidance in Part II to enforceable grant arrangements

AG23.37 Part I and Part II of Section 23 both use the same 5 step model. Part I specifies the requirements for a simplified version of the 5 step model that is expected to apply to most EGAs. When an EGA includes more complex arrangements, the NPO will apply the relevant guidance from Part II (see paragraph G23.40).

AG23.38 Different terminology is used in Part I and Part II when applying the 5 step model as set out in paragraph G23.11. Other key differences are:

(a) the 5 step model only applies to grants with an EGA, but applies to all contracts with customers; and

(b) the term ‘EGOs’ (in EGAs) has a wider meaning than the term ‘promises’ (in a contract with customers). A promise in a contract with a customer always involves the NPO transferring goods and services to the purchaser (or an entity or individual specified by the purchaser). An EGO might involve an NPO transferring goods or services but can also involve objectives to be achieved or activities to be carried out by the NPO that do not involve the transfer of goods or services to another party.

AG23.39 In applying the requirements of Part II to an EGA:

(a) references to the ‘contract’ are to be read as the ‘EGA’;

(b) references to ‘promises’ are to be read as ‘EGOs’;

(c) references to ‘goods or services [transferred/to be transferred]’ are to be read as ‘EGOs [satisfied/to be satisfied]’;

(d) references to ‘customer’ are to be read as ‘grant provider’;

(e) references to ‘transaction price’ are to be read as ‘transaction amount’; and

(f) references to ‘consideration’ are to be read as the ‘grant’ or ‘grant amount’.

92
AG23.40 The following table provides additional guidance on how the Part II requirements should be applied to a Part I EGA.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Application to enforceable grant arrangements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Criteria to be met before accounting for an EGA (paragraphs G23.74–G23.79)</td>
<td>These paragraphs specify criteria that can be applied to determine if an enforceable grant agreement is within the scope of Part I if the NPO is uncertain about this. In applying the guidance, references to ‘commercial substance’ are to be read as ‘economic substance’. NPOs should assume that the EGA will have economic substance, as the risk, timing or amount of the NPO’s future cash flows is expected to change as a result of the EGA.</td>
</tr>
<tr>
<td>Combination of EGAs (paragraph G23.80)</td>
<td>If an NPO has entered into two or more EGAs with the same grant provider at or near the same time, an NPO may apply this paragraph in determining if the EGAs should be combined. In applying this guidance, the reference to ‘price’ should be read as a the ‘grant in respect of an EGA’.</td>
</tr>
<tr>
<td>Modifications to EGAs (paragraphs G23.81–G23.83)</td>
<td>An NPO shall apply these paragraphs if the terms of the enforceable grant agreement are changed. In applying this guidance, the reference to ‘stand-alone selling price’ shall be read as the ‘stand-alone value’.</td>
</tr>
<tr>
<td>Variable grant amounts (paragraphs G23.107–G23.111)</td>
<td>An NPO shall apply these paragraphs if the amount of the grant contains a variable element (for example, if an NPO receives a grant to carry out a vaccination programme, and an additional amount will be paid if the number of people vaccinated exceeds a threshold set in the enforceable grant agreement).</td>
</tr>
<tr>
<td>Time value of money (paragraphs G23.122–G23.123)</td>
<td>An NPO shall apply these paragraphs where the time difference between the grant being paid and the EGO being satisfied is more than one year. In applying this guidance, an NPO shall allow for grants being paid in advance as well as after the enforceable obligation is satisfied, which can give rise to an interest expense.</td>
</tr>
<tr>
<td>Non-cash grant amounts (paragraph G23.124)</td>
<td>An NPO shall apply this paragraph in measuring any non-cash grant amounts it receives under an EGA. Where an NPO cannot reasonably estimate the fair value of the non-cash item, it shall measure the grant amount indirectly by reference to the estimated cost of satisfying the EGO(s) for which the non-cash grant amount has been provided.</td>
</tr>
<tr>
<td>Allocation of variable grant amounts (paragraphs G23.134–G23.135)</td>
<td>Where an NPO has identified variable grant amounts by applying the guidance in paragraphs G23.107–G23.111, it shall apply these paragraphs in allocating the variable grant amounts to EGOs.</td>
</tr>
<tr>
<td>Changes in transaction amount (paragraphs G23.136–G23.138)</td>
<td>An NPO shall apply these paragraphs where its estimate of the total grant amount changes – for example, where its estimate of variable grant amounts changes.</td>
</tr>
</tbody>
</table>
**Topic** | **Application to enforceable grant arrangements**
---|---
EGOs satisfied over time or at a point in time *(paragraphs G23.140–G23.151)* | Guidance in determining whether an EGO is satisfied over time or at a point in time can be found in G23.140–G23.149. This guidance is most likely to be relevant to EGOs that require the NPO to transfer services or goods to service recipients. Additional guidance for other types of EGO can be found in paragraphs AG23.50–AG23.51.

Measuring progress towards complete satisfaction of an EGO *(paragraphs G23.152–G23.157)* | For EGOs satisfied over time, an NPO may apply the guidance in these paragraphs in selecting an appropriate method of measuring progress towards complete satisfaction of an EGO. In applying these paragraphs, references to ‘value to the customer’ are to be read as ‘proportion of the activities undertaken’ or ‘cost of the goods or services provided’ as appropriate. Additional guidance is provided in paragraphs AG23.52–AG23.61.

**Multi-year grants**

AG23.41 Multi-year arrangements generally involve the provision of resources over multiple years for a specific purpose or project. Funding may occur at multiple dates throughout a year and/or across multiple years. Multi-year arrangements can exist where there is an EGA or where there is an OFA.

AG23.42 While such grant arrangements are longer term, the NPO shall consider whether an inflow, or a right to a future inflow, of resources gives rise to an asset, applying the same principles as an EGA that covers a single period. Revenue recognition is assessed independently from the timing of funding.

AG23.43 In accordance with paragraph G23.12, when an EGA is wholly unsatisfied, an NPO shall not recognise any asset, liability or revenue associated with the EGA.

AG23.44 Similarly, where a part of the EGA remains equally unsatisfied, the NPO shall not recognise any asset, liability or revenue for the equally unperformed parts of the EGA. Such equally unsatisfied parts of the EGA continue to constitute a single asset or liability that is measured at zero.

AG23.45 In considering whether any expected inflow of resources in subsequent years meets the definition of an asset, the NPO shall consider whether that part of an EGA relating to the subsequent years is equally unsatisfied. Where this is the case, the NPO shall not recognise any asset, liability or revenue for the equally unperformed parts of the EGA.

**Capital grants**

AG23.46 A capital grant arises when a grant provider transfers or is obligated to transfer cash or another asset to an NPO that requires the NPO to acquire or construct a non-current asset that the NPO will then control.

AG23.47 An NPO shall follow the same approach to recognising revenue involving a capital grant as with any other revenue.

AG23.48 Capital grants typically include substantial details about the various stages in the project (eg conception and planning, design, procurement, construction, etc.). These details are likely to mean that the capital grant is part of an EGA and can provide a basis for identifying the EGOs.

AG23.49 An NPO shall identify the individual EGOs and determine for each the appropriate measure of progress. Revenue recognition is independent of the timing of the receipt of resources from the grant provider for each EGO.
Enforceable grant obligations over time or at a point in time

AG23.50 EGOs to achieve an objective or carry out an activity may be satisfied over time or at a point in time. An EGO is satisfied over time if the NPO is entitled to grant revenue for the activities it has carried out to date; otherwise, the EGO is satisfied at a point in time.

AG23.51 For example, an NPO may have an obligation to deliver 1,000 vaccinations by the end of the project:

(a) if the NPO is entitled to grant revenue for the vaccinations it has delivered, even if this is fewer than the agreed number, the NPO is entitled to grant revenue for the activities carried out to date, and the EGO is satisfied over time.

(b) if the NPO is only entitled to grant revenue if the full 1,000 vaccinations are delivered, and the NPO is not entitled to revenue if fewer vaccinations are delivered, the NPO is not entitled to grant revenue for the activities carried out to date and the EGO is satisfied at a point in time, as the final vaccination is delivered.

Methods for measuring progress towards complete satisfaction of an enforceable grant obligation

Output methods

AG23.52 Output methods recognise revenue on the basis of direct measurements of the proportion of the specified objectives achieved or specified activities carried out. Output methods include methods such as surveys of performance completed to date, appraisals of results achieved, milestones reached, and units produced or units delivered.

AG23.53 A specified activity is a particular action, stated in an EGA, that the NPO must perform and that the grant provider can compel the NPO to perform.

AG23.54 When an NPO evaluates whether to apply an output method to measure its progress, the NPO shall consider whether the output selected would faithfully depict the NPO's performance towards complete satisfaction of the EGO. An output method would not provide a faithful depiction of the NPO's performance if the output selected would fail to measure some of the promises to use resources in the specified manner. For example, output methods based on activity would not faithfully depict an NPO's performance in satisfying an EGO if the expected cost of delivering remaining activity is significantly higher than that of the activity delivered to date.

AG23.55 Where an NPO is required to transfer a distinct good or service to a service recipient, and the NPO has a right to grant revenue that corresponds directly with the value of the EGOs completed, the NPO may recognise revenue in the amount to which it has an entitlement.

AG23.56 The disadvantages of output methods are that the outputs used to measure progress may not be directly observable and the information required to apply them may not be available to an NPO without undue cost. Therefore, an input method may be necessary.

Input methods

AG23.57 Input methods recognise revenue on the basis of the NPO's efforts or inputs (for example, resources consumed, labour hours expended, eligible expenditures incurred or time elapsed) relative to the total expected inputs required to satisfy that EGO. If the NPO's efforts or inputs are expended evenly throughout the performance period, it may be appropriate for the NPO to recognise revenue on a straight-line basis.

AG23.58 The grant provider needs to be able to confirm that the NPO's EGOs in the EGA have been satisfied in the specified manner. The NPO needs to keep appropriate documentation, which may include records of eligible expenditures incurred by the NPO that directly relate to the NPO's satisfaction of the EGOs.
in the specified manner. The records on eligible expenditures will show the cost of the inputs required to satisfy the EGOs.

AG23.59 A shortcoming of input methods is that there may not be a direct relationship between an NPO's inputs and the satisfaction of its EGOs. Therefore, an NPO shall exclude from an input method the effects of any inputs that do not affect the NPO's performance in satisfying its EGOs. For instance, a cost-based input method may require an adjustment to the measure of progress in the following circumstances:

(a) when a cost incurred does not contribute to an NPO's progress in satisfying the EGO. For example, an NPO would not recognise revenue on the basis of costs that include impairments as a result of damage to assets being used to meet the EGO.

(b) when a cost incurred is not proportionate to the NPO's progress in satisfying the EGO. In those circumstances, the best depiction of the NPO's performance may be to adjust the input method to recognise revenue only to the extent of that cost incurred. For example, where the costs of goods are the major cost of satisfying the EGO, a faithful depiction of an NPO's performance might be to recognise revenue proportionate to the cost of those goods.

Donor, reporting, assurance or audit requirements

AG23.60 Reporting, assurance or audit requirements may allow a grant provider to cancel an EGA or require an NPO to take remedial action if the NPO does not comply with the requirements of the EGA. If an EGA includes reporting, assurance or audit requirements, an NPO shall consider the effect of the requirements when evaluating when an EGO is satisfied.

AG23.61 If an NPO can objectively determine (that is, determine based on information available to the NPO) that the EGO has been satisfied in accordance with the terms of the EGA, then the reporting, assurance or audit requirements are a formality that would not affect the NPO's determination of when the enforceable compliance obligation has been satisfied. However, if an NPO cannot objectively determine that the EGO has been satisfied in accordance with the terms of the EGA, then the NPO would not be able to conclude that the EGO has been satisfied until the NPO receives the grant provider's confirmation that the requirements have been met. An NPO only recognises revenue when an EGO has been satisfied.

Part II – Revenue from contracts with customers

Applying the revenue recognition model to simpler transactions

AG23.62 Part II establishes the revenue recognition model for all revenue from contracts with customers. It includes requirements for the complex features of revenue transactions that are not relevant for many NPO revenue transactions. For simpler transactions, NPOs need only apply the relevant requirements. The following table provides guidance on when certain requirements will not be relevant to simpler transactions.

<table>
<thead>
<tr>
<th>Paragraphs</th>
<th>Guidance</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Step 1 – Identify the contract(s) with a customer</strong></td>
<td></td>
</tr>
<tr>
<td>G23.74–G23.83</td>
<td>For many simpler transactions, the contract will be the sale to the customer, and no further analysis is required for Step 1. The paragraphs below relate to specific circumstances and need only be applied where relevant.</td>
</tr>
<tr>
<td>G23.80</td>
<td>Combination of contracts – consider only where two or more contracts are entered into at or near the same time with the same customer (or a related party).</td>
</tr>
<tr>
<td>G23.81–G23.83</td>
<td>Contract modification – only applies where the original contract has been amended.</td>
</tr>
</tbody>
</table>
**Step 2 – Identify the promises in the contract**

<table>
<thead>
<tr>
<th>Paragraphs</th>
<th>Guidance</th>
</tr>
</thead>
<tbody>
<tr>
<td>G23.84–G23.104</td>
<td>For many simpler transactions, the contract will include a single promise (for example, to transfer goods to a customer), and no further analysis is required for Step 2. The paragraphs below relate to specific circumstances and need only be applied where relevant.</td>
</tr>
<tr>
<td>G23.93–G23.96</td>
<td>Warranties – requirements are only relevant when the contract includes a warranty.</td>
</tr>
<tr>
<td>G23.97–G23.99</td>
<td>Non-refundable upfront fees – requirements are only relevant when the NPO charges non-refundable upfront fees (for example, joining fees in respect of memberships).</td>
</tr>
<tr>
<td>G23.100–G23.104</td>
<td>Customer options for additional goods or services – requirements only apply where the original contract gives the customer the option to acquire additional goods or services for free or at a discount.</td>
</tr>
</tbody>
</table>

**Step 3 – Determine the transaction price**

<table>
<thead>
<tr>
<th>Paragraphs</th>
<th>Guidance</th>
</tr>
</thead>
<tbody>
<tr>
<td>G23.105–G23.124</td>
<td>The transaction price is the total amount expected to be received under the contract. For many simpler transactions, the transaction price will be the amount paid at the time of the sale, and no further analysis is required for Step 3. For more complex transactions, especially those transactions that include variable consideration, reference should be made to the detailed requirements. The paragraphs below relate to specific circumstances and need only be applied where relevant.</td>
</tr>
<tr>
<td>G23.112</td>
<td>Only relevant when the contract includes sales-based or usage-based royalties.</td>
</tr>
<tr>
<td>G23.113–G23.114</td>
<td>Only relevant when the contract includes refund liabilities (for example, where the terms of a fixed-price service contract require a customer to pay upfront and provide the customer with a full refund of the amount paid if the customer is dissatisfied with the service at any time).</td>
</tr>
<tr>
<td>G23.115–G23.121</td>
<td>Only relevant when the contract gives the customer a right to return purchased goods for a full or partial refund, a credit or other goods in exchange.</td>
</tr>
</tbody>
</table>

**Step 4 – Allocate the transaction price to the promises in the contract**

<table>
<thead>
<tr>
<th>Paragraphs</th>
<th>Guidance</th>
</tr>
</thead>
<tbody>
<tr>
<td>G23.125–G23.138</td>
<td>For many simpler transactions, the contract will include a single promise (for example, to transfer goods to a customer), and the full transaction price is allocated to that one promise. No further analysis is required for Step 4. The paragraphs below relate to specific circumstances and need only be applied where relevant.</td>
</tr>
<tr>
<td>G23.132–G23.133</td>
<td>Only relevant where the contract includes a discount and more than one promise.</td>
</tr>
<tr>
<td>G23.134–G23.135</td>
<td>Only relevant where the contract includes variable consideration and more than one promise.</td>
</tr>
<tr>
<td>G23.136–G23.138</td>
<td>Only relevant where there is a change in the transaction price (for example, a revised estimate of variable consideration between the commencement and completion of the contract). This will not affect many simpler transactions such as sales in shops.</td>
</tr>
</tbody>
</table>

**Step 5 – Recognise revenue when (or as) the NPO satisfies a promise**

<table>
<thead>
<tr>
<th>Paragraphs</th>
<th>Guidance</th>
</tr>
</thead>
<tbody>
<tr>
<td>G23.139–G23.165</td>
<td>For many simpler transactions, revenue will be recognised at a point in time, and the more complex requirements relating to recognition of revenue over time will not be relevant.</td>
</tr>
</tbody>
</table>
Comparison of Section 23 with the *IFRS for SMEs* Accounting Standard

Section 23 comprises two parts, with a preface that explains the structure of the section and contains content that is common to both parts. Part I is new material for NPOs that has been informed by IPSAS 47 *Revenue*. Part II is based on the *IFRS for SMEs* Accounting Standard. The main differences between Section 23 of the draft Third edition of the *IFRS for SMEs* Accounting Standard and Section 23 Part II of INPAG are as follows:

- INPAG Section 23 Part II uses different terminology, referring specifically to NPOs rather than entities more generally.
- The scope section has been relocated to the preface, as the scope applies to both Part I and Part II.
- The overview of the 5 step revenue recognition model is included in the preface, as the 5 step model is being used to recognise EGAs that have characteristics in common with contracts with customers.
- The accounting for principal-agent arrangements is included in the preface, as it shares principles in common with revenue from grants and donations.
- INPAG Section 23 Part II provides simplified guidance where a contract with a customer contains only one promise, to simplify application by NPOs.
- Section 24 of the *IFRS for SMEs* Accounting Standard (covering government grants) is not included in INPAG, as government grants are covered by Section 23 Part I of INPAG, which covers a wider range of non-exchange revenue. The recognition and measurement principles are included in the preface.

Comparison of Section 23 with IPSAS 47

Section 23 comprises two parts, with a preface that explains the structure of the section and contains content that is common to both parts. Part II is based on the *IFRS for SMEs* Accounting Standard. Part I is new material for NPOs that has been informed by IPSAS 47 *Revenue*. The main differences to IPSAS 47 are as follows:

- INPAG Section 23 Part I uses different terminology, referring specifically to NPOs rather than entities more generally.
- INPAG Section 23 Part I uses the term EGA, which is drawn from the broader type of arrangement in IPSAS 47 (binding arrangement), except that an EGA specifically excludes contracts with customers.
- INPAG Section 23 Part I uses the term EGO, which is similar to a compliance obligation in IPSAS 47, except that it does not apply to requirements to transfer goods or services to a customer. The definition of an EGO specifically mentions outcomes and activities, whereas the definition of a compliance obligation in IPSAS 47 is more focused on goods and services.
- INPAG Section 23 Part I includes permitted exceptions for gifts in kind. It allows certain types of donated inventory to not be recognised until it is sold, used or distributed to service recipients. These permitted exceptions provide pragmatic relief for NPOs in recognising and measuring these kinds of inventories.
- INPAG Section 23 Part I requires services in-kind that are critical to an NPO's mission to be recognised, whereas this is not required by IPSAS 47.
- The disclosure requirements in INPAG Section 23 Part I are reduced from those in IPSAS 47. The disclosure requirements included in Part I of Section 23 are based on those in the draft Third edition of the *IFRS for SMEs* Accounting Standard. These have been adapted for the NPO context and specifically the inclusion of grants. Additional disclosures have been included where there is no equivalent requirement in the *IFRS for SMEs* Accounting Standard – for example, OFAs.
## Specific matter for comment

### Question 4: Revenue

<table>
<thead>
<tr>
<th>(a) Section 23 Part I and Section 24 Part I introduce new terminology relating to grant arrangements. Do you agree with the terms EGA and EGO and their definitions? If not, what alternative terms would you propose to achieve the same meaning? What are the practical or other considerations arising from these definitions, if any?</th>

---

3 Sections 23 and 24 both include this question, which you can answer under either section or cover the grantor and grantee perspectives separately.
Section 24 – Expenses

Section 24 of the IFRS for SMEs Accounting Standard has been removed, with the equivalent guidance in Section 23 Part I Revenue from grants and donations. A new Section 24 is being developed to address NPO-specific issues related to expenses.

G24.0 This section provides guidance on the accounting for expenses incurred by NPOs on operating activities. It comprises three parts:

- Part I Expenses on grants and donations
- Part II Classification of expenses [ED3]
- Part III Fundraising costs [ED3]

Part I – Expenses on grants and donations

Scope

G24.1 This section specifies the accounting for expenses on grants, donations and similar transfers (hereafter called grant expenses) by grant-providing NPOs. It does not relate to the receipt of grants, donations and similar transfers from another entity as a grant recipient, which is covered in Section 23 Part I Revenue from grants and donations.

G24.2 A grant expense is an expense arising from a transaction in which a grant-providing NPO provides, or is obliged to provide, assistance to a grant recipient (which may be an entity or individual) by transferring cash or a service, good or other asset to that grant recipient without directly receiving any cash, service, good or other asset in return.

Enforceable grant arrangements

G24.3 An enforceable grant arrangement (EGA) is a grant arrangement that confers both rights and obligations, enforceable through legal or equivalent means, on both the parties to the grant arrangement. This could be through a written grant agreement but could also be through an oral agreement or implied by a grant-providing NPO’s or a sector’s customary practices. In determining whether a grant arrangement is enforceable, a grant-providing NPO must consider the substance rather than the legal form of the grant arrangement. This will require the consideration of the grant-providing NPO’s, the grant recipient’s and the sector’s customary practices.

G24.4 An EGA must specify the outcome that the grant recipient undertakes to achieve with the transferred resources, the activities that the grant recipient undertakes to carry out with the transferred resources, or the distinct services, goods and other assets the grant recipient undertakes to use the resources for, either internally or to transfer externally. Such requirements on the use of the resources create an enforceable grant obligation (EGO).

G24.5 An arrangement with a grant recipient that is not enforceable through legal or equivalent means and does not give both parties rights is categorised as an other funding arrangement (OFA). An other funding arrangement may be a written grant agreement, an oral agreement or implied by customary practices. An OFA also includes those situations where a grant-providing NPO transfers resources to a grant recipient without there being any agreed or implied arrangement in place. An OFA may constrain the grant recipient’s use of the resources, but this will not be sufficient to create an EGO. This is because an OFA does not confer both rights and obligations, enforceable through legal or equivalent means, on both the parties to the arrangement.

G24.6 Grant expenses may therefore arise from transactions involving:

(a) OFAs; and
(b) EGAs.
Grant expenses from transactions that are other funding arrangements

Recognition and measurement

G24.7  For OFAs that do not contain an obligation but where the grant-providing NPO nevertheless transfers resources to the grant recipient, a grant expense shall only be recognised when the grant-providing NPO transfers the resources to the grant recipient and no longer controls the resources in the transaction.

G24.8  Where there is an obligation established by legal or similar means (hereafter a legal obligation) to transfer resources that results in the recognition of a liability, or there is a constructive obligation to transfer resources that results in the recognition of a provision in accordance with paragraph G21.4 of Section 21 Provisions and contingencies, a grant expense shall be recognised at the same time as the liability or provision. The subsequent transfer of resources will settle the recognised liability or provision.

G24.9  Where a grant-providing NPO recognises a grant expense because it has ceased to control the resources in the transaction, the grant expense shall be measured at the carrying amount of the previously controlled resources.

G24.10  Where a grant-providing NPO recognises a grant expense because a legal or constructive obligation has been established, the grant expense and liability shall be initially and subsequently measured at the amount of the resources that the grant-providing NPO is obliged to transfer to the grant recipient. The provision shall be initially and subsequently measured in accordance with paragraphs G21.8-G21.12.

G24.11  Any requirements that constrain the use of the resources provided to the grant recipient may give rise to an asset for the grant-providing NPO if at a future date the grant recipient does not satisfy those requirements. For example, if a grant recipient fails to use a grant within the timeframe specified in the OFA, an obligation to refund all or part of the grant may arise at the end of the specified time period. The grant-providing NPO will only recognise an asset where the failure to satisfy the requirements creates a present obligation for the grant recipient.

G24.12  After the inception of an OFA, a grant-providing NPO shall account for any financial asset that arises as a result of a grant recipient’s failure to comply with a requirement that constrains the use of resources in accordance with Section 11 Financial instruments as at the date at which the failure to meet the requirement is confirmed. If not a financial asset, the asset shall be accounted for in accordance with the relevant section of INPAG and shall subsequently be assessed for impairment in accordance with Section 27 Impairment of assets.

Grant expenses from transactions with enforceable grant arrangements

Recognition and measurement

G24.13  Where there is an EGA, a grant-providing NPO shall consider its rights in the EGA. The grant-providing NPO shall identify each distinct grant fulfilment right (or series of grant fulfilment rights that have substantially similar characteristics) that creates an EGO for the grant recipient.

G24.14  The substance of the EGA may mean that effectively there is only one grant fulfilment right and one EGO.

G24.15  The grant-providing NPO will need to consider the terms of the EGA to determine the stand-alone amount that it is obliged to pay the grant recipient for meeting each distinct grant fulfilment right. If there is only one grant fulfilment right, this will be the total amount of the grant.

G24.16  An EGA will be wholly unsatisfied if the grant-providing NPO has not yet transferred and is not yet obligated to transfer an amount to the grant recipient and the grant recipient has not yet met any of the stated EGOs in the EGA. This is similar to an executory contract in which neither party has fulfilled
any of its obligations. If an EGA is wholly unsatisfied, the grant-providing NPO does not recognise any expense, asset or liability associated with the EGA. Only as one or both parties begin to fulfil their obligations will the grant-providing NPO begin to recognise transactions associated with the EGA.

G24.17 The grant-providing NPO should consider carefully whether there are requirements attached to enforceable grant obligations that enable it to realistically avoid the transfer of resources.

G24.18 If the grant-providing NPO concludes that realistically it cannot avoid the transfer of resources, the grant-providing NPO shall recognise a liability and a grant expense measured at the stand-alone amount of the distinct grant fulfilment right associated with the EGO.

G24.19 If the grant-providing NPO concludes that there are requirements attached to EGOs that enable it to realistically avoid the transfer of resources, the recognition of assets, liabilities and expenses will commence only when one party to the EGA starts to meet the requirements related to their obligations under the arrangement.

G24.20 A grant expense is recognised by the grant-providing NPO when a grant fulfilment right is met. The grant expense is measured at the stand-alone amount of the grant fulfilment right that has been met.

G24.21 If a grant-providing NPO transfers resources prior to the grant recipient meeting its EGO, the grant-providing NPO recognises a prepayment asset and derecognises the transferred resources. The prepayment asset is measured at the total carrying amount of the resources that have been transferred. A grant-providing NPO shall recognise the grant expense when the grant recipient meets the EGO to which the grant fulfilment right relates and derecognise the prepayment asset.

G24.22 Conversely, when a grant recipient satisfies an EGO prior to the grant-providing NPO transferring resources, the grant-providing NPO recognises a liability and an expense. The grant-providing NPO shall measure the liability and grant expense at the total carrying amount of the resources that the grant-providing NPO is obligated to transfer to the grant recipient for meeting its grant fulfilment right. Where the obligation is to transfer cash, this will be a financial liability measured at amortised cost in accordance with paragraph G11.17 of Section 11 Financial instruments.

Variable consideration

G24.23 The amount that the grant-providing NPO is obliged to transfer to the grant recipient may vary for items such as incentives, penalties or other similar items. It may also vary if the grant-providing NPO’s obligation to provide the resources is contingent on the occurrence or non-occurrence of a future event. For example, an additional amount of funds may become payable to the grant recipient if it meets its EGOs in the EGA within a specified period. This is known as variable consideration.

G24.24 Variable consideration in an EGA may result in a liability of uncertain timing or amount that meets the definition of a provision in Section 21 Provisions and contingencies. If the grant-providing NPO has determined that it is more likely than not that a present obligation exists for the payment of variable consideration, the grant-providing NPO shall estimate an amount of variable consideration that is initially and subsequently measured in accordance with paragraphs G21.8–G21.12 of Section 21 Provisions and contingencies.

Changes to the amount that the grant-providing NPO is obligated to transfer and modification of the enforceable grant arrangement

G24.25 After the inception of the EGA, the amount that a grant-providing NPO is obligated to transfer to the grant recipient in the EGA can change for various reasons, including the resolution of uncertain events or other changes in circumstances. Any changes to the amounts allocated to a grant fulfilment right that was previously met shall be recognised as an additional expense, or as a reduction of an expense, in the period in which the amount that the grant-providing NPO is obligated to transfer changes.

G24.26 An EGA may also be modified though a change in the rights and obligations that are approved by the parties to the arrangement. The grant-providing NPO shall determine the accumulated grant expense
to be recognised as at the date of the modification by revising its estimates of the amount it is obliged to transfer for each grant fulfilment right met. The grant-providing NPO shall also determine the amount allocated to met and unmet grant fulfilment rights. The difference between the accumulated grant expense determined as at the date of the modification and the accumulated grant expense previously recognised shall be recognised in surplus or deficit as at the date of the modification.

Reclassification and impairment of a prepayment asset

G24.27 After the recognition of a prepayment asset, the grant recipient may become unable or unwilling to satisfy its EGOs under the EGA. Where the grant-providing NPO has an enforceable and unconditional right to a refund or return of the previously transferred resources arising from the terms of the EGA, the grant-providing NPO shall reclassify the prepayment asset to a financial asset. Subsequent to its reclassification, the grant-providing NPO shall measure the financial asset in accordance with Section 11 Financial instruments.

G24.28 If the grant prepayment asset is not reclassified to a financial asset as set out in paragraph G24.27 because the terms of the EGA, the legal system in the jurisdiction and/or other circumstances do not support the recognition of a financial asset, the grant-providing NPO shall assess the prepayment asset for impairment in accordance with Section 27 Impairment of assets.

Principal versus agent considerations

G24.29 An important question for the recognition and measurement of grant expenses is whether the grant-providing NPO controls the economic resources that are transferred to the grant recipient. A grant-providing NPO controls the economic resources by having the present ability to direct the use of the economic resources and to obtain the economic benefits or service potential that may flow from them. If the grant-providing NPO controls the economic resources, it will be a principal in the transaction, and the recognition and measurement requirements of paragraphs G24.7–G24.26 will apply to grant expenses. This is the case even if the grant-providing NPO is subject to an EGA with the grant recipient that imposes obligations upon the grant-providing NPO. This is because as a principal the grant-providing NPO will ultimately have discretion over the amounts and timing of the transaction, the identity of the grant recipient and the requirements under which the transaction is to occur.

G24.30 Where a grant-providing NPO does not control the economic resources, it is likely to be acting as an agent for another entity. This situation may occur, for example, when a grant-providing NPO operates in a jurisdiction where another entity does not. By agreement, the grant-providing NPO may administer the other entity’s funds on its behalf and transfer the other entity’s funds to a grant recipient. As an agent, the grant-providing NPO will be acting for the other entity's purpose and objectives, in accordance with the instructions or directions of the other entity, and will have no discretion about the use to which the resources are put.

G24.31 Where a grant-providing NPO is acting as an agent and is transferring cash or other assets to a grant recipient on behalf of another entity, a grant expense is not recognised in accordance with the recognition and measurement requirements of paragraphs G24.7–G24.26. The costs incurred in the administration of the agency arrangement by the grant-providing NPO will be recognised as an expense. Similarly any assets related to the agency arrangement such as funding provided to the grant-providing NPO by the other entity do not form part of the grant-providing NPO's assets or income. Any income due to the grant-providing NPO for administering the agency arrangement will be recognised in accordance with Section 23 Revenue. Any funds that the grant-providing NPO is holding as an agent will be presented and disclosed in accordance with paragraph G24.41.

Disclosures

G24.32 A grant-providing NPO shall disclose sufficient information to enable the users of the general purpose financial reports to understand the nature, amount, timing and uncertainty arising from grant
expenses. This will include a description of the purpose of the material EGAs or OFAs that have led to the recognition of grant expenses, the existence and potential consequences of variable consideration, significant payment terms and the nature of the resources that have been or will be transferred.

G24.33 A grant-providing NPO is not required to disclose sensitive information about grant expenses. A disclosure is sensitive if it would compromise the safety or wellbeing of individuals working/volunteering for and with the grant-providing NPO, or those to whom it provides cash, goods, services and other assets and/or could prejudice the ability of the grant-providing NPO or grant recipient to deliver its mission or purpose. Sensitive information may include but is not limited to the name of grant recipients, the geographic locations in which they operate, and the third parties to whom they provide services, goods and other assets.

G24.34 A grant-providing NPO will remain in compliance with the requirements of INPAG where this exception is utilised. When a sensitive information exception is used, the grant-providing NPO should disclose that its note related to grant expenses has been prepared in accordance with the requirement of this paragraph but is not required to provide any information that would have the effect of highlighting the nature of the sensitive information.

G24.35 A grant-providing NPO shall present information related to grant expenses that does not result in sensitive information. The exception to not disclose sensitive information cannot be used by a grant-providing NPO to avoid disclosures that might identify failures in organisational governance, performance or financial management that could, for example, have a negative impact on its ability to fundraise its operations.

Analysis of grant expenses

G24.36 A grant-providing NPO shall disclose the amount recognised in the Statement of Income and Expenses as grant expenses and provide an analysis of grant expenses in accordance with Section 24 Part II Classification of expenses (to be provided in ED 3).

Grant expense from revenue classified to funds with restrictions

G24.37 Where a grant-providing NPO has financed a grant expense with revenue provided to it that has been classified to funds with restrictions, the grant expense will be presented as a restricted expense in the Statement of Income and Expenses in accordance with Section 36 Fund accounting [ED3].

Prepayment assets and financial assets

G24.38 Where a grant-providing NPO has recognised prepayment assets in accordance with paragraph G24.21, this shall be presented separately in the Statement of Financial Position. The grant-providing NPO shall disclose information that enables users to understand significant judgements, and changes in significant judgements, that the grant-providing NPO has made regarding the recognition of prepayment assets related to grants and any significant risks and uncertainties relating to their realisation.

G24.39 Where a grant prepayment asset has been reclassified to a financial asset in accordance with paragraph G24.27, the grant-providing NPO shall provide disclosure in accordance with paragraphs G11.51–G11.53 of Section 11 Financial instruments.

Liabilities and provisions

G24.38 Where a grant-providing NPO has recognised liabilities in accordance with paragraph G24.22, these will be presented in the Statement of Financial Position. If the liability is an obligation to transfer cash, the disclosure requirements of paragraphs G11.51–G11.53 in Section 11 Financial instruments for payables are applicable. If not an obligation to transfer cash, the grant-providing NPO will need to provide users with information on the nature of the obligation and the resources that will need to be transferred to satisfy the obligation relevant to the non-cash liability.
If variable consideration in an EGA has resulted in the recognition of a provision in accordance with paragraph G24.24, or there is an OFA and a grant payment strait is recognised for a constructive obligation in accordance with paragraph G24.8 and G24.10, then the disclosure requirements of G21.15 in Section 21 Provisions and contingencies are applicable.

Contingent liabilities

A grant-providing NPO shall disclose the existence of commitments to provide grant funding that are not recognised as liabilities or provisions when it is sufficiently clear that a payment is possible but not probable. These grant funding commitments will be disclosed as a contingent liability in accordance with the requirements of G21.15 in Section 21 Provisions and contingencies.

Principal versus agent considerations

Where a grant-providing NPO has acted as an agent during the reporting period, it must disclose in a note to the accounts:

a) an analysis of funds received and paid by the grant-providing NPO as an agent;
b) details of any balances held as an agent at the reporting date;
c) the name and objects of the entity on whose behalf the balances are held and why the grant-providing NPO is acting as an agent on their behalf;
d) details of any balances outstanding between any participating consortium members for which the grant-providing NPO is administratively responsible;
e) where funds have been held as agent for related parties, the grant-providing NPO must make the required disclosures for related parties; and
f) details of the arrangements for safe custody and segregation of funds and other assets from the grant-providing NPO's own assets.

Part II Classification of expenses (to be provided as part of ED3)

Part III Fundraising costs (to be provided as part of ED3)

Application Guidance – Section 24 Expenses

Part I – Expenses on grants and donations

Grant expenses and procurement of services, goods and other assets

A grant expense is recognised when a grant-providing NPO does not directly receive any cash, service, good or other asset from a grant recipient as a result of the transfer of cash, service, good or other asset that it has or is obliged to make. A grant expense for a grant-providing NPO may therefore arise not only from items commonly described as grants but also items that may otherwise be described as donations, gifts and similar transfers of resources. These transactions may also be commonly referred to as non-exchange, non-reciprocal or non-requited transfers and expenses.

Where a grant-providing NPO directly receives cash, services, goods or other assets from a grant recipient as a consequence of the transfer of resources, then this may indicate a procurement relationship and a purchase.

There may be situations where the services, goods or other assets directly received by the grant-providing NPO are not of equivalent value to the resources it transferred to the grant recipient. This could range from a nominal amount to an amount that is only just below equivalent value. Where this is the case, the grant-providing NPO must determine how best to reflect the substance of the
transaction. Where material, this may involve recognising part of the transaction as a grant expense and part as the procurement of services, goods or other assets. Additional guidance can be found in Section 23 Revenue AG23.3–AG23.13.

Recognition and measurement of grant expenses

AG24.4 The recognition and measurement principles for grant expenses are based on whether a transaction is from an EGA or an OFA. As noted in G24.3, an EGA is a grant arrangement that confers both rights and obligations, enforceable through legal or equivalent means, on both the parties to the grant arrangement, ie the grant-providing NPO and the grant recipient. By contrast, as noted in G24.5, an arrangement with a grant recipient that is not enforceable through legal or equivalent means and does not give both parties both rights and obligations and is an OFA. Figure 24.1 can be used by grant-providing NPOs to determine which recognition and measurement principles apply.

Figure 24.1: The recognition and measurement of grant expenses

Is there a written, oral or similar agreement where both the grant-providing NPO and the grant recipient have rights and obligations? Is the agreement enforceable through legal or equivalent means?

Yes

EGA exists. Grant-providing NPO follows guidance for grant expenses arising from transactions with EGAs (paragraphs G24.13–G24.28)

No

Absent an obligation to transfer resources, a grant expense is recognised when the grant-providing NPO transfers the resources and its control of the resources ceases, measured at the value of the transferred resources.

If a legal obligation exists that requires the recognition of a liability, a grant expense is recognised at the same measurement and the subsequent transfer of resources settles the liability.

If a constructive obligation exists that requires the recognition of a constraint, a grant expense is recognised at the same measurement and the subsequent transfer of resources settles the recognised provision.

Account for any financial asset that arises as a result of a grant recipient’s failure to comply with a constraint in accordance with Section 11 Financial instruments as at the date at which the failure to satisfy the constraint is confirmed. If not a financial asset, any asset accounted for in accordance with another section shall subsequently be assessed for impairment in accordance with Section 27 Impairment of assets.

Issues related to other funding arrangements

Constructive obligations

AG24.5 A constructive obligation is an obligation that can arise from an NPO’s customary practices, published policies or specific statements if the NPO has no practical ability to act in a manner inconsistent with those practices, policies or statements (see paragraph G2.61 in Section 2 Concepts and pervasive principles).
Constraints

AG24.6 There may be requirements that place constraints on the grant recipient's ability to use resources provided to it as part of a grant arrangement. Some constraints will be very specific and be part of an EGA that creates rights and obligations for both the grant-providing NPO and the grant recipient (see G24.4). Constraints that do not meet these requirements and are part of an OFA will not give rise to a present obligation for the grant recipient when resources are transferred to it. If the grant recipient does not subsequently satisfy a requirement that places constraints on the use of resources, this may give rise to an obligation to the grant recipient and a potential asset for the grant-provider at a future date.

Issues related to enforceable grant arrangements

Enforceability in an enforceable grant arrangement

AG24.7 To be an EGA, the interdependent rights and obligations in the grant arrangement must be enforceable. This means that the grant-providing NPO is able to require the grant recipient to complete the agreed obligations or be subject to remedies for not doing so, and the grant recipient is able to require the grant-providing NPO to transfer the amount agreed. A grant arrangement will be an EGA if there is the ability to exercise these rights, even if in practice they are never or rarely utilised.

AG24.8 Enforceability can arise from various mechanisms. While these may be through legal systems, there may also be alternative processes that have equivalent effect, depending on the parties involved in the EGA and the jurisdictions in which they are based.

AG24.9 For example, in some jurisdictions, NPOs may be subject to a form of regulatory oversight which, regardless of the legal basis of an individual agreement, require NPOs to act in accordance with defined rules and directives or potentially face censure. This broader regulatory oversight may provide the parties to a grant arrangement with the effective means to enforce the arrangement through appeal to a regulator, even if the specific agreement is not legally enforceable.

AG24.10 It is also the case that in some jurisdictions, public sector entities are not permitted to contract in their own name, but alternative processes with equivalent effect to legal arrangements such as executive orders or ministerial directives are in place to ensure that agreed-upon obligations in an arrangement are enforceable. A grant-providing NPO may not therefore be able to enter into a legally enforceable arrangement with a public sector entity that is a grant recipient, but the alternative processes will provide for enforceability of the EGA.

AG24.11 A key issue for grant-providing NPOs is whether the ability to reduce or withhold future funding from a grant recipient can be considered an enforcement mechanism. Generally, the ability to reduce or withhold future funding will not on its own be a valid enforcement mechanism for an EGA because there is no present obligation on the grant-providing NPO to provide this future funding.

AG24.12 However, if there is interdependency with other EGAs held by the grant recipient, the potential for the grant-providing NPO to reduce future funding could be a valid enforcement mechanism. For example, if the grant recipient is presently entitled to funding in the future through another EGA, and the terms of this other EGA specifically allow for a reduction in funding if other EGAs are breached, then the potential reduction in funding could be a valid enforcement mechanism. This will require the grant-providing NPO to apply judgement based on the facts and circumstances, including any past history of reducing funding where it has had the right to do so.

Customary practices

AG24.13 A further key issue is the extent to which in some circumstances enforceability may arise from a grant-providing NPO’s, a grant recipient’s or a sector’s customary practices.

AG24.14 Where a grant is made to a public sector body, enforceability may arise because public bodies, through long-established policies and practices, create a legitimate expectation of how they will
behave. Ultimately, however, these legitimate expectations will usually be enforceable through legal mechanisms such as a court ruling that mean a public body will be required to act in a certain way.

AG24.15 For NPOs, the customary practices may be that all parties to the agreement will abide by the obligations in the agreement. However, these expectations may not ultimately be legally enforceable, as the parties may not be subject to court rulings to uphold such expectations. Enforceability in such circumstances will be dependent on the existence of equivalent means such as an appeal to a regulator or withholding or reducing future funding through a linked EGA.

General statements of intent and oral agreements

AG24.16 A general statement of intent by a grant-providing NPO that it may transfer cash or deliver goods, services or other assets in a certain way is not usually in and of itself an enforceable arrangement. As the declaration is a general statement of intent, it will not create an EGA between a grant-providing NPO and a grant recipient under which both parties have rights and obligations. It may, however, give rise to a constructive obligation in accordance with G21.4 of Section 21 Provisions and contingencies.

AG24.17 This general statement of intent differs from an oral agreement between a grant-providing NPO and grant recipient. Oral agreements will arise from serious discussions between the parties where an offer has been made by the grant-providing NPO to transfer cash, goods, services or another asset to a grant recipient, who has accepted the requirement to meet an obligation. Depending on the substance of the agreement, an oral agreement may be sufficient to create an EGA, particularly in those jurisdictions where oral agreements can be legally binding.

Grant fulfilment rights and enforceable grant obligations in enforceable grant arrangements

AG24.18 Figure 24.2 provides an overview of the recognition and measurement principles for grant expenses from transactions with EGAs. As highlighted, identifying grant fulfilment rights and EGOs, determining their stand-alone amounts and understanding when they have been met are key issues where an EGA exists.
Grant fulfilment rights, enforceable grant obligations and other constraints

**AG24.19** An EGA must have at least one grant fulfilment right held by the grant-providing NPO and one EGO required of the grant recipient. A grant fulfilment right is an enforceable right to have the grant recipient satisfy its obligations in the EGA. It arises when the grant-providing NPO has transferred resources to the grant recipient prior to the grant recipient satisfying its EGOs within the EGA.

**AG24.20** EGOs are distinct undertakings by the grant recipient to achieve a specified outcome, carry out a specified activity, or use resources internally for distinct services, goods or other assets or to transfer distinct services, goods, cash or other assets to a purchaser or third-party recipient in order that the grant-providing NPO's grant fulfilment right is met. For example, an entity whose purpose is to improve educational outcomes in a community may have an EGO of supporting a named group of children with their annual school fees by paying those school fees on behalf of those children, with funds provided by the grant-providing NPO. Or an individual in receipt of financial support may have an EGO to spend cash provided to them by the grant-providing NPO only on purchasing food products.
AG24.21 It may not always be easy to determine distinct grant fulfilment rights and EGOs within an EGA. A grant fulfilment right is a distinct right that can be enforced separately from other rights in the EGA. Where a right is not distinct, the grant-providing NPO may aggregate related rights until this produces a distinct grant fulfilment right that can be enforced separately. This may result in the EGA having only one grant fulfilment right and one EGO.

AG24.22 Requirements that constrain the use of resources by the grant recipient to its overall mission or a general purpose but do not specify separate outcomes, activities or distinct services, goods and other assets will usually be insufficient to create an EGO for the grant recipient. As these requirements do not give rise to a present obligation for the grant recipient when resources are transferred, they do not result in a distinct grant fulfilment right for the grant-providing NPO.

AG24.23 For example, if the grant recipient is the entity in paragraph AG24.20 that exists to improve educational outcomes in a society, a grant-providing NPO may include a requirement that cash provided to the grant recipient must be spent on the broad promotion of education. Or if the grant recipient is the individual in paragraph AG24.20, a grant-providing NPO may include a requirement that cash provided to them must be spent on improving their family’s welfare. In these cases, the outcomes, activities and the collective set of services, goods or other assets for internal use or external transfer will not be distinct, even if they will be incremental to what would have been available without the resource transfer from the grant-providing NPO. Requirements that impose constraints that do not lead to distinct grant fulfilment rights and EGOs, and hence are not part of an EGA, shall be accounted for in accordance with paragraphs G24.11–G24.12, being a constraint within an OFA rather than an EGA.

Payment of grants over more than one financial year

AG24.24 Even where an EGA is payable over a period of more than one year, a liability and grant expense must be recognised by the grant-providing NPO for the total amount of the resources that must be transferred under the EGA to the grant recipient for the obligations it has met. The requirement to recognise the liability and the grant expense only exists where the grant-providing NPO has a present obligation to transfer resources at the reporting date.

AG24.25 Where payments for later years are subject to the grant recipient meeting obligations that have not yet been met, the grant-providing NPO may under the terms of the EGA be able recognise the amounts transferred in each year. This is because the grant-providing NPO does not have a present obligation to transfer all the resources at the reporting date.

AG24.26 Where the EGA provides the grant-providing NPO with the discretion to avoid grant expenditure, a liability should not be recognised because the grant-providing NPO does not have a present obligation to transfer the resources. For example, a grant-providing NPO may have made a commitment to provide grant funding over a number of years but have the right to terminate the EGA. If the real possibility of termination is clear, then a constructive liability is unlikely to arise for payments related to periods after the review date.

AG24.27 Alternatively, if there are no requirements in the EGA that enable the grant-providing NPO to realistically avoid the transfer of resources, a grant payment liability and grant expense must be recognised for the present value of the full grant payment amount, even if payment will occur over a number of financial years. The time adjusted value of the full grant payment is only required where the amount is material.

Grant recipient obligations

AG24.28 EGAs may contain rights and obligations that are outside of the control of the grant-providing NPO. For example, a transfer of resources by a grant-providing NPO may be subject to the grant recipient obtaining match funding. Where obligations are outside the control of the grant-providing NPO, it should assess whether or not the transfer of resources is probable. For example, if the grant recipient has notified the grant-providing NPO that it is in advanced stages with another entity to secure match funding, this may mean that the requirement to transfer resources is likely to occur. Where the grant-providing NPO determines that the transfer of resources is probable, it should follow the requirements
of paragraph G21.4 of Section 21 *Provisions and contingencies*, with any grant payment provision initially and subsequently measured in accordance with paragraphs G21.8–G21.12.

**Performance-related rights and obligations**

AG24.29 EGAs may contain performance-related rights and obligations, such as payment being conditional on a specific level of service or varying depending on units of output. Where this results in variable consideration, this can result in a liability of uncertain timing or amount for the grant-providing NPO. Such a liability meets the definition of a provision and shall initially and subsequently be measured in accordance with paragraphs G21.8–G21.12 of Section 21 *Provisions and contingencies*.

**Capital grants**

AG24.30 An EGA that requires the grant recipient to acquire or construct a non-current asset that the grant recipient will then control is a **capital grant**.

AG24.31 The same approach to recognising a grant expense involving a capital grant is followed as with any other grant expense. A transfer of cash from a grant-providing NPO to a grant recipient to acquire or construct a non-current asset results in the grant-providing NPO derecognising cash and recognising a prepayment asset. This prepayment asset represents the grant-providing NPO’s enforceable right to have the grant recipient satisfy its obligation to purchase or acquire the non-current asset. This prepayment asset is derecognised and a grant expense recognised when the grant fulfilment rights are met in accordance with the terms of the EGA. The grant-providing NPO would therefore derecognise the prepayment asset and recognise a grant expense, as the non-current asset is constructed or acquired by the grant recipient.

AG24.32 Where the grant recipient constructs a non-current asset, the grant fulfilment right will be met as the asset is being built, with a grant expense recognised by the grant-providing NPO based on an agreed methodology for the measurement of progress made by the grant recipient.

AG24.33 If the grant recipient acquires or constructs the asset prior to the transfer of resources from the grant-providing NPO, the grant-providing NPO will recognise a liability and a grant expense for its obligation to transfer resources. This could be for the full amount (if the asset is acquired) or based on the extent of progress towards the construction of the asset. The liability will be derecognised once the transfer of resources is made from the grant-providing NPO to the grant recipient.

AG24.34 If the grant recipient subsequently disposes of an acquired asset or constructed asset against the terms of the EGA, the grant-providing NPO shall consider whether it has an enforceable unconditional right to a refund of the value of transferred resources and apply paragraphs G24.27–G24.28.

AG24.35 Where this right exists, the grant-providing NPO shall recognise and measure a financial asset in accordance with Section 11 *Financial instruments* and a reduction in grant expenses. Note, however, that such a right might indicate an agency relationship if the grant-providing NPO had retained control of the asset. In this case, no grant expense should have been initially recognised by the grant-providing NPO and instead the grant-providing NPO should have recognised the construction or purchase of its own non-current asset.

**Modifications to an enforceable grant arrangement**

AG24.36 A modification to an EGA may be so significant that it requires the grant-providing NPO to account for the modification as a separate enforceable grant arrangement. A grant-providing NPO shall account for a modification to an EGA as a separate EGA if both of the following factors are present:

(a) the scope of the EGA increases, providing the grant-providing NPO with one or more additional grant fulfilment rights, because the grant recipient accepts one or more additional EGOs or an increase in one or more existing EGOs; and
(b) the grant payment consideration increases by an amount that is intended to reflect the value of the additional grant fulfilment rights by compensating the grant recipient for the additional or increased EGOs assumed.

**Foreign exchange gains and losses**

AG24.37 Depending on the terms of an arrangement, a grant-providing NPO may be required to recognise assets or liabilities that need to be denominated in a foreign currency.

AG24.38 Non-monetary items such as prepayments related to unmet EGOs that are denominated in a foreign currency shall be measured in the reporting currency at their historical cost using the exchange rate at the date of the transaction in accordance with paragraphs G30.9–G30.10 of Section 30 *Foreign currency translations*.

AG24.39 **Monetary items** such as grant payables denominated in a foreign currency shall be restated into the reporting currency using the applicable exchange rates as at the reporting date in accordance with G30.10.

AG24.40 Any exchange differences arising on the settlement of assets or liabilities denominated in a foreign currency during the reporting period or on their restatement at the reporting date should be recognised in accordance with paragraphs G30.11–G30.13.

**Principal versus agent considerations**

AG24.41 A formal agreement between the grant-providing NPO and another entity or entities will usually provide clarity as to whether the grant-providing NPO is acting as a principal or as an agent on behalf of another entity. In the absence of a formal agreement, or in more complex arrangements such as partnerships, consortia or sub-contractor relationships, this may be more difficult to determine.

AG24.42 A consortium or similar arrangement involves a grant-providing NPO cooperating with other entities. Such arrangements may include:

- formal joint venture arrangements;
- the creation of a formal joint venture entity;
- a grant-providing NPO that is a principal entering into contracting arrangements and then sub-contracting with other parties to deliver parts of the contract;
- a grant-providing NPO acting as an agent for the consortium members by administering contractual arrangements on behalf of all other members.

AG24.43 A lead NPO that acts as agent for members of a consortium by administering contractual arrangements on behalf of all other members such as invoicing and making payments does not take over the contractual obligations and rights of other members.

AG24.44 A lead NPO that is subcontracting work to third parties, including other NPOs, in order to satisfy its contractual obligations is likely to be the principal because of the contract arrangements rather than an agent of other members.
Comparison of Section 24 Part I with IPSAS 48

Section 24 Part I is new material for NPOs that has been informed by IPSAS 48 Transfer Expenses. The main differences to IPSAS 48 are as follows:

- INPAG Section 24 Part I uses different terminology, referring specifically to grants rather than transfers and grant-providing NPOs rather than entities more generally.
- INPAG Section 24 Part I also uses the terms EGA and EGO rather than binding arrangement and compliance obligations. These permit the concept of a grant recipient undertaking to meet obligations within the arrangement rather than a promise as used in IPSAS 48, and also the possibility that its obligations can be to deliver a specific outcome or activity in addition to using resources for distinct services, goods and other assets.
- Guidance on the enforceability of an arrangement has been adapted for INPAG Section 24 Part I to the non-profit sector, including the addition of content on regulatory oversight, customary practices and general statements of intent.
- INPAG Section 24 Part I includes guidance on principal versus agent considerations consistent with the approach of INPAG to include such guidance in each section where relevant.
- The disclosure requirements in INPAG Section 24 Part I have been adapted to the nature of NPOs and grant arrangements, including the introduction of a sensitive information exemption.

Section 25 – Borrowing costs

Scope of this section
25.1 This section specifies the accounting for **borrowing costs**. Borrowing costs are interest and other costs that an NPO incurs in connection with the borrowing of funds. Borrowing costs include:

(a) interest expense calculated using the **effective interest method** as described in Section 11 Financial instruments;
(b) finance charges in respect of **finance leases** recognised in accordance with Section 20 Leases; and
(c) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Recognition
25.2 An NPO shall recognise all borrowing costs as an expense in **surplus or deficit** in the period in which they are incurred.

Disclosures
25.3 Paragraph G5.7(b) requires disclosure of finance costs. Paragraph G11.57(b) requires disclosure of total interest expense (using the effective interest method) for **financial liabilities** that are not at **fair value** through surplus or deficit. This section does not require any additional disclosure.

Comparison of Section 25 with the *IFRS for SMEs* Accounting Standard
Section 25 of INPAG has been drawn from Section 25 of the *IFRS for SMEs* Accounting Standard, with changes only to terminology and to align with the statements required by INPAG. The main differences between Section 25 of the draft Third edition of the *IFRS for SMEs* Accounting Standard and Section 25 of INPAG are as follows:

- INPAG Section 25 uses different terminology, referring specifically to NPOs rather than entities more generally, and to other sections of INPAG rather than the *IFRS for SMEs* Accounting Standard.

Specific matter for comment

**Question 6: Borrowing costs**

(i) Do you agree that there are no significant alignment changes required to Section 25, other than the terminology changes that have been made? If not, set out the alignment changes you believe are required.
Section 26 – Share-based payments

Given the nature of NPOs, it is proposed that guidance on share-based payments is not required. As a consequence, the equivalent section from the IFRS for SMES Accounting Standard has been removed from INPAG.

Comparison of Section 26 with the IFRS for SMEs Accounting Standard

It is proposed to not include Share-based payments as a section within INPAG. As a consequence Section 26 of the draft Third edition of the IFRS for SMEs Accounting Standard has been removed in its entirety. A paragraph has been included to explain why this section is not part of INPAG.

Specific matter for comment

Question 7: Share-based payments

(a) Given the characteristics of NPOs, do you agree that guidance on share-based payments is not required? If not, provide examples of share-based payments and explain how they are used.

Section 27 – Impairment of assets

Section 27 will be included in ED3.
Section 28 – Employee benefits

Scope of this section

G28.1 Employee benefits are all forms of consideration given by an NPO in exchange for service rendered by employees, including directors and management. Employee benefits covered by this section will be one of the following four types:

(a) short-term employee benefits, which are employee benefits (other than termination benefits) that are wholly due within twelve months after the end of the period in which the employees render the related service;

(b) post-employment benefits, which are employee benefits (other than termination benefits) that are payable after the completion of employment;

(c) other long-term employee benefits, which are employee benefits (other than post-employment benefits and termination benefits) that are not wholly due within twelve months after the end of the period in which the employees render the related service; and

(d) termination benefits, which are employee benefits payable as a result of either:

(i) an NPO’s decision to terminate an employee’s employment before the normal retirement date; or

(ii) an employee’s decision to accept an offer of benefits in exchange for the termination of employment.

General recognition principle for all employee benefits

G28.2 An NPO shall recognise the cost of all employee benefits to which its employees have become entitled as a result of service rendered to the NPO during the reporting period:

(a) as a liability, after deducting amounts that have been paid either directly to the employees or as a contribution to an employee benefit fund. If the amount paid exceeds the obligation arising from service before the reporting date, an entity shall recognise that excess as an asset to the extent that the prepayment will lead to a reduction in future payments or a cash refund.

(b) as an expense, unless another section of this Guidance requires the cost to be recognised as part of the cost of an asset such as inventories or property, plant and equipment.

Short-term employee benefits

Examples

G28.3 Short-term employee benefits include items such as:

(a) wages, salaries and social security contributions;

(b) short-term compensated absences (such as paid annual leave and paid sick leave) when the absences are expected to occur within twelve months after the end of the period in which the employees render the related employee service;

(c) bonuses payable within twelve months after the end of the period in which the employees render the related service; and

(d) non-monetary benefits (such as medical care, housing, cars and free or subsidised goods or services) for current employees.
Measurement of short-term benefits

G28.4 When an employee has rendered service to an NPO during the reporting period, the NPO shall measure the amounts recognised in accordance with paragraph G28.2 at the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service.

Recognition and measurement – short-term compensated absences

G28.5 An NPO may compensate employees for absence for various reasons including annual vacation leave and sick leave. Some short-term compensated absences accumulate – they can be carried forward and used in future periods if the employee does not use the current period’s entitlement in full. Examples include annual vacation leave and sick leave. An NPO shall recognise the expected cost of accumulating compensated absences when the employees render service that increases their entitlement to future compensated absences. The NPO shall measure the expected cost of accumulating compensated absences at the undiscounted additional amount that the NPO expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. The NPO shall present this amount as a current liability at the reporting date.

G28.6 An NPO shall recognise the cost of other (non-accumulating) compensated absences when the absences occur. The NPO shall measure the cost of non-accumulating compensated absences at the undiscounted amount of salaries and wages paid or payable for the period of absence.

Recognition – bonus plans

G28.7 An NPO shall recognise the expected cost of bonus payments only when:

(a) the NPO has a present legal or constructive obligation to make such payments as a result of past events (this means that the NPO has no realistic alternative but to make the payments); and

(b) a reliable estimate of the obligation can be made.

Post-employment benefits – distinction between defined contribution plans and defined benefit plans

G28.8 Post-employment benefits include, for example:

(a) retirement benefits, such as pensions; and

(b) other post-employment benefits, such as post-employment life insurance and post-employment medical care.

Arrangements whereby an NPO provides post-employment benefits are post-employment benefit plans. An NPO shall apply this section to all such arrangements whether or not they involve the establishment of a separate entity to receive contributions and to pay benefits. In some cases, these arrangements are imposed by law instead of by action of the NPO. In some cases, these arrangements arise from actions of the NPO even in the absence of a formal, documented plan.

G28.9 Post-employment benefit plans are classified as either defined contribution plans or defined benefit plans, depending on their principal terms and conditions:

(a) defined contribution plans are post-employment benefit plans under which an NPO pays fixed contributions into a separate entity (a fund) and has no legal or constructive obligation to pay further contributions or to make direct benefit payments to employees if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. Thus, the amount of the post-employment benefits received by the employee is determined by the amount of contributions paid by an NPO (and perhaps also the employee) to a post-employment benefit plan or to an insurer, together with investment returns arising from the contributions.
(b) defined benefit plans are post-employment benefit plans other than defined contribution plans. Under defined benefit plans, the NPO’s obligation is to provide the agreed benefits to current and former employees, and actuarial risk (that benefits will cost more or less than expected) and investment risk (that returns on assets set aside to fund the benefits will differ from expectations) are borne, in substance, by the NPO. If actuarial or investment experience is worse than expected, the NPO’s obligation may be increased, and vice versa if actuarial or investment experience is better than expected.

Multi-employer plans and state plans

G28.10 Multi-employer plans and state plans are classified as defined contribution plans or defined benefit plans on the basis of the terms of the plan, including any constructive obligation that goes beyond the formal terms. However, if sufficient information is not available to use defined benefit accounting for a multi-employer plan or a state plan that is a defined benefit plan, an NPO shall account for the plan in accordance with paragraph G28.12 as if it was a defined contribution plan and make the disclosures required by paragraph G28.39.

Insured benefits

G28.11 An NPO may pay insurance premiums to fund a post-employment benefit plan. The NPO shall treat such a plan as a defined contribution plan unless the NPO has a legal or constructive obligation either:

(a) to pay the employee benefits directly when they become due; or
(b) to pay further amounts if the insurer does not pay all future employee benefits relating to employee service in the current and prior periods.

A constructive obligation could arise indirectly through the plan, through the mechanism for setting future premiums, or through a related party relationship with the insurer. If the NPO retains such a legal or constructive obligation, the NPO shall treat the plan as a defined benefit plan.

Post-employment benefits – defined contribution plans

Recognition and measurement

G28.12 An NPO shall recognise the contribution payable for a period:

(a) as a liability, after deducting any amount already paid. If contribution payments exceed the contribution due for service before the reporting date, an NPO shall recognise that excess as an asset.

(b) as an expense, unless another section of this Guidance requires the cost to be recognised as part of the cost of an asset such as inventories or property, plant and equipment.

Post-employment benefits – defined benefit plans

Recognition

G28.13 In applying the general recognition principle in paragraph G28.2 to defined benefit plans, an NPO shall recognise:

(a) a liability for its obligations under defined benefit plans net of plan assets – its ‘defined benefit liability’ (see paragraphs G28.14–G28.21); and

(b) the net change in that liability during the period as the cost of its defined benefit plans during the period (see paragraphs G28.22–G28.25).
Measurement of the defined benefit liability

G28.14 An NPO shall measure a defined benefit liability for its obligations under defined benefit plans at the net total of the following amounts:

(a) the present value of its obligations under defined benefit plans (its defined benefit obligation) at the reporting date (paragraphs G28.15–G28.20 provide guidance for measuring this obligation)

(b) minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly. Section 12 Fair value measurement provides guidance for determining the fair values of those plan assets.

Inclusion of both vested and unvested benefits

G28.15 The present value of an NPO’s obligations under defined benefit plans at the reporting date shall reflect the estimated amount of benefit that employees have earned in return for their service in the current and prior periods, including benefits that are not yet vested (see paragraph G28.24) and including the effects of benefit formulas that give employees greater benefits for later years of service. This requires the NPO to determine how much benefit is attributable to the current and prior periods on the basis of the plan's benefit formula and to make estimates (actuarial assumptions) about demographic variables (such as employee turnover and mortality) and financial variables (such as future increases in salaries and medical costs) that influence the cost of the benefit. The actuarial assumptions shall be unbiased (neither imprudent nor excessively conservative), mutually compatible and selected to lead to the best estimate of the future cash flows that will arise under the plan.

Discounting

G28.16 The NPO shall determine the rate used to discount the future payments by reference to market yields at the reporting date on high quality corporate bonds. In jurisdictions with no deep market in such bonds, the NPO shall use the market yields (at the reporting date) on government bonds. The currency and term of the corporate bonds or government bonds shall be consistent with the currency and estimated period of the future payments.

Actuarial valuation method

G28.17 An NPO shall use the projected unit credit method to measure its defined benefit obligation and the related expense. If defined benefits are based on future salaries, the projected unit credit method requires an NPO to measure its defined benefit obligations on a basis that reflects estimated future salary increases. Additionally, the projected unit credit method requires an NPO to make various actuarial assumptions in measuring the defined benefit obligation, including discount rates, the expected rates of return on plan assets, expected rates of salary increases, employee turnover, mortality and (for defined benefit medical plans) medical cost trend rates.

G28.18 This Guidance does not require an NPO to engage an independent actuary to perform the comprehensive actuarial valuation needed to calculate its defined benefit obligation. Nor does it require that a comprehensive actuarial valuation must be done annually. In the periods between comprehensive actuarial valuations, if the principal actuarial assumptions have not changed significantly, the defined benefit obligation can be measured by adjusting the prior period measurement for changes in employee demographics such as number of employees and salary levels.

Plan introductions, changes, curtailments and settlements

G28.19 If a defined benefit plan has been introduced or changed in the current period, the NPO shall increase or decrease its defined benefit liability to reflect the change, and shall recognise the increase (decrease) as an expense (income) in measuring surplus or deficit in the current period. Conversely, if a plan has been curtailed (ie benefits or group of covered employees are reduced) or settled (the employer's obligation is completely discharged) in the current period, the defined benefit obligation shall be decreased or eliminated and the NPO shall recognise the resulting gain or loss in surplus or deficit in the current period.
Defined benefit plan asset

G28.20 If the present value of the defined benefit obligation at the reporting date is less than the fair value of plan assets at that date, the plan has a surplus. An NPO shall recognise a plan surplus as a defined benefit plan asset only to the extent that it is able to recover the surplus, either through reduced contributions in the future or through refunds from the plan.

Cost of a defined benefit plan

G28.21 An NPO shall recognise the net change in its defined benefit liability during the period, other than a change attributable to benefits paid to employees during the period or to contributions from the employer, as the cost of its defined benefit plans during the period. That cost is recognised either entirely in surplus or deficit as an expense or partly in surplus or deficit and partly as an item of income and expense recognised directly in changes in net assets (see paragraph G28.22) unless another section of this Guidance requires the cost to be recognised as part of the cost of an asset such as inventories or property, plant and equipment.

Recognition – accounting policy election

G28.22 An NPO is required to recognise all actuarial gains and losses in the period in which they occur. An NPO shall:

(a) recognise all actuarial gains and losses in surplus or deficit; or
(b) recognise all actuarial gains and losses through income and expenses recognised directly in changes in net assets

as an accounting policy election. The NPO shall apply its chosen accounting policy consistently to all of its defined benefit plans and all of its actuarial gains and losses.

G28.23 The net change in the defined benefit liability that is recognised as the cost of a defined benefit plan includes:

(a) the change in the defined benefit liability arising from employee service rendered during the reporting period;
(b) interest on the defined benefit obligation during the reporting period;
(c) the returns on any plan assets and the net change in the fair value of recognised reimbursement rights (see paragraph G28.26) during the reporting period;
(d) actuarial gains and losses arising in the reporting period;
(e) increases or decreases in the defined benefit liability resulting from introducing a new plan or changing an existing plan in the reporting period (see paragraph G28.19); and
(f) decreases in the defined benefit liability resulting from curtailing or settling an existing plan in the reporting period (see paragraph G28.19).

G28.24 Employee service gives rise to an obligation under a defined benefit plan, even if the benefits are conditional on future employment (in other words, they are not yet vested). In measuring its defined benefit obligation, an NPO considers the probability that some employees may not satisfy vesting requirements. Similarly, although some post-employment benefits (such as post-employment medical benefits) become payable only if a specified event occurs when an employee is no longer employed (such as an illness), an obligation is created when the employee renders service that will provide entitlement to the benefit if the specified event occurs. The probability that the specified event will occur affects the measurement of the obligation but does not determine whether the obligation exists.

G28.25 If defined benefits are reduced for amounts that will be paid to employees under government-sponsored plans, an NPO shall measure its defined benefit obligations on a basis that reflects the benefits payable under the government plans, but only if:

(a) those plans were enacted before the reporting date; or
(b) past history or other reliable evidence indicates that those state benefits will change in some predictable manner – for example, in line with future changes in general price levels or general salary levels.

Reimbursements

G28.26 If an NPO is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the NPO shall recognise its right to reimbursement as a separate asset. The NPO shall measure the asset at fair value. In the Statement of Income and Expenses, the expense relating to a defined benefit plan may be presented net of the amount recognised for a reimbursement.

Other long-term employee benefits

G28.27 Other long-term employee benefits include, for example:
(a) long-term compensated absences such as long-service or sabbatical leave;
(b) long-service benefits;
(c) long-term disability benefits;
(d) bonuses payable twelve months or more after the end of the period in which the employees render the related service; and
(e) deferred compensation paid twelve months or more after the end of the period in which it is earned.

G28.28 An NPO shall recognise a liability for other long-term employee benefits measured at the net total of the following amounts:
(a) the present value of the benefit obligation at the reporting date; minus
(b) the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

An NPO shall recognise the net change in the liability during the period, other than a change attributable to benefits paid to employees during the period or to contributions from the employer, as the cost of its other long-term employee benefits during the period. That cost is recognised entirely in surplus or deficit as an expense unless another section of this Guidance requires it to be recognised as part of the cost of an asset, such as inventories or property, plant and equipment.

Termination benefits

G28.29 An NPO may be committed, by legislation, by contractual or other agreements with employees or their representatives or by a constructive obligation based on sector practice, custom or a desire to act equitably, to make payments (or provide other benefits) to employees when it terminates their employment. Such payments are termination benefits.

Recognition

G28.30 Because termination benefits do not provide an NPO with future economic benefits, an NPO shall recognise them as an expense in surplus or deficit immediately.

G28.31 When an NPO recognises termination benefits, the NPO may also have to account for a curtailment of retirement benefits or other employee benefits.

G28.32 An NPO shall recognise a liability and an expense for termination benefits at the earlier of the following dates:
(a) when the NPO can no longer withdraw the offer of those benefits; and
(b) when the NPO recognises costs for a restructuring that is within the scope of Section 21 Provisions
and contingencies and involves the payment of termination benefits.

G28.33 For termination benefits payable as a result of an employee's decision to accept an offer of benefits in
exchange for the termination of employment, the time when an NPO can no longer withdraw the offer
of termination benefits is the earlier of:

(a) when the employee accepts the offer.
(b) when a restriction (for example, a legal, regulatory or contractual requirement or other restriction)
on the NPO's ability to withdraw the offer takes effect. This would be when the offer is made, if
the restriction existed at the time of the offer.

G28.34 For termination benefits payable as a result of an NPO's decision to terminate an employee's
employment, the NPO can no longer withdraw the offer when the NPO has communicated to the
affected employees a plan of termination meeting all of the following criteria:

(a) actions required to complete the plan indicate that it is unlikely that significant changes to the
plan will be made;
(b) the plan identifies the number of employees whose employment is to be terminated, their job
classifications or functions and their locations (but the plan need not identify each individual
employee) and the expected completion date; and
(c) the plan establishes the termination benefits that employees will receive in sufficient detail
that employees can determine the type and amount of benefits they will receive when their
employment is terminated.

Measurement

G28.35 An NPO shall measure termination benefits at the best estimate of the expenditure that would be
required to settle the obligation at the reporting date. In the case of an offer made to encourage
voluntary redundancy, the measurement of termination benefits shall be based on the number of
employees expected to accept the offer.

G28.36 When termination benefits are due more than twelve months after the end of the reporting period,
they shall be measured at their present value.

Group plans

G28.37 If a controlling NPO provides benefits to the employees of one or more controlled entities in the
group, and the controlling NPO presents consolidated financial statements using this Guidance,
such controlled entities are permitted to recognise and measure employee benefit expense on the
basis of a reasonable allocation of the expense recognised for the group.

Disclosures

Disclosures about short-term employee benefits

G28.38 This section does not require specific disclosures about short-term employee benefits.

Disclosures about defined contribution plans

G28.39 An NPO shall disclose the amount recognised in surplus or deficit as an expense for defined contribution
plans. If an NPO treats a defined benefit multi-employer or state plan as a defined contribution plan
because sufficient information for defined benefit accounting is not available (see paragraph G28.10),
it shall disclose the fact that the plan is a defined benefit plan and the reason why it is being accounted
for as a defined contribution plan, along with any available information about the plan's surplus or
deficit and the implications, if any, for the NPO.
Disclosures about defined benefit plans

G28.40 Except for any defined benefit multi-employer or state plan that is accounted for as a defined contribution plan in accordance with paragraph G28.10, and in relation to which paragraph G28.39 requires different disclosures, an NPO shall disclose the following information about defined benefit plans:

(a) a general description of the type of plan, including funding policy;
(b) the NPO's accounting policy for recognising actuarial gains and losses (either in surplus or deficit or as an item of income and expense recognised directly in changes in net assets) and the amount of actuarial gains and losses recognised during the period;
(c) the date of the most recent comprehensive actuarial valuation and, if it was not as of the reporting date, a description of the adjustments that were made to measure the defined benefit obligation at the reporting date;
(d) a reconciliation of opening and closing balances of the defined benefit obligation showing separately:
   (i) change in the defined benefit liability arising from employee service rendered during the reporting period;
   (ii) interest on the defined benefit obligation during the reporting period;
   (iii) actuarial gains and losses arising in the reporting period;
   (iv) changes resulting from introducing a new plan or changing an existing plan in the reporting period;
   (v) benefits paid; and
   (vi) all other changes.

(e) a reconciliation of the opening and closing balances of the plan assets and of the opening and closing balances of any reimbursement right recognised as an asset, showing separately:
   (i) contributions;
   (ii) benefits paid;
   (iii) the return on plan assets and the net change in the fair value of recognised reimbursement rights (see paragraph G28.26) during the reporting period; and
   (iv) other changes in plan assets.

(f) for each major class of plan assets, which shall include but is not limited to equity instruments, debt instruments, property and all other assets, the percentage or amount that each major class of plan assets constitutes of the fair value of the total plan assets at the reporting date;

(g) the amounts included in the fair value of plan assets for:
   (i) each class of the NPO's own financial instruments; and
   (ii) any property occupied by, or other assets used by, the NPO.

(h) the principal actuarial assumptions used, including:
   (i) the discount rates;
   (ii) the expected rates of return on any plan assets for the periods presented in the financial statements;
   (iii) the expected rates of salary increases;
   (iv) medical cost trend rates; and
   (v) any other material actuarial assumptions used.
G28.41 The reconciliations in G28.40(e) and G28.40(f) need not be presented for prior periods.

G28.42 If an NPO has more than one defined benefit plan, the disclosures required by paragraph G28.40 may be made in total, separately for each plan, or in such groupings the NPO considers to be the most useful.

G28.43 If an NPO participates in a defined benefit plan that is a group plan, it shall disclose:

(a) the contractual agreement or stated policy for charging the net defined benefit cost or the fact that there is no such policy;
(b) the policy for determining the contribution to be paid by the NPO; and
(c) if the NPO accounts for an allocation of the net defined benefit cost as noted in paragraph G28.37, all the information about the plan as a whole required by paragraph G28.40.

G28.44 The information required by paragraph G28.43(c) can be disclosed by cross-reference to disclosures required by these subparagraphs in another group entity’s financial statements if:

(a) that group entity’s financial statements separately identify and disclose the information required about the plan; and
(b) that group entity’s financial statements are available to users of the financial statements on the same terms as the financial statements of the NPO and at the same time as, or earlier than, the financial statements of the NPO.

G28.45 When required by Section 21, an NPO discloses information about contingent liabilities arising from post-employment benefit obligations.

Disclosures about other long-term employee benefits

G28.46 For each category of other long-term employee benefits that an NPO provides to its employees, the NPO shall disclose the nature of the benefit, the amount of its obligation and the extent of funding at the reporting date.

Disclosures about termination benefits

G28.47 For each category of termination benefits that an NPO provides to its employees, the NPO shall disclose the nature of the benefit, the amount of its obligation and the extent of funding at the reporting date.
Comparison of Section 28 with the *IFRS for SMEs* Accounting Standard

Section 28 of INPAG has been drawn from Section 28 of the *IFRS for SMEs* Accounting Standard, with changes only to terminology and to align with the statements required by INPAG. The main differences between Section 28 of the draft Third edition of the *IFRS for SMEs* Accounting Standard and Section 28 of INPAG are as follows:

- Any references to share-based payments have been removed from this section, as it is proposed that a section on share-based payments is not included in INPAG. Share-based employee remuneration is not expected to be a feature of NPOs.
- References to profit-sharing arrangements have been removed from this section. Given the characteristics of NPOs, it is not expected that profit sharing will exist.
- The requirement that actuarial gains and losses recognised in other comprehensive income shall be presented in the statement of comprehensive income has been removed as this statement is not a primary statement in INPAG.
- References to the *IFRS for SMEs* Accounting Standard or full IFRS Accounting Standards have been removed in the context of a controlling NPO providing benefits to employees of controlled entities in the group, as the accounts will be prepared using INPAG.
- INPAG Section 28 uses different terminology, referring specifically to NPOs rather than entities more generally, and to other sections of INPAG rather than the *IFRS for SMEs* Accounting Standard.

Specific matter for comment

Section 29 – Income tax

Scope of this section

G29.1 For the purpose of this Guidance, income tax includes all domestic and foreign taxes that are based on taxable profit. Income tax also includes taxes such as withholding taxes that are payable by a controlled entity, associate or joint arrangement on distributions to the reporting NPO.

G29.2 This section covers accounting for income tax. It requires an NPO to recognise the current and future tax consequences of transactions and other events that have been recognised in the financial statements. These recognised tax amounts comprise current tax and deferred tax. Current tax is income tax payable (recoverable) in respect of the taxable profit (tax loss) for the current period or past periods. Deferred tax is income tax payable or recoverable in future periods, generally as a result of the NPO recovering or settling its assets and liabilities for their current carrying amount, and the tax effect of the carryforward of currently unused tax losses and tax credits.

Recognition and measurement of current tax

G29.3 An NPO shall recognise a current tax liability for tax payable on taxable surplus for the current and past periods. If the amount paid for the current and past periods exceeds the amount payable for those periods, the NPO shall recognise the excess as a current tax asset.

G29.4 An NPO shall recognise a current tax asset for the benefit of a tax loss that can be carried back to recover tax paid in a previous period.

G29.5 An NPO shall measure a current tax liability (asset) at the amount it expects to pay (recover) using the tax rates and laws that have been enacted or substantively enacted by the reporting date. An NPO shall regard tax rates and tax laws as substantively enacted when the remaining steps in the enactment process have not affected the outcome in the past and are unlikely to do so. Paragraphs G29.33–G29.34 provide additional measurement guidance.

Recognition of deferred tax

General recognition principle

G29.6 It is inherent in the recognition of an asset or a liability that the reporting NPO expects to recover or settle the carrying amount of that asset or liability. If it is probable that recovery or settlement of that carrying amount will make future tax payments larger (smaller) than they would be if such recovery or settlement were to have no tax consequences, this section requires an NPO to recognise a deferred tax liability (deferred tax asset) with certain limited exceptions. If the NPO expects to recover the carrying amount of an asset or settle the carrying amount of a liability without affecting taxable profit, no deferred tax arises in respect of the asset or liability.

G29.7 An NPO shall recognise a deferred tax asset or liability for tax recoverable or payable in future periods as a result of past transactions or events. Such tax arises from the differences between the carrying amounts of the NPO’s assets and liabilities in the Statement of Financial Position and the amounts attributed to those assets and liabilities by the tax authorities (such differences are called ‘temporary differences’), and the carryforward of currently unused tax losses and tax credits.

Tax bases and temporary differences

G29.8 The tax base of an asset is the amount that will be deductible for tax purposes against any taxable economic benefits that will flow to an NPO when it recovers the carrying amount of the asset. If those economic benefits will not be taxable, the tax base of the asset is equal to its carrying amount.
G29.9 The tax base of a liability is its carrying amount less any amount that will be deductible for tax purposes in respect of that liability in future periods. In the case of revenue that is received in advance, the tax base of the resulting liability is its carrying amount less any amount of the revenue that will not be taxable in future periods.

G29.10 Some items have a tax base but are not recognised as assets and liabilities in the Statement of Financial Position. For example, research and development costs are recognised as an expense when determining accounting surplus in the period in which they are incurred but may not be permitted as a deduction when determining taxable profit (tax loss) until a later period. The difference between the tax base of the research and development costs, being the amount that the taxation authorities will permit as a deduction in future periods, and the carrying amount of nil is a deductible temporary difference that results in a deferred tax asset.

G29.11 Temporary differences are differences between the carrying amount of an asset or liability in the Statement of Financial Position and its tax base. In consolidated financial statements, temporary differences are determined by comparing the carrying amounts of assets and liabilities in the consolidated financial statements with the appropriate tax base. The tax base is determined by reference to a consolidated tax return in those jurisdictions in which such a return is filed. In other jurisdictions, the tax base is determined by reference to the tax returns of each entity in the group.

G29.12 Examples of situations in which temporary differences arise include:

(a) the identifiable assets acquired and liabilities assumed in a business combination are recognised at their fair values in accordance with Section 19 Business combinations and goodwill, but no equivalent adjustment is made for tax purposes (for example, the tax base of an asset may remain at cost to the previous owner). The resulting deferred tax asset or liability affects the amount of goodwill that an NPO recognises.

(b) assets are remeasured but no equivalent adjustment is made for tax purposes. For example, this Guidance permits or requires certain assets to be remeasured at fair value or to be revalued (for example, Section 16 Investment Property and Section 17 Property, plant and equipment).

(c) goodwill arises in a business combination – for example, the tax base of goodwill will be nil if taxation authorities do not allow the amortisation or the impairment of goodwill as a deductible expense when taxable profit is determined and do not permit the cost of goodwill to be treated as a deductible expense on disposal of the controlled entity.

(d) the tax base of an asset or a liability on initial recognition differs from its initial carrying amount.

(e) the carrying amount of investments in controlled entities, branches and associates or interests in joint arrangements becomes different from the tax base of the investment or interest.

Not all of these temporary differences will give rise to deferred tax assets and liabilities (see paragraphs G29.13 and G29.15).

Taxable temporary differences

G29.13 A deferred tax liability shall be recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from:

(a) the initial recognition of goodwill; or
(b) the initial recognition of an asset or a liability in a transaction that:
   (i) is not a business combination; and
   (ii) at the time of the transaction, affects neither accounting surplus nor taxable profit (tax loss).

However, for taxable temporary differences associated with investments in controlled entities, branches and associates, and interests in joint arrangements, a deferred tax liability shall be recognised in accordance with paragraph G29.26.
Some temporary differences arise when income or expense is included in accounting surplus in one period but is included in taxable profit in a different period. Such temporary differences are often described as timing differences. The following are examples of temporary differences of this kind that are taxable temporary differences and that therefore result in deferred tax liabilities:

(a) interest revenue is included in accounting surplus on a time-proportion basis but may, in some jurisdictions, be included in taxable profit when cash is collected. The tax base of any receivable with respect to such revenues is nil, because the revenues do not affect taxable profit until cash is collected.

(b) depreciation used when determining taxable profit (tax loss) may differ from that used when determining accounting surplus. The temporary difference is the difference between the carrying amount of the asset and its tax base, which is the original cost of the asset less all deductions in respect of that asset permitted by the taxation authorities when determining taxable profit of the current and prior periods. A taxable temporary difference arises, and results in a deferred tax liability, when tax depreciation is accelerated. If the tax depreciation is less rapid than the accounting depreciation, a deductible temporary difference arises resulting in a deferred tax asset (see paragraph G29.15).

Deductible temporary differences

A deferred tax asset shall be recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised, unless the deferred tax asset arises from the initial recognition of an asset or a liability in a transaction that:

(a) is not a business combination; and
(b) at the time of the transaction, affects neither accounting surplus nor taxable profit (tax loss).

However, for deductible temporary differences associated with investments in controlled entities, branches and associates and for interests in joint arrangements, a deferred tax asset shall be recognised in accordance with paragraph G29.27.

An NPO considers:

(a) the extent that it is probable that taxable profit will be available; and
(b) whether tax law restricts the sources of taxable profits against which the deductible temporary difference can be utilised.

The following are examples of deductible temporary differences that result in deferred tax assets:

(a) retirement benefit costs may be deducted when determining accounting surplus at the time that the service is provided by the employee, but deducted when determining taxable profit either when contributions are paid to a fund by the NPO or when retirement benefits are paid by the NPO. A temporary difference exists between the carrying amount of the liability and its tax base; the tax base of the liability is usually nil. Such a deductible temporary difference results in a deferred tax asset because economic benefits will flow to the NPO in the form of a deduction from taxable profits when contributions or retirement benefits are paid.

(b) certain assets may be carried at fair value, without an equivalent adjustment being made for tax purposes. A deductible temporary difference arises if the tax base of the asset exceeds its carrying amount.

The reversal of deductible temporary differences results in deductions when taxable profits of future periods are determined. It is probable that taxable profit will be available against which a deductible temporary difference can be utilised when there are sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity that are expected to reverse:

(a) in the same period as the expected reversal of the deductible temporary difference; or
(b) in periods into which a tax loss arising from the deferred tax asset can be carried back or forward.

In such circumstances, the deferred tax asset is recognised in the period in which the deductible temporary differences arise.

G29.19 When there are insufficient taxable temporary differences relating to the same taxation authority and the same taxable entity, the deferred tax asset is recognised to the extent that:

(a) it is probable that the NPO will have sufficient taxable profit relating to the same taxation authority and the same taxable entity in the same period as the reversal of the deductible temporary difference (or in the periods into which a tax loss arising from the deferred tax asset can be carried back or forward). When evaluating whether it will have sufficient taxable profit in future periods, an NPO:

(i) compares the deductible temporary differences with future taxable profit that excludes tax deductions resulting from the reversal of those deductible temporary differences. This comparison shows the extent to which the future taxable profit is sufficient for the NPO to deduct the amounts resulting from the reversal of those deductible temporary differences.

(ii) ignores taxable amounts arising from deductible temporary differences that are expected to originate in future periods, because the deferred tax asset arising from those deductible temporary differences will itself require future taxable profit in order to be utilised.

(b) tax planning opportunities are available to the NPO that will create taxable profit in appropriate periods.

G29.20 The estimate of probable future taxable profit may include the recovery of some of an NPO’s assets for more than their carrying amount if there is sufficient evidence that it is probable that the NPO will achieve this.

G29.21 When an NPO has a history of recent losses, the NPO considers the guidance in paragraphs G29.22–G29.23.

Unused tax losses and unused tax credits

G29.22 A deferred tax asset shall be recognised for the carry forward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised. When assessing the probability that taxable profit will be available against which the unused tax losses or unused tax credits can be utilised, an NPO considers the following criteria:

(a) whether the NPO has sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity, which will result in taxable amounts against which the unused tax losses or unused tax credits can be utilised before they expire;

(b) whether it is probable that the NPO will have taxable profits before the unused tax losses or unused tax credits expire;

(c) whether the unused tax losses result from identifiable causes which are unlikely to recur; and

(d) whether tax planning opportunities are available to the NPO that will create taxable profit in the period in which the unused tax losses or unused tax credits can be utilised.

To the extent that it is not probable that taxable profit will be available against which the unused tax losses or unused tax credits can be utilised, the deferred tax asset is not recognised.

G29.23 The existence of unused tax losses is strong evidence that future taxable profit may not be available. Consequently, when an NPO has a history of recent losses, the NPO recognises a deferred tax asset arising from unused tax losses or tax credits only to the extent that the NPO has sufficient taxable temporary differences or to the extent that there is convincing other evidence that sufficient taxable profit will be available against which the unused tax losses or unused tax credits can be utilised by the NPO.
Reassessments of unrecognised deferred tax assets

G29.24 At the end of each **reporting period**, an NPO reassesses any unrecognised deferred tax assets. The NPO recognises a previously unrecognised deferred tax asset to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Investments in subsidiaries, branches and associates and interests in joint arrangements

G29.25 Temporary differences arise when the carrying amount of investments in controlled entities, branches and associates and interests in joint arrangements (for example, in the **controlling NPO’s consolidated financial statements** the carrying amount of a controlled entity is the net consolidated assets of that controlled entity, including the carrying amount of any related goodwill) becomes different from the tax base (which is often cost) of the investment or interest. Such differences may arise in a number of different circumstances, for example:

(a) the existence of undistributed surpluses of controlled entities, branches, associates and joint arrangements;
(b) changes in foreign exchange rates when a controlling NPO and its controlled entity are based in different countries; and
(c) a reduction in the carrying amount of an investment in an associate to its **recoverable amount**.

Investments may be accounted for differently in the controlling NPO’s **separate financial statements** compared to the consolidated financial statements, in which case the temporary difference associated with that investment may also differ. For example, in the controlling NPO’s separate financial statement the carrying amount of a controlled entity will depend on the accounting policy chosen in paragraph G9.45.

G29.26 An NPO shall recognise a deferred tax liability for all taxable temporary differences associated with investments in controlled entities, branches and associates, and interests in joint arrangements, except to the extent that both of the following conditions are satisfied:

(a) the controlling NPO, investor or party to the joint arrangement is able to control the timing of the reversal of the temporary difference; and
(b) it is probable that the temporary difference will not reverse in the foreseeable future.

G29.27 An NPO shall recognise a deferred tax asset for all deductible temporary differences arising from investments in controlled entities, branches and associates and interests in joint arrangements, only to the extent that it is probable that:

(a) the temporary difference will reverse in the foreseeable future; and
(b) taxable profit will be available against which the temporary difference can be utilised.

Measurement of deferred tax

G29.28 An NPO shall measure a deferred tax liability (asset) using the tax rates and tax laws that have been enacted or substantively enacted by the reporting date. An NPO shall regard tax rates and tax laws as substantively enacted when the remaining steps in the enactment process have not affected the outcome in the past and are unlikely to do so.

G29.29 When different tax rates apply to different levels of taxable profit, an NPO shall measure deferred tax liabilities (assets) using the average enacted or substantively enacted rates that it expects to be applicable to the taxable profit (tax loss) of the periods in which it expects the deferred tax liability to be settled (deferred tax asset to be realised).

G29.30 The measurement of deferred tax liabilities and deferred tax assets shall reflect the tax consequences that would follow from the manner in which the entity expects, at the reporting date, to recover or settle the carrying amount of the related assets and liabilities. Consequently, an NPO measures deferred
tax liabilities and deferred tax assets using the tax rate and the tax base that are consistent with the expected manner of recovery or settlement. For example, if the temporary difference arises from an item of income that is expected to be taxable as a capital gain in a future period, the deferred tax expense is measured using the capital gain tax rate and the tax base that is consistent with recovering the carrying amount through sale.

G29.31 If a deferred tax liability or deferred tax asset arises from a non-depreciable asset measured using the revaluation model in Section 17, the measurement of the deferred tax liability or deferred tax asset shall reflect the tax consequences of recovering the carrying amount of the non-depreciable asset through sale. If a deferred tax liability or asset arises from investment property that is measured at fair value, there is a rebuttable presumption that the carrying amount of the investment property will be recovered through sale. Accordingly, unless the presumption is rebutted, the measurement of the deferred tax liability or the deferred tax asset shall reflect the tax consequences of recovering the carrying amount of the investment property entirely through sale. This presumption is rebutted if the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, instead of through sale. If the presumption is rebutted, the requirements of paragraph G29.30 shall be followed.

G29.32 The carrying amount of a deferred tax asset shall be reviewed at the end of each reporting period. An NPO shall reduce the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that recognised deferred tax asset to be utilised. Any such reduction shall be reversed to the extent that it becomes probable that sufficient taxable profit will be available.

Measurement of both current and deferred tax

G29.33 An NPO shall not discount current or deferred tax assets and liabilities.

G29.34 In some jurisdictions, income tax is payable at a higher or lower rate if part or all of the profit or retained earnings is paid out as a dividend to shareholders of the entity. In other jurisdictions, income tax may be refundable or payable if part or all of the profit or retained earnings is paid out as a dividend to shareholders of the entity. In both of those circumstances, an NPO shall measure current and deferred tax at the tax rate applicable to undistributed profits until the NPO recognises a liability to make a capital distribution. When the NPO recognises a liability to make a capital distribution, it shall recognise the resulting current or deferred tax liability (asset) and the related tax expense (income).

Withholding tax on distributions

G29.35 When an NPO makes a capital distribution, it may be required to pay a portion of the distribution to taxation authorities on behalf of holders of equity claims. Such an amount paid or payable to taxation authorities is charged to equity as a part of the capital distribution.

Uncertainty over income tax treatments

G29.36 It may be unclear how tax law applies to a particular transaction or circumstance. An uncertain tax treatment is a tax treatment whose acceptability by the relevant taxation authority under tax law is uncertain.

G29.37 An NPO shall determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments based on which approach better predicts the resolution of the uncertainty.

G29.38 An NPO shall assume that a taxation authority will examine amounts it has a right to examine and have full knowledge of all related information when making those examinations. If an NPO concludes either:
(a) it is probable that the taxation authority will accept an uncertain tax treatment, the NPO shall determine the taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatment used or planned to be used in its income tax filings; or
(b) it is not probable that the taxation authority will accept an uncertain tax treatment, the NPO shall reflect the effect of uncertainty in determining the related taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates by using either of the following methods, depending on which better predicts the resolution of the uncertainty:

(i) the most likely amount – the single most likely amount in a range of possible outcomes; or
(ii) the expected value – the sum of the probability-weighted amounts in a range of possible outcomes.

G29.39 An NPO shall reflect the effect of a change in relevant facts and circumstances, or of new information, on its judgements or estimates about uncertain tax treatments as a change in accounting estimate by applying Section 10 Accounting policies, estimates and errors.

Presentation

Allocation in income and equity

G29.40 An entity shall recognise tax expense in the same component as the transaction or other event that resulted in the tax expense (ie surplus or loss from continuing operations or discontinued operations, income and expenses recognised directly in net assets or equity).

Current/non-current distinction

G29.41 When an NPO presents current and non-current assets and current and non-current liabilities as separate classifications in its Statement of Financial Position, it shall not classify any deferred tax assets (liabilities) as current assets (liabilities).

Offsetting

G29.42 An NPO shall offset current tax assets and current tax liabilities, if, and only if, it has a legally enforceable right to set off the amounts and the NPO can demonstrate that it plans either to settle on a net basis or to realise the asset and settle the liability simultaneously.

G29.43 An NPO shall offset deferred tax assets and deferred tax liabilities if, and only if:

(a) it has a legally enforceable right to set off current tax assets against current tax liabilities; and
(b) the NPO can demonstrate that, in each future period in which significant amounts of deferred tax liabilities or deferred tax assets are expected to be settled or recovered, it plans either to settle current tax liabilities and assets on a net basis or to realise the current tax assets and settle the current tax liabilities simultaneously.

If (b) involves undue cost or effort, then an NPO shall not offset deferred tax assets and deferred tax liabilities.

Disclosures

G29.44 An NPO shall disclose information that enables users of its financial statements to evaluate the nature and financial effect of the current and deferred tax consequences of recognised transactions and other events.

G29.45 An NPO shall disclose separately the major components of tax expense (income). Such components of tax expense (income) may include:
(a) current tax expense (income);
(b) any adjustments recognised in the period for current tax of prior periods;
(c) the amount of deferred tax expense (income) relating to the origination and reversal of temporary differences;
(d) the amount of deferred tax expense (income) relating to changes in tax rates or the imposition of new taxes;
(e) the amount of the benefit arising from a previously unrecognised tax loss, tax credit or temporary difference of a prior period that is used to reduce tax expense;
(f) adjustments to deferred tax expense (income) arising from a change in the tax status of the entity or its shareholders;
(g) deferred tax expense (income) arising from the write-down, or reversal of a previous write-down, of a deferred tax asset in accordance with paragraph G29.32; and
(h) the amount of tax expense (income) relating to those changes in accounting policies and errors that are included in surplus or deficit in accordance with Section 10, because they cannot be accounted for retrospectively.

G29.46 An NPO shall disclose the following separately:

(a) the aggregate current and deferred tax relating to items that are recognised directly in net assets.
(b) the aggregate current and deferred tax relating to items that are charged or credited directly to equity.
(c) an explanation of any significant differences between the tax expense (income) and accounting surplus multiplied by the applicable tax rate. For example, such differences may arise from transactions such as revenue that are exempt from taxation or expenses that are not deductible in determining taxable profit (tax loss).
(d) an explanation of changes in the applicable tax rate(s) compared with the previous reporting period.
(e) for each type of temporary difference and for each type of unused tax losses and tax credits:
   (i) the amount of deferred tax liabilities and deferred tax assets at the end of the reporting period; and
   (ii) an analysis of the change in deferred tax liabilities and deferred tax assets during the period.
(f) the amount (and expiry date, if any) of deductible temporary differences, unused tax losses and unused tax credits for which no deferred tax asset is recognised in the Statement of Financial Position.
(g) in the circumstances described in paragraph G29.34, an explanation of the nature of the potential income tax consequences that would result from making a distribution to the providers of contributed capital.

G29.47 If an NPO does not offset tax assets and liabilities in accordance with paragraph G29.43 because it is unable to demonstrate without undue cost or effort that it plans to settle them on a net basis or realise them simultaneously, the NPO shall disclose the amounts that have not been offset and the reasons why applying the requirement would involve undue cost or effort.
**Comparison of Section 29 with the IFRS for SMEs Accounting Standard**

Section 29 of INPAG has been drawn from Section 29 of the *IFRS for SMEs* Accounting Standard, with changes only to terminology and to align with the statements required by INPAG. The main differences between Section 29 of the draft Third edition of the *IFRS for SMEs* Accounting Standard and Section 29 of INPAG are as follows:

* The exclusion relating to government grants has been removed as Section 24 of the draft Third edition of the IFRS for SMEs Accounting Standard on government grants is superseded by Section 23 Part I *Revenue from grants and donations*. Section 23 Part I uses the principles of the 5 step model used for other revenue recognition.
* INPAG requires that the tax expense is recognised in the same component as the transaction or other event that resulted in the tax expense rather than references to total comprehensive income.
* INPAG Section 29 uses different terminology, referring specifically to NPOs rather than entities more generally, and to other sections of INPAG rather than the *IFRS for SMEs* Accounting Standard.

Section 30 – Foreign currency translation

Scope of this section

G30.1 An NPO can conduct foreign activities in two ways. It may have transactions in foreign currencies, or it may have foreign operations. In addition, an NPO may present its financial statements in a foreign currency. This section prescribes how to include foreign currency transactions and foreign operations in the financial statements of an NPO and how to translate financial statements into a presentation currency. Accounting for financial instruments that derive their value from the change in a specified foreign exchange rate (for example, foreign currency forward exchange contracts) and hedge accounting of foreign currency items are dealt with in Part II of Section 11 Other financial instrument issues.

Functional currency

G30.2 Each NPO shall identify its functional currency. An NPO’s functional currency is the currency of the primary economic environment in which the NPO operates.

G30.3 The primary economic environment in which an NPO operates is normally the one in which it primarily generates and expends cash. Consequently, the following are the most important factors an NPO considers in determining its functional currency:

(a) the currency:
   (i) that mainly influences sales prices for goods and services (this will often be the currency in which sales prices for its goods and services are denominated and settled); and
   (ii) of the country whose competitive forces and regulations mainly determine the sales prices of its goods and services.

(b) the currency that mainly influences labour, material and other costs of providing services and goods (this will often be the currency in which such costs are denominated and settled).

(c) the currency that mainly influences the value of grants, donations and similar income and the cost of providing grants, donations and similar expenses (this will often be the currency in which such incomes or costs are denominated and settled).

G30.4 The following factors may also provide evidence of an NPO’s functional currency:

(a) the currency in which funds from financing activities (issuing debt and equity instruments or receiving loans) are generated; and

(b) the currency in which receipts from operating activities are usually retained, including cash balances retained as reserves.

G30.5 The following additional factors are considered in determining the functional currency of a foreign operation, and whether its functional currency is the same as that of the reporting NPO (the reporting NPO in this context being the NPO that has the foreign operation as its controlled entity, branch, associate or joint arrangement):

(a) whether the activities of the foreign operation are carried out as an extension of the reporting NPO instead of being carried out with a significant degree of autonomy. An example of the former is when the foreign operation only sells goods imported from the reporting NPO and remits the proceeds to it. An example of the latter is when the operation accumulates cash and other monetary items, incurs expenses, generates income and arranges borrowings, all substantially in its local currency.

(b) whether transactions with the reporting NPO are a high or a low proportion of the foreign operation’s activities, including funding provided by the NPO to the foreign operation in the form of grants, donations and similar income.
(c) whether cash flows from the activities of the foreign operation directly affect the cash flows of the reporting NPO and are readily available for remittance to it.

(d) whether cash flows from the activities of the foreign operation are sufficient to service existing and normally expected debt obligations or operating expenses without funds being made available by the reporting NPO, either in the form of loans or grants, donations and similar income.

Reporting foreign currency transactions in the functional currency

Initial recognition

G30.6 A foreign currency transaction is a transaction that is denominated or requires settlement in a foreign currency, including transactions arising when an NPO:

(a) buys or sells goods or services whose price is denominated in a foreign currency;
(b) enters into transactions such as an enforceable grant arrangement (EGA) or an other funding arrangement (OFA) (grant arrangements) that are denominated in foreign currency;
(c) borrows or lends funds when the amounts payable or receivable are denominated in a foreign currency; or
(d) otherwise acquires or disposes of assets, or incurs or settles liabilities, denominated in a foreign currency.

G30.7 An NPO shall record a foreign currency transaction, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

G30.8 The date of a transaction is the date on which the transaction first qualifies for recognition in accordance with this Guidance. For practical reasons, a rate that approximates the actual rate at the date of the transaction is often used – for example, an average rate for a week or a month might be used for all transactions in each foreign currency occurring during that period. However, if exchange rates fluctuate significantly, the use of the average rate for a period is inappropriate.

G30.9 When an NPO pays or receives consideration in advance in a foreign currency, it recognises a non-monetary asset or non-monetary liability. The exchange rate to be used on the initial recognition of the related asset, expense or income (or part of it) is the exchange rate at the date on which the NPO initially recognised the non-monetary asset or the non-monetary liability arising from the payment or receipt of advance consideration.

Reporting at the end of the subsequent reporting periods

G30.10 At the end of each reporting period, an NPO shall:

(a) translate foreign currency monetary items using the closing rate;
(b) translate non-monetary items that are measured in terms of historical cost in a foreign currency using the exchange rate at the date of the transaction; and
(c) translate non-monetary items that are measured at fair value in a foreign currency using the exchange rates at the date when the fair value was determined.

G30.11 An NPO shall recognise, in surplus or deficit in the period in which they arise, exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous periods, except as described in paragraph G30.15.

G30.12 Exchange rate exchange gains or losses on monetary items such as grant receivables, cash received and held in a foreign currency and grant payables shall be presented consistent with the transaction to which the gain or loss relates. For example, if Section 36 Fund accounting [ED3] requires that a
transaction is presented within funds with restrictions, then any exchange gain or loss will also be presented within funds with restrictions.

**G30.13** When another section of this Guidance requires a gain or loss on a non-monetary item to be recognised in the Statement of Changes in Net Assets, an NPO shall recognise any exchange component of that gain or loss in the Statement of Changes in Net Assets. Conversely, when a gain or loss on a non-monetary item is recognised in surplus or deficit, an NPO shall recognise any exchange component of that gain or loss in surplus or deficit.

**Net investment in a foreign operation**

**G30.14** An NPO may have a monetary item that is receivable from or payable to a foreign operation. An item for which settlement is neither planned nor likely to occur in the foreseeable future is, in substance, a part of the NPO’s net investment in that foreign operation and is accounted for in accordance with paragraph G30.15. Such monetary items may include long-term receivables or loans. They do not include receivables or payables.

**G30.15** Exchange differences arising on a monetary item that forms part of a reporting NPO’s net investment in a foreign operation shall be recognised in surplus or deficit in the separate financial statements of the reporting NPO or the individual financial statements of the foreign operation as appropriate. In the financial statements that include the foreign operation and the reporting NPO (for example, consolidated financial statements when the foreign operation is a controlled entity), such exchange differences shall be recognised in the Statement of Changes in Net Assets and reported as a component of funds without restrictions. They shall not be recognised in surplus or deficit on disposal of the net investment.

**Change in functional currency**

**G30.16** When there is a change in an NPO’s functional currency, the NPO shall apply the translation procedures applicable to the new functional currency prospectively from the date of the change.

**G30.17** As noted in paragraphs G30.2–G30.5, the functional currency of an NPO reflects the underlying transactions, events and conditions that are relevant to the NPO. Accordingly, once the functional currency is determined, it can be changed only if there is a change to those underlying transactions, events and conditions. For example, a change in the currency that mainly influences the sales prices of goods and services may lead to a change in an NPO’s functional currency.

**G30.18** The effect of a change in functional currency is accounted for prospectively. In other words, an NPO translates all items into the new functional currency using the exchange rate at the date of the change. The resulting translated amounts for non-monetary items are treated as their historical cost.

**Use of a presentation currency other than the functional currency**

**Translation to the presentation currency**

**G30.19** An NPO may present its financial statements in any currency (or currencies). If the presentation currency differs from the NPO’s functional currency, the NPO shall translate its items of income and expense and financial position into the presentation currency. For example, when a group contains individual entities with different functional currencies, the items of income and expense and financial position of each entity are expressed in a common currency so that consolidated financial statements may be presented.

**G30.20** An NPO whose functional currency is not the currency of a hyperinflationary economy shall translate its results and financial position into a different presentation currency using the following procedures:
(a) assets and liabilities for each Statement of Financial Position presented (ie including comparatives) shall be translated at the closing rate at the date of that Statement of Financial Position;
(b) income and expenses for each Statement of Income and Expenses (ie including comparatives) shall be translated at exchange rates at the dates of the transactions; and
(c) all resulting exchange differences shall be recognised in the Statement of Changes in Net Assets and reported as part of funds without restrictions in the Statement of Income and Expenses unless otherwise specified. They shall not subsequently be reclassified to surplus or deficit.

G30.21 For practical reasons, an NPO may use a rate that approximates the exchange rates at the dates of the transactions – for example, an average rate for the period – to translate income and expense items. However, if exchange rates fluctuate significantly, the use of the average rate for a period is inappropriate.

G30.22 The exchange differences referred to in paragraph G30.20(c) result from:
(a) translating income and expenses at the exchange rates at the dates of the transactions and assets and liabilities at the closing rate; and
(b) translating the opening net assets at a closing rate that differs from the previous closing rate.

When the exchange differences relate to a foreign operation that is consolidated but not fully controlled, accumulated exchange differences arising from translation and attributable to the non-controlling interest are allocated to, and recognised as part of, non-controlling interest in the consolidated Statement of Financial Position.

G30.23 An NPO whose functional currency is the currency of a hyperinflationary economy shall translate its results and financial position into a different presentation currency using the procedures specified in Section 31 Hyperinflation.

Translation of a foreign operation into the controlling NPO’s presentation currency
G30.24 In incorporating the assets, liabilities, income and expenses of a foreign operation with those of the reporting NPO, the NPO shall follow normal consolidation procedures, such as the elimination of intragroup balances and intragroup transactions of a controlled entity (see Section 9 Consolidated and separate financial statements) and the translation procedures set out in paragraphs G30.20–G30.22. However, an intragroup monetary asset (or liability), whether short term or long term, cannot be eliminated against the corresponding intragroup liability (or asset) without showing the results of currency fluctuations in the consolidated financial statements. This is because the monetary item represents a commitment to convert one currency into another and exposes the reporting NPO to a gain or loss through currency fluctuations. Accordingly, in the consolidated financial statements, a reporting NPO continues to recognise such an exchange difference in surplus or deficit, or if it arises from the circumstances described in paragraph G30.15, the NPO shall recognise it in the Statement of Changes in Net Assets.

G30.25 Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of that foreign operation shall be treated as assets and liabilities of the foreign operation. Thus, they shall be expressed in the functional currency of the foreign operation and shall be translated at the closing rate in accordance with paragraph G30.20.

Disclosures
G30.26 In paragraphs G30.28 and G30.29, references to ‘functional currency’ apply, in the case of a group, to the functional currency of the controlling NPO.

G30.27 An NPO shall disclose the following:
(a) the amount of exchange differences recognised in surplus or deficit during the period, except for those arising on financial instruments measured at fair value through surplus or deficit in accordance with Section 11 Financial instruments;

(b) the amount of exchange differences arising during the period and classified in a separate component of net assets at the end of the period.

G30.28 An NPO shall disclose the currency in which the financial statements are presented. When the presentation currency is different from the functional currency, an NPO shall state that fact and shall disclose the functional currency and the reason for using a different presentation currency.

G30.29 When there is a change in the functional currency of either the reporting NPO or a significant foreign operation, the NPO shall disclose that fact and the reason for the change in functional currency.

G30.30 The exchange rate gains and losses that contribute to a deficit or surplus on an individual grant arrangement that is required by Section 36 to be presented within funds with restrictions shall be disclosed. The disclosure should provide details of the gain or loss in the period, and where the grant arrangement covers more than one financial reporting period, the cumulative amount of exchange rate gains and losses brought forward from previous reporting periods and carried forward to the next reporting period.

Application Guidance: Section 30 – Foreign currency translation

AG30.1 Section 30 Foreign currency translation sets out how an NPO accounts for activities carried out in currencies other than its own functional currency and sets out the principles to apply. Further guidance and illustrative examples are provided in the Implementation Guidance.

AG30.2 The functional currency is the main currency of the NPO’s activity. There are two ways in which an NPO may have activities in other currencies:

(a) it may enter into transactions, such as selling or buying goods or services, receiving or paying money, receiving or making grants or donations, borrowing or lending in currencies other than its functional currency.

(b) it may have foreign operations such as a foreign branch, controlled entity, associate or joint venture, which mainly carry out their activities in a different principal currency and hence have a different functional currency to the NPO itself.

AG30.3 In addition, an NPO may choose to prepare its financial statements in a currency that differs from its functional currency. In this event, the currency used for preparing and reporting the financial statements is defined as the presentation currency.

Functional currency

AG30.4 The functional currency of an NPO shall be identified when the NPO is established. In practice, this may occur when its general ledger is set up or when the first financial statements are prepared. Functional currency is identified through an assessment. It is not an accounting policy choice. Once the functional currency of an NPO has been identified, it shall only be changed if the circumstances considered in the assessment change.

AG30.5 The functional currency of the NPO shall be identified by considering its primary economic environment, as set out in G30.3–G30.4. The primary economic environment in which the NPO mainly operates is normally the one in which it primarily generates an expends cash. For some NPOs, this may be relatively straightforward, and the functional currency will be the domestic currency of the country of operation of the NPO. For others that have significant foreign currency transactions or foreign operations, the identification may require further analysis.

AG30.6 The most significant indicators of the economic environment are the currency that impacts grants and donations (both received and paid), the prices of its sales of goods and services, its purchases of goods...
and services, and its payment of other costs such as employees' costs. Usually this will be the currency in which these transactions are denominated and paid. If these indicators alone do not give a clear identification of the functional currency, other indicators relating to the financing of the NPO shall be considered, such as the currency of funding through equity or borrowings and the currency in which the NPO chooses to retain any significant cash surpluses.

AG30.7 If an NPO receives the majority of its funding in a currency other than its domestic currency, then it shall perform a detailed assessment to identify its functional currency.

AG30.8 Where the NPO has foreign operations such as a branch, controlled entity, associate or joint arrangement, the functional currency of the foreign operation shall also be identified. As set out in G30.5, the initial consideration is to decide whether the foreign operation has a separate economic environment to the NPO holding the foreign operation (the controlling NPO).

AG30.9 If the foreign operation has a separate economic environment, the functional currency of the foreign operation shall be assessed independently from that of the controlling NPO. This shall be assessed using the same approach as for any stand-alone NPO, as set out in G30.3–G30.4.

AG30.10 If the foreign operation does not have a separate economic environment, then the functional currency of the controlling NPO and foreign operation will be the same.

AG30.11 The factors to consider when identifying if the economic environment of the foreign operation is different from that of the controlling NPO are set out in G30.5. The four factors listed are means to assess the degree of financial interaction and dependency between the controlling NPO and the foreign operation. If there is very little interaction, so that the foreign operation mostly manages its own finances, it is probable that they have a separate economic environment. If there is a significant transfer of cash or funds between the controlling NPO and the foreign operation in the form of investment, remittances, payments or receipts for goods and services, or grants or donations, it is probable that they have the same economic environment.

Reporting foreign currency transactions in the functional currency

AG30.12 At each balance sheet date, foreign currency monetary items should be translated using the closing exchange rate, which is the spot exchange rate at the balance sheet date. Monetary items are items either held in cash or items that will result in a future inflow or outflow of cash – for example, debtors, grant receivables, creditors, grant payables, loans or borrowings.

AG30.13 Where another section of INPAG – for example, Section 36 Fund accounting [ED3] – requires a transaction to be presented within funds with restrictions, the exchange rate differences arising from retranslation of monetary items relating to that transaction (such as grant receivables or grant payables) shall be presented consistent with that transaction. The underlying principle is that exchange differences follow the presentation of the transaction to which it relates.

AG30.14 Where a monetary item such as a foreign currency bank account includes a number of transactions, it might not be possible to identify the retranslated balance relating to an individual grant arrangement. Where this is the case, the total exchange gain or loss should be allocated, with the allocation method being a suitable proxy for the cash balance on an individual grant arrangement.

AG30.15 Non-monetary items such as property, plant and equipment or intangible assets measured at historical cost shall continue to be translated at the exchange rate used at the date of the initial transaction. As a result, no further foreign exchange translation arises on these items after their initial recognition.

AG30.16 Non-monetary items that are measured at fair value (for example, property plant and equipment held at fair value) shall be translated using the exchange rate when the fair value was determined. Hence, these items will be re-translated at subsequent balance sheet dates.
AG30.17 Payments made in advance by grant providers under an EGA that has unfulfilled enforceable grant obligations (EGOs) (grant arrangement liabilities) and amounts received in advance by a grant recipient under an EGA that has unfulfilled EGOs (grant arrangement assets) are non-monetary items.

AG30.18 If an EGO increases, or a new obligation under an EGA is recognised due to the effect of changes in exchange rates, the additional obligation is recognised as a provision (onerous contract) in accordance with Section 21 Provisions and contingencies. The corresponding expense shall be presented in the financial statements and the notes to the financial statements consistent with the transaction to which it relates.

AG30.19 If the impact of the change in exchange rates is to require a refund to the grantor or donor, the refund shall be a reduction to revenue. The reduction to revenue shall follow the presentation required for the EGA or OFA (grant arrangement) to which it relates. If insufficient revenue has been recognised, the balance shall:

(i) be deducted from the grant arrangement liability for the unfulfilled EGOs relating to the EGA; or
(ii) create a liability and a new expense if insufficient revenue has been recognised.

AG30.20 The terms of an EGA may require the NPO to spend all the money it received under that EGA, including any exchange gains on specified activities, even if all EGOs have been met. This requirement shall have no impact on the reported results of the NPO as it relates to future expenses.

AG30.21 Exchange gains or losses arising from a grant arrangement that is presented within funds with restrictions, to the extent that they are not offset by any other impacts unrelated to a change in exchange rates, shall be transferred to/from funds without restrictions. Transfers should be recognised only when the funds no longer meet the definition of restricted funds under G2.74.

Use of a presentation currency other than the functional currency
AG30.22 It is permitted to present the financial statements in any currency. This may be desirable where the functional currency is not the domestic currency of the NPO or if the NPO needs financial statements in a particular currency for a specific purpose – for example, where this has been requested by a donor. Hence, the presentation currency used for a set of financial statements is a choice. Where a presentation currency other than the functional currency is used to present the financial statements, the approach set out in G30.20–G30.23 shall be applied to the financial statements in their entirety. Presentation of a part of the financial statements – for example, just the Statement of Income and Expense in the donor’s currency – is not permissible within the primary financial statements. Any partial presentation shall be presented outside the financial statements. This can be either in supplementary statements [ED3] or in special purpose financial information.

AG30.23 A frequent application of the use of a presentation currency is for the translation of the results of a foreign operation with a different functional currency to the controlling NPO. This allows the financial statements to be presented in a common currency, which is usually the functional currency of the controlling NPO.

AG30.24 Where monetary assets or liabilities are held between the controlling NPO and a foreign operation (for example, a loan or short-term payable from one party to the other), consolidation in a common currency will not eliminate any foreign exchange gain or loss arising in the financial statements of the party holding the foreign currency item. As a result, any foreign exchange gain or loss arising will be reported in the consolidated financial statements, even though the intergroup assets or liabilities themselves are eliminated on consolidation.

Disclosure
AG30.25 Where grantors or donors do not accept exchange rate risk, exchange rate losses will ultimately be funded by the NPO from its funds without restrictions. Where a transfer is required between funds with restrictions and funds without restrictions as a result of an exchange rate loss on a grant arrangement, these movements shall be separately presented from all other movements, as required by G30.30.
### Comparison of Section 30 with the IFRS for SMEs Accounting Standard

Section 30 of INPAG has been drawn from Section 30 of the IFRS for SMEs Accounting Standard. The main differences between Section 30 of the draft Third edition of the IFRS for SMEs Accounting Standard and Section 30 of INPAG are as follows:

- INPAG Section 30 uses different terminology, referring specifically to NPOs rather than entities more generally. It also uses the names of the primary statements proposed in INPAG and uses surplus or deficit instead of profit or loss.
- The factors for determining the functional currency for the NPO and its foreign operations have been broadened from the draft Third edition of the IFRS for SMEs Accounting Standard to include grants and donations.
- Similarly, the types of foreign currency transactions that might be relevant have been broadened to include EGAs and OFAs (grant arrangements).
- INPAG Section 30 requires exchange rate gains and losses on monetary items to be presented in the financial statements and in the accompanying notes in accordance with the transaction to which it relates.
- INPAG Section 30 has replaced ‘component of equity’ with ‘net assets’ in describing where exchange gains and losses should be disclosed.
- INPAG Section 30 includes additional disclosures where there are surpluses or deficits arising from exchange rate gains and losses on an individual grant arrangement where that grant arrangement is required to be presented within funds with restrictions.

Section 31 – Hyperinflation

Scope of this section
G31.1 This section applies to an NPO whose functional currency is the currency of a hyperinflationary economy. It requires such an NPO to prepare financial statements that have been adjusted for the effects of hyperinflation.

Hyperinflationary economy
G31.2 This section does not establish an absolute rate at which an economy is deemed hyperinflationary. An NPO shall make that judgement by considering all available information, including but not limited to the following possible indicators of hyperinflation:

(a) the general population prefers to keep its wealth in non-monetary assets or in a relatively stable foreign currency. Amounts of local currency held are immediately invested to maintain purchasing power.
(b) the general population regards monetary amounts not in terms of the local currency but in terms of a relatively stable foreign currency. Prices may be quoted in that currency.
(c) sales and purchases on credit take place at prices that compensate for the expected loss of purchasing power during the credit period, even if the period is short.
(d) interest rates, wages and prices are linked to a price index.
(e) the cumulative inflation rate over three years is approaching or exceeds 100 per cent.

Measuring unit in the financial statements
G31.3 All amounts in the financial statements of an NPO whose functional currency is the currency of a hyperinflationary economy shall be stated in terms of the measuring unit current at the end of the reporting period. The comparative information for the previous period required by paragraph G3.14, and any information presented in respect of earlier periods, shall also be stated in terms of the measuring unit current at the reporting date.

G31.4 The restatement of financial statements in accordance with this section requires the use of a general price index that reflects changes in general purchasing power. In most economies, there is a recognised general price index, normally produced by the government, that entities will follow.

Procedures for restating historical cost financial statements

Statement of Financial Position
G31.5 Statement of Financial Position amounts not expressed in terms of the measuring unit current at the end of the reporting period are restated by applying a general price index.

G31.6 Monetary items are not restated because they are expressed in terms of the measuring unit current at the end of the reporting period. Monetary items are money held and items to be received or paid in money.

G31.7 Assets and liabilities linked by agreement to changes in prices, such as index-linked bonds and loans, are adjusted in accordance with the agreement and presented at this adjusted amount in the restated Statement of Financial Position.

G31.8 All other assets and liabilities are non-monetary:
(a) some non-monetary items are carried at amounts current at the end of the reporting period, such as net realisable value and fair value, so they are not restated. All other non-monetary assets and liabilities are restated.

(b) most non-monetary items are carried at cost or cost less depreciation; hence they are expressed at amounts current at their date of acquisition. The restated cost, or cost less depreciation, of each item is determined by applying to its historical cost and accumulated depreciation the change in a general price index from the date of acquisition to the end of the reporting period.

(c) some non-monetary items are carried at amounts current at dates other than that of acquisition or the reporting date – for example, property, plant and equipment that has been revalued at some earlier date. In these cases, the carrying amounts are restated from the date of the revaluation.

(d) the restated amount of a non-monetary item is reduced in accordance with Section 27 Impairment of assets when it exceeds its recoverable amount.

G31.9 At the beginning of the first period of application of this section, the components of net assets, except funds with restrictions and funds without restrictions (including any revaluation surplus), are restated by applying a general price index from the dates the components were contributed or otherwise arose. Any revaluation surplus that arose in previous periods is eliminated. Restated funds with restrictions and funds without restrictions are derived from all the other amounts in the restated Statement of Financial Position.

G31.10 At the end of the first period and in subsequent periods, all components of equity claims are restated by applying a general price index from the beginning of the period or the date of contribution, if later. The changes for the period in equity claims are disclosed in accordance with Section 6 Statement of Changes in Net Assets.

Statement of Income and Expenses and Statement of Changes in Net Assets

G31.11 All items in the Statement of Income and Expenses and Statement of Changes in Net Assets shall be expressed in terms of the measuring unit current at the end of the reporting period. Consequently, all amounts need to be restated by applying the change in the general price index from the dates when the items of income and expenses were initially recognised in the financial statements. If general inflation is approximately even throughout the period, and the items of income and expense arose approximately evenly throughout the period, an average rate of inflation may be appropriate.

Statement of Cash Flows

G31.12 An NPO shall express all items in the Statement of Cash Flows in terms of the measuring unit current at the end of the reporting period.

Gain or loss on net monetary position

G31.13 In a period of inflation, an NPO holding an excess of monetary assets over monetary liabilities loses purchasing power, and an NPO with an excess of monetary liabilities over monetary assets gains purchasing power, to the extent the assets and liabilities are not linked to a price level. An NPO shall include in surplus or deficit the gain or loss on the net monetary position. An NPO shall offset the adjustment to those assets and liabilities linked by agreement to changes in prices made in accordance with paragraph G31.7 against the gain or loss on net monetary position.

Economies ceasing to be hyperinflationary

G31.14 When an economy ceases to be hyperinflationary and an NPO discontinues the preparation and presentation of financial statements prepared in accordance with this section, it shall treat the amounts expressed in the presentation currency at the end of the previous reporting period as the basis for the carrying amounts in its subsequent financial statements.
Disclosures

G31.15 An NPO to which this section applies shall disclose the following:

(a) the fact that financial statements and other prior period data have been restated for changes in the general purchasing power of the functional currency;
(b) the identity and level of the price index at the reporting date and changes during the current reporting period and the previous reporting period; and
(c) amount of gain or loss on monetary items.

Comparison of Section 31 with the IFRS for SMEs Accounting Standard

Section 31 of INPAG has been drawn from Section 31 of the IFRS for SMEs Accounting Standard, with changes only to terminology and to align with the statements required by INPAG. The main differences between Section 31 of the draft Third edition of the IFRS for SMEs Accounting Standard and Section 31 of INPAG are as follows:

- Reference to the statement of comprehensive income and income statement have been replaced by the Statement of Income and Expenses and the Statement of Changes in Net Assets.
- INPAG Section 31 uses different terminology, referring specifically to NPOs rather than entities more generally, and to other sections of INPAG rather than the IFRS for SMEs Accounting Standard.

Section 32 – Events after the end of the reporting period

Scope of this section

G32.1 This section defines events after the end of the reporting period and sets out principles for recognising, measuring and disclosing those events.

Events after the end of the reporting period defined

G32.2 Events after the end of the reporting period are those events, favourable and unfavourable, that occur between the end of the reporting period and the date when the financial statements are authorised for issue. There are two types of events:

(a) those that provide evidence of conditions that existed at the end of the reporting period (adjusting events after the end of the reporting period); and
(b) those that are indicative of conditions that arose after the end of the reporting period (non-adjusting events after the end of the reporting period).

G32.3 Events after the end of the reporting period include all events up to the date when the financial statements are authorised for issue, even if those events occur after the public announcement of surplus or deficit or other selected financial information.

Recognition and measurement

Adjusting events after the end of the reporting period

G32.4 An NPO shall adjust the amounts recognised in its financial statements, including related disclosures, to reflect adjusting events after the end of the reporting period.

G32.5 The following are examples of adjusting events after the end of the reporting period that require an NPO to adjust the amounts recognised in its financial statements, or to recognise items that were not previously recognised:

(a) the settlement after the end of the reporting period of a court case that confirms that the NPO had a present obligation at the end of the reporting period. The NPO adjusts any previously recognised provision related to this court case in accordance with Section 21 Provisions and contingencies or recognises a new provision. The NPO does not merely disclose a contingent liability. Instead, the settlement provides additional evidence to be considered in determining the provision that should be recognised at the end of the reporting period in accordance with Section 21.

(b) the receipt of information after the end of the reporting period indicating that an asset was impaired at the end of the reporting period or that the amount of a previously recognised impairment loss for that asset needs to be adjusted. For example:

(i) the bankruptcy of a customer or grant provider that occurs after the end of the reporting period usually confirms that a loss existed at the end of the reporting period on a receivable and that the NPO needs to adjust the carrying amount of the receivable; and

(ii) the sale of inventories after the end of the reporting period may give evidence about their selling price at the end of the reporting period for the purpose of assessing impairment at that date.

(c) the determination after the end of the reporting period of the cost of assets purchased, or the proceeds from assets sold, before the end of the reporting period.
(d) the determination after the end of the reporting period of the amount of bonus payments, if the entity had a legal or constructive obligation at the end of the reporting period to make such payments as a result of events before that date (see Section 28 Employee benefits).

(e) the discovery of fraud or errors that show that the financial statements are incorrect.

Non-adjusting events after the end of the reporting period

G32.6 An NPO shall not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the end of the reporting period.

G32.7 Examples of non-adjusting events after the end of the reporting period include:

(a) a decline in market value of investments between the end of the reporting period and the date when the financial statements are authorised for issue. The decline in market value does not normally relate to the condition of the investments at the end of the reporting period, but reflects circumstances that have arisen subsequently. Consequently, an NPO does not adjust the amounts recognised in its financial statements for the investments. Similarly, the NPO does not update the amounts disclosed for the investments as at the end of the reporting period, although it may need to give additional disclosure in accordance with paragraph G32.10.

(b) an amount that becomes receivable as a result of a favourable judgement or settlement of a court case after the reporting date but before the financial statements are authorised for issue. This would be a contingent asset at the reporting date (see paragraph G21.14) and disclosure may be required by paragraph G21.17. However, agreement on the amount of damages for a judgment that was reached before the reporting date but was not previously recognised because the amount could not be measured reliably may constitute an adjusting event.

Distributions

G32.8 If an NPO declares a distribution to holders of equity claims after the end of the reporting period, the NPO shall not recognise those distributions as a liability at the end of the reporting period. The amount of the distribution may be presented as a segregated component of funds with restrictions or funds without restrictions at the end of the reporting period.

Disclosure

Date of authorisation for issue

G32.9 An NPO shall disclose the date when the financial statements were authorised for issue and who gave that authorisation. If others have the power to amend the financial statements after issue, the NPO shall disclose that fact.

Non-adjusting events after the end of the reporting period

G32.10 An NPO shall disclose the following for each category of non-adjusting event after the end of the reporting period:

(a) the nature of the event; and

(b) an estimate of its financial effect or a statement that such an estimate cannot be made.

G32.11 The following are examples of non-adjusting events after the end of the reporting period that would generally result in disclosure; the disclosures will reflect information that becomes known after the end of the reporting period but before the financial statements are authorised for issue:

(a) a major business combination or disposal of a major controlled entity;

(b) announcement of a plan to discontinue an operation;
(c) major purchases of assets, disposals or plans to dispose of assets, or expropriation of major assets by government;
(d) the destruction of a major production plant by a fire;
(e) announcement, or commencement of the implementation, of a major restructuring;
(f) issues or repurchases of an NPO’s debt or equity claims;
(g) abnormally large changes in asset prices or foreign exchange rates;
(h) changes in tax rates or tax laws enacted or announced that have a significant effect on current and deferred tax assets and liabilities;
(i) entering into significant commitments or contingent liabilities – for example, by issuing significant guarantees; and
(j) commencement of major litigation arising solely out of events that occurred after the end of the reporting period.

Comparison of Section 32 with the IFRS for SMEs Accounting Standard
Section 32 of INPAG has been drawn from Section 32 of the IFRS for SMEs Accounting Standard, with changes only to terminology and to align with the statements required by INPAG. The main differences between Section 32 of the draft Third edition of the IFRS for SMEs Accounting Standard and Section 32 of INPAG are as follows:

• References to profit sharing have been removed, as they are not expected to be a feature of NPO remuneration arrangements.
• References to ‘trade receivables’ have been changed to ‘receivables’ as the primary objective of NPO is not expected to be ‘trade’.
• A specific reference to the ‘entity’s owners’ as having the power to amend the financial statements after issue has been removed.
• INPAG Section 32 uses different terminology, referring specifically to NPOs rather than entities more generally, and to other sections of INPAG rather than the IFRS for SMEs Accounting Standard.

Specific matter for comment

Question 12: Events after the end of the reporting period

(a) Do you agree that there are no significant changes required to Section 32, other than those that have already been made for alignment purposes? If not, set out alignment changes required.

Section 35 was included in Exposure Draft 1 for comment: Section 35 Narrative reporting. The feedback received will be incorporated into the final version of INPAG.

Sections 33, 34, 36, 37 and 38 will be included in ED3.
Glossary of terms

This glossary is an integral part of INPAG.

Not all of the terms included in this glossary are used in ED2. Additional terms may be added as INPAG is developed. All terms will be used in the final INPAG.

accounting estimates  Monetary amounts in financial statements that are subject to measurement uncertainty.
accounting policies  The specific principles, bases, conventions, rules and practices applied by an entity in preparing and presenting financial statements.
accounting profit  Profit or loss for a period before deducting tax expense.
accumulating compensated absences  Compensated absences that are carried forward and can be used in future periods if the current period’s entitlement is not used in full.
active market  A market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.
acquiree  The business or businesses that the acquirer obtains control of in a business combination.
acquirer  The entity that obtains control of the acquiree.
aggregation  The adding together of assets, liabilities, equity, income or expenses that have shared characteristics and are included in the same classification.
agricultural activity  The management by an entity of the biological transformation of biological assets for sale, into agricultural produce or into additional biological assets.
agricultural produce  The harvested product of the entity’s biological assets.
amortisation  The systematic allocation of the depreciable amount of an asset over its useful life.
amortised cost of a financial asset or financial liability  The amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectability.
asset  A present economic resource controlled by the entity as a result of past events.
associate  An entity, including an unincorporated entity such as a partnership, over which the controlling NPO has significant influence and that is neither a controlled entity nor an interest in a joint arrangement.
bearer plant  A bearer plant is a living plant that:
(a) is used in the production or supply of agricultural produce;
(b) is expected to bear produce for more than one period; and
(c) has a remote likelihood of being sold as agricultural produce, except for incidental scrap sales.
beneficial interest  An interest resulting from the control of another entity that arises other than through equity ownership.
biological asset  A living animal or plant.
borrowing costs  Interest and other costs incurred by an entity in connection with the borrowing of funds.
business  An integrated set of activities and assets that is capable of being conducted and managed for the purpose of:
(a) providing goods or services to customers;
(b) generating investment income (such as dividends or interests); or
(c) generating other income from ordinary activities.
business combination  A transaction or other event in which an acquirer obtains control of one or more businesses.

<tr>
<td>carrying amount</td>
<td>The amount at which an asset, liability or equity is recognised in the Statement of Financial Position.</td>
</tr>
<tr>
<td>cash</td>
<td>Cash on hand and demand deposits.</td>
</tr>
<tr>
<td>cash equivalent</td>
<td>Short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value.</td>
</tr>
<tr>
<td>cash flows</td>
<td>Inflows and outflows of cash and cash equivalents.</td>
</tr>
<tr>
<td>cash-generating unit</td>
<td>The smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.</td>
</tr>
<tr>
<td>cash-settled share-based payment transaction</td>
<td>A share-based payment transaction in which the entity acquires goods or services by incurring a liability to transfer cash or other assets to the supplier of those goods or services for amounts that are based on the price (or value) of equity instruments (including shares or share options) of the entity or another group entity.</td>
</tr>
<tr>
<td>class of assets</td>
<td>A grouping of assets of a similar nature and use in an entity's operations.</td>
</tr>
<tr>
<td>classification</td>
<td>The sorting of assets, liabilities, equity, funds in net assets, income or expenses on the basis of shared characteristics for presentation and disclosure purposes.</td>
</tr>
<tr>
<td>close members of the family of a person</td>
<td>Those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity, including:</td>
</tr>
<tr>
<td></td>
<td>(a) that person's children and spouse or domestic partner;</td>
</tr>
<tr>
<td></td>
<td>(b) children of that person's spouse or domestic partner;</td>
</tr>
<tr>
<td></td>
<td>(c) dependants of that person or that person's spouse or domestic partner.</td>
</tr>
<tr>
<td>combined financial statements</td>
<td>Financial statements of a reporting entity that comprises two or more entities that are not all linked by a parent–subsidiary (controlling NPO-controlled entity) relationship.</td>
</tr>
<tr>
<td>component of an entity</td>
<td>Operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity.</td>
</tr>
<tr>
<td>compound financial instrument</td>
<td>A financial instrument that, from the issuer's perspective, contains both a liability and an equity element.</td>
</tr>
<tr>
<td>consolidated financial statements</td>
<td>The financial statements of a controlling NPO and its controlled entities presented as those of a single economic entity.</td>
</tr>
<tr>
<td>construction contract</td>
<td>A contract specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.</td>
</tr>
<tr>
<td>constructive obligation</td>
<td>An obligation that derives from an entity's actions where:</td>
</tr>
<tr>
<td></td>
<td>(a) by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities; and</td>
</tr>
<tr>
<td></td>
<td>(b) as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.</td>
</tr>
<tr>
<td>contingent asset</td>
<td>A possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.</td>
</tr>
<tr>
<td>contingent consideration</td>
<td>Usually, an obligation of the acquirer to transfer additional assets or equity interests to the former owners of an acquiree as part of the exchange for control of the acquiree if specified future events occur or conditions are met. However, contingent consideration also may give the acquirer the right to the return of previously transferred consideration if specified conditions are met.</td>
</tr>
</tbody>
</table>
contingent liability  
(a) A possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity or:  
(b) a present obligation that arises from past events but is not recognised because:  
(i) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation, or  
(ii) the amount of the obligation cannot be measured with sufficient reliability.

contract  
An agreement between two or more parties that creates enforceable rights and obligations.

contract asset  
An NPO's right to consideration in exchange for goods or services that the NPO has transferred to a customer when that right is conditioned on something other than the passage of time (for example, the NPO's future performance).

contract liability  
An NPO's obligation to transfer goods or services to a customer for which the NPO has received consideration (or the amount is due) from the customer.

contributions from holders of equity claims  
An inflow of resources to an NPO, contributed by parties external to the NPO, which establishes or increases a financial interest in the net assets of the NPO.

control (of an entity)  
A controlling NPO controls an investee (controlled entity) when the controlling NPO is exposed or has rights to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

controlled entity  
An entity that is controlled by another entity.

controlling NPO  
The NPO that has control of an entity as a result of the application of the principles of control.

credit loss  
The difference between all contractual cash flows that are due to an entity in accordance with the contract and all the cash flows that the entity expects to receive (that is, all cash shortfalls), discounted at the original effective interest rate.

current tax  
The amount of income tax payable (recoverable) in respect of the taxable profit (tax loss) for the current period or past periods.

customer  
A party that has contracted with an NPO to obtain goods or services that are an output of the NPO's ordinary activities in exchange for consideration.

date of initial application  
The date an entity first applies the first edition of INPAG.

date of transition to INPAG  
The beginning of the earliest period for which an NPO presents full comparative information under INPAG in its first financial statements that comply with INPAG.

deductible temporary differences  
Temporary differences that will result in amounts that are deductible in determining taxable profit (tax loss) of future periods when the carrying amount of the asset or liability is recovered or settled.

deferred tax  
Income tax payable (recoverable) in respect of the taxable profit (tax loss) for future periods as a result of past transactions or events.

deferred tax assets  
The amounts of income tax recoverable in future periods in respect of:  
(a) deductible temporary differences;  
(b) the carry forward of unused tax losses; and  
(c) the carry forward of unused tax credits.

deferred tax liabilities  
The amounts of income tax payable in future periods in respect of taxable temporary differences.

defined benefit liability  
The present value of the defined benefit obligation at the reporting date minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

defined benefit obligation  
The expected future payments, without deducting any plan assets, required to settle the obligation resulting from employee service in the current and prior periods.

defined benefit plans  
Post-employment benefit plans other than defined contribution plans.

defined contribution plans  
Post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions or to make direct benefit payments to employees if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.
**depreciable amount** The cost of an asset, or other amount substituted for cost (in the financial statements), less its residual value.

**depreciation** The systematic allocation of the depreciable amount of an asset over its useful life.

**derecognition** The removal of all or part of a recognised asset or liability from an entity's Statement of Financial Position.

**development** The application of research findings or other knowledge to a plan or design for the production of new or substantially improved materials, devices, products, processes, systems or services before the start of commercial production or use.

**discontinued operation** A component of an entity that either has been disposed of or is held for sale and:

(a) represents a separate major line of business or geographical area of operations;
(b) is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or
(c) is a controlled entity acquired exclusively with a view to resale.

**distributions to holders of equity claims** An outflow of resources from an NPO, distributed to parties external to the NPO, which returns or reduces a financial interest in the net assets of the NPO. It may also be an inflow of resources to an NPO in return for its financial interest in the net assets of another entity (for example, a dividend received).

**dividends** Distributions of profits to holders of equity instruments in proportion to their holdings of a particular class of capital.

**economic phenomena** Economic phenomena are economic resources, claims against those resources, and the effects of transactions and other events and conditions that change those resources and claims.

**economic resource** A right that has the potential to produce economic benefits or service potential.

**effective interest method** A method of calculating the amortised cost of a financial asset or a financial liability (or a group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period.

**effective interest rate** The rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

**effectiveness of a hedge** The degree to which changes in the fair value or cash flows of the hedged item that are attributable to a hedged risk are offset by changes in the fair value or cash flows of the hedging instrument.

**employee benefits** All forms of consideration given by an entity in exchange for service rendered by employees.

**enforceable grant arrangement (EGA)** A grant arrangement where both a donor and grant recipient have both rights and obligations, enforceable through legal or equivalent means. A grant recipient's undertakings under an EGA are EGOs. An EGA must have at least one EGO.

**enforceable grant arrangement asset** An NPO's right to a grant amount for satisfying its EGOs in an EGA prior to the grant provider transferring resources.

**enforceable grant arrangement liability** An NPO's obligation to satisfy its EGO in an EGA for which the NPO has received consideration (or the amount is due) from the grant provider.

**enforceable grant obligation (EGO)** A grant recipient's undertaking in an EGA to achieve a specified outcome, to carry out a specified activity, to use distinct services, goods or other assets internally for a specified purpose or to transfer distinct services, goods, cash or other assets to a service recipient.

**enhancing qualitative characteristic** A qualitative characteristic that makes useful information more useful. The enhancing qualitative characteristics are comparability, verifiability, timeliness and understandability.

**equity** The residual interest in the assets of an entity after deducting all its liabilities.

**equity claim** A claim on the residual interest in the assets of an entity after deducting all its liabilities.

**equity-settled share-based payment transaction** A share-based payment transaction in which the entity:

(a) receives goods or services as consideration for its own equity instruments (including shares or share options); or
(b) receives goods or services but has no obligation to settle the transaction with the supplier.
errors
Omissions from, and misstatements in, the entity's financial statements for one or more prior
periods arising from a failure to use, or misuse of, reliable information that:
   (a) was available when financial statements for those periods were authorised for issue; and
   (b) could reasonably be expected to have been obtained and taken into account in the
preparation and presentation of those financial statements.

executory contract
A contract, or a portion of a contract, that is equally unperformed– neither party has fulfilled any
of its obligations, or both parties have partially fulfilled their obligations to an equal extent.

existence uncertainty
Uncertainty about whether an asset or liability exists.

expenses
Decreases in assets or increases in liabilities that result in decreases in net assets, other than
those relating to distributions to holders of equity claims.

fair presentation
Faithful representation of the effects of transactions, other events and conditions in accordance
with the definitions and recognition criteria for assets, liabilities, income and expenses.

fair value
The price that would be received to sell, or paid to transfer a liability, in an orderly transaction
between market participants at the measurement date.

finance lease
A lease that transfers substantially all the risks and rewards incidental to ownership of an asset.
Title may or may not eventually be transferred. A lease that is not a finance lease is an operating
lease.

financial asset
Any asset that is:
   (a) cash;
   (b) an equity instrument of another entity;
   (c) a contractual right:
      (i) to receive cash or another financial asset from another entity; or
      (ii) to exchange financial assets or financial liabilities with another entity under
conditions that are potentially favourable to the entity; or
   (d) a contract that will or may be settled in the entity's own equity instruments and:
      (i) under which the entity is or may be obliged to receive a variable number of the
entity's own equity instruments; or
      (ii) that will or may be settled other than by the exchange of a fixed amount of cash or
another financial asset for a fixed number of the entity's own equity instruments. For
this purpose, the entity's own equity instruments do not include instruments that
are themselves contracts for the future receipt or delivery of the entity's own equity
instruments.

financial guarantee
closebook
A contract that requires the issuer to make specified payments to reimburse the holder for a
loss it incurs because a specified debtor fails to make payment when due in accordance with the
original or modified terms of a debt instrument.

financial instrument
A contract that gives rise to a financial asset of one entity and a financial liability or equity
instrument of another entity.

financial liability
Any liability that is a contractual obligation:
   (i) to deliver cash or another financial asset to another entity; or
   (ii) to exchange financial assets or financial liabilities with another entity under conditions
that are potentially unfavourable to the entity.

financial position
The relationship of the assets, liabilities and equity of an entity as reported in the Statement of
Financial Position.

financial statements
Structured representation of the financial position, income and expenses and cash flows of an
entity.

financing activities
Activities that result in changes in the size and composition of the equity and borrowings of the
entity.

firm commitment
A binding agreement for the exchange of a specified quantity of resources at a specified price on
a specified future date or dates.

first-time adopter of INPAG
An entity that presents its first annual financial statements that conform to INPAG, regardless of
whether its previous accounting framework was full IFRS Accounting Standards or another set of
accounting standards.
forecast transaction
An uncommitted but anticipated future transaction.

foreign operation
An entity that is a controlled entity, associate, joint arrangement or branch of a reporting NPO, the activities of which are based or conducted in a country or currency other than those of the reporting entity.

full IFRS Accounting Standards
Standards and Interpretations issued by the International Accounting Standards Board (IASB). They comprise:
(a) International Financial Reporting Standards;
(b) International Accounting Standards;
(c) IFRIC Interpretations; and
(d) SIC Interpretations.

functional currency
The currency of the primary economic environment in which the entity operates.

functional currency normalisation date
The date when an entity's functional currency no longer has either, or both, of the two characteristics of severe hyperinflation, or when there is a change in the entity's functional currency to a currency that is not subject to severe hyperinflation.

fundamental qualitative characteristic
A qualitative characteristic that financial information must possess to be useful to the primary users of general purpose financial reports. The fundamental qualitative characteristics are relevance and faithful representation.

funding (of post-employment benefits)
Contributions by an entity, and sometimes its employees, into an entity, or fund, that is legally separate from the reporting entity and from which the employee benefits are paid.

funds with restrictions
Funds that are required to be expended, invested or retained by the NPO for a specific purpose or activity as a consequence of externally imposed funding or other legal arrangements placed on the NPO by a resource provider.

funds without restrictions
Funds that are freely available to be used by an NPO for any of its purposes or activities. An NPO is free to internally designate funds for a specific purpose or activity (including designation by the NPO's board of directors), but the absence of any externally imposed funding or other legal arrangement means that they are not required to be used for this purpose or activity and are therefore not funds with restrictions.

general purpose financial statements
Financial statements directed to the general financial information needs of a wide range of users who are not in a position to demand reports tailored to meet their particular information needs.

general purpose financial reports
Financial reports that present management commentary and other narrative reporting alongside the financial information contained in the general purpose financial statements and that are directed to the general financial information needs of a wide range of users who are not in a position to demand reports tailored to meet their particular information needs.

going concern
An entity is a going concern unless management either intends to liquidate the entity, cease operations, or has no realistic alternative but to do so.

goodwill
An asset representing the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognised.

government
Government, government agencies and similar bodies whether local, national or international.

government grants
Assistance by government in the form of transfers of resources to an entity in return for past or future compliance with certain conditions relating to the operating activities of the entity.

grant provider
The party that provides a resource to the NPO.

gross investment in a lease
The aggregate of:
(a) the minimum lease payments receivable by the lessor under a finance lease; and
(b) any unguaranteed residual value accruing to the lessor.

group
A parent (controlling NPO) and all its controlled entities.
hedged item
For the purpose of special hedge accounting by NPOs under Part II of Section 11 of this Standard, a hedged item is:

(a) interest rate risk of a debt instrument measured at amortised cost;
(b) foreign exchange or interest rate risk in a firm commitment or a highly probable forecast transaction;
(c) price risk of a commodity that it holds or in a firm commitment or highly probable forecast transaction to purchase or sell a commodity; or
(d) foreign exchange risk in a net investment in a foreign operation.

hedging instrument
For the purpose of special hedge accounting by NPOs under Part II of Section 11 of this Standard, a hedging instrument is a financial instrument that meets all of the following terms and conditions:

(a) it is an interest rate swap, a foreign currency swap, a foreign currency forward exchange contract or a commodity forward exchange contract that is expected to be highly effective in offsetting a risk identified in paragraph G11.65 that is designated as the hedged risk;
(b) it involves a party external to the reporting entity (ie external to the group, segment or individual entity being reported on);
(c) its notional amount is equal to the designated amount of the principal or notional amount of the hedged item;
(d) it has a specified maturity date not later than:
   (i) the maturity of the financial instrument being hedged;
   (ii) the expected settlement of the commodity purchase or sale commitment; or
   (iii) the occurrence of the highly probable forecast foreign currency or commodity transaction being hedged
(e) it has no prepayment, early termination or extension features.

highly probable
Significantly more likely than probable.

impairment (loss)
The amount by which the carrying amount of an asset exceeds:

(a) in the case of inventories, its selling price less costs to complete and sell, or
(b) in the case of other non-financial assets, its recoverable amount.

impracticable
Applying a requirement is impracticable when the entity cannot apply it after making every reasonable effort to do so.

imputed rate of interest
The more clearly determinable of either:

(a) the prevailing rate for a similar instrument of an issuer with a similar credit rating; or
(b) a rate of interest that discounts the nominal amount of the instrument to the current cash sales price of the goods or services.

income
Increases in assets, or decreases in liabilities, that result in increases in net assets, other than those relating to contributions from holders of equity claims.

income statement
A financial statement that presents all items of income and expense recognised in a reporting period, excluding the items of other comprehensive income.

income tax
All domestic and foreign taxes that are based on taxable profits. Income tax also includes taxes, such as withholding taxes, that are payable by a controlled entity, associate or joint arrangement on distributions to the reporting entity.

insurance contract
A contract under which one party (the insurer) accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder.

intangible asset
An identifiable non-monetary asset without physical substance. Such an asset is identifiable when it:

(a) is separable, ie is capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, asset or liability; or
(b) arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.
interest rate implicit in the lease
The discount rate that, at the inception of the lease, causes the aggregate present value of (a) the minimum lease payments and (b) the unguaranteed residual value to be equal to the sum of (i) the fair value of the leased asset and (ii) any initial direct costs of the lessor.

interim financial report
A financial report containing either a complete set of financial statements or a set of condensed financial statements for an interim period.

interim period
A financial reporting period shorter than a full financial year.

International Public Sector Accounting Standards (IPSAS)
Standards and Interpretations issued by the International Public Sector Accounting Standards Board (IPSASB) for use by public sector entities other than government business enterprises. They comprise:
(a) International Public Sector Accounting Standards: and
(b) International Recommended Practice Guidelines.

intrinsic value
The difference between the fair value of the shares to which the counterparty has the (conditional or unconditional) right to subscribe or which it has the right to receive, and the price (if any) the counterparty is (or will be) required to pay for those shares. For example, a share option with an exercise price of CU15 on a share with a fair value of CU20 has an intrinsic value of CU5.

inventories
Assets:
(a) held for sale in the ordinary course of operations;
(b) held for distribution to service recipients in the ordinary course of operations;
(c) held for use in fundraising events (or similar circumstances where the items will be transferred to another party in the course of the NPO’s fundraising activities eg prizes);
(d) in the process of production for such sale; or
(e) in the form of materials or supplies to be consumed in the production process or in the rendering of services.

investing activities
The acquisition and disposal of long-term assets and other investments not included in cash equivalents.

investment property
Property (land or a building, part of a building, or both) held by the owner or by the lessee under a finance lease to earn rentals or for capital appreciation or both, instead of for:
(a) use in the production or supply of goods or services or for administrative purposes; or
(b) sale in the ordinary course of business.

joint arrangement
An arrangement in which two or more parties have joint control. Joint arrangements can take the form of jointly controlled operations, jointly controlled assets or jointly controlled entities.

joint control
The contractually agreed sharing of control of an arrangement. It exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

jointly controlled entity
A joint arrangement that involves the establishment of a corporation, partnership or other entity in which each party has an interest. The entity operates in the same way as other entities, except that an arrangement between the parties establishes joint control.

lease
An agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time.

lessee’s incremental borrowing rate of interest
The rate of interest the lessee would have to pay on a similar lease or, if that is not determinable, the rate that, at the inception of the lease, the lessee would incur to borrow over a similar term, and with a similar security, the funds necessary to purchase the asset.

liability
A present obligation of the entity to transfer an economic resource as a result of past events.

loans payable
Financial liabilities other than short-term trade payables on normal credit terms.
**market participants**

Buyers and sellers in the principal (or most advantageous) market for the asset or liability that have all of the following characteristics:

- (a) they are independent of each other – that is, they are not related parties as defined in Section 33;
- (b) they are knowledgeable, having a reasonable understanding about the asset or liability and the transaction using all available information;
- (c) they are able to enter into a transaction for the asset or liability; and
- (d) they are willing to enter into a transaction for the asset or liability – that is, they are motivated but not forced or otherwise compelled to do so.

**market vesting condition**

A performance condition upon which the exercise price, vesting or exercisability of an equity instrument depends that is related to the market price (or value) of the entity’s equity instruments (or the equity instruments of another entity in the same group), such as:

- (a) attaining a specified share price or a specified amount of intrinsic value of a share option; or
- (b) achieving a specified target that is based on the market price (or value) of the entity’s equity instruments (or the equity instruments of another entity in the same group) relative to an index of market prices of equity instruments of other entities.

A market condition requires the counterparty to complete a specified period of service (that is, a service condition); the service requirement can be explicit or implicit.

**material**

Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.

**measure**

The result of applying a measurement basis to an asset or liability and related income and expenses.

**measurement basis**

An identified feature – for example, historical cost, fair value or fulfilment value – of an item being measured.

**measurement uncertainty**

Uncertainty that arises when monetary amounts in financial reports cannot be observed directly and must instead be estimated.

**minimum lease payments**

The payments over the lease term that the lessee is or can be required to make, excluding contingent rent, costs for services and taxes to be paid by and reimbursed to the lessor, together with:

- (a) for a lessee, any amounts guaranteed by the lessee or by a party related to the lessee; or
- (b) for a lessor, any residual value guaranteed to the lessor by:
  - (i) the lessee;
  - (ii) a party related to the lessee; or
  - (iii) a third party unrelated to the lessor that is financially capable of discharging the obligations under the guarantee.

However, if the lessee has an option to purchase the asset at a price that is expected to be sufficiently lower than fair value at the date the option becomes exercisable for it to be reasonably certain, at the inception of the lease, that the option will be exercised, the minimum lease payments comprise the minimum payments payable over the lease term to the expected date of exercise of this purchase option and the payment required to exercise it.

**monetary items**

Units of currency held and assets and liabilities to be received or paid in a fixed or determinable number of units of currency.

**most advantageous market**

The market that maximises the amount that would be received to sell the asset or minimises the amount that would be paid to transfer the liability, after taking into account transaction costs and transport costs.

**multi-employer (benefit) plans**

Defined contribution plans (other than state plans) or defined benefit plans (other than state plans) that:

- (a) pool the assets contributed by various entities that are not under common control; and
- (b) use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>net investment in a lease</td>
<td>The gross investment in a lease discounted at the interest rate implicit in the lease.</td>
</tr>
<tr>
<td>non-controlling interest</td>
<td>The equity in a controlled entity not attributable, directly or indirectly, to a controlling NPO.</td>
</tr>
<tr>
<td>notes (to financial statements)</td>
<td>Notes contain information in addition to that presented in the Statement of Financial Position, Statement of Income and Expenses, Statement of Changes in Net Assets and Statement of Cash Flows. Notes provide narrative descriptions or disaggregations of items presented in those statements and information about items that do not qualify for recognition in those statements.</td>
</tr>
<tr>
<td>notional amount</td>
<td>The quantity of currency units, shares, bushels, pounds or other units specified in a financial instrument contract.</td>
</tr>
<tr>
<td>objective of financial statements</td>
<td>To provide information about the financial position, income and expenses and cash flows of an entity that is useful for decision-making by a broad range of users who are not in a position to demand reports tailored to meet their particular information needs.</td>
</tr>
<tr>
<td>observable inputs</td>
<td>Inputs that are developed using market data, such as publicly available information about actual events or transactions, and that reflect the assumptions that market participants would use when pricing the asset or liability.</td>
</tr>
<tr>
<td>offsetting</td>
<td>Grouping an asset and liability that are recognised and measured as separate units of account into a single net amount in the Statement of Financial Position.</td>
</tr>
<tr>
<td>onerous contract</td>
<td>A contract in which the unavoidable costs of meeting the obligations under the contract EGA exceed the economic benefits expected to be received under it.</td>
</tr>
<tr>
<td>operating activities</td>
<td>The principal activities of the entity that are not investing or financing activities.</td>
</tr>
<tr>
<td>operating lease</td>
<td>A lease that does not transfer substantially all the risks and rewards incidental to ownership. A lease that is not an operating lease is a finance lease.</td>
</tr>
<tr>
<td>orderly transaction</td>
<td>A transaction that assumes exposure to the market for a period before the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).</td>
</tr>
<tr>
<td>other comprehensive income</td>
<td>Items of income and expense (including reclassification adjustments) that are not recognised in profit or loss as required or permitted by the IFRS for SMEs Accounting Standard.</td>
</tr>
<tr>
<td>outcome uncertainty</td>
<td>Uncertainty about the amount or timing of any inflow or outflow of economic benefits that will result from an asset or liability.</td>
</tr>
<tr>
<td>parent</td>
<td>An entity that has one or more subsidiaries or controlled entities. The term ‘controlling NPO’ is used where an NPO is a parent.</td>
</tr>
<tr>
<td>performance condition</td>
<td>A vesting condition that requires:</td>
</tr>
<tr>
<td></td>
<td>(a) the counterparty to complete a specified period of service (that is, a service condition); the service requirement can be explicit or implicit; and (b) specified performance target(s) to be met while the counterparty is rendering the service required in (a). The period of achieving the performance target(s):</td>
</tr>
<tr>
<td></td>
<td>(a) shall not extend beyond the end of the service period; and (b) may start before the service period on the condition that the commencement date of the performance target is not substantially before the commencement of the service period.</td>
</tr>
<tr>
<td></td>
<td>A performance target is defined by reference to:</td>
</tr>
<tr>
<td></td>
<td>(a) the entity’s own operations (or activities) or the operations or activities of another entity in the same group (that is, a non-market condition); or (b) the price (or value) of the entity’s equity instruments or the equity instruments of another entity in the same group (including shares and share options) (that is, a market condition).</td>
</tr>
<tr>
<td></td>
<td>A performance target might relate either to the performance of the entity as a whole or to some part of the entity (or part of the group), such as a division or an individual employee.</td>
</tr>
<tr>
<td>plan assets (of an employee benefit plan)</td>
<td>Assets held by a long-term employee benefit fund and qualifying insurance policies.</td>
</tr>
<tr>
<td>post-employment benefits</td>
<td>Employee benefits (other than termination benefits) that are payable after the completion of employment.</td>
</tr>
</tbody>
</table>
post-employment benefit plans
Formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

potential to produce economic benefits
Within an economic resource, a right that already exists and that, in at least one circumstance, would produce for the entity economic benefits or service potential beyond those available to all other parties.

present value
A current estimate of the present discounted value of the future net cash flows in the normal course of operations.

presentation currency
The currency in which the financial statements are presented.

primary users
Existing and potential investors, lenders and other creditors.

principal market
The market with the greatest volume and level of activity for the asset or liability.

probable
More likely than not.

profit or loss
The total of income less expenses, excluding the components of other comprehensive income of for-profit entities.

projected unit credit method
An actuarial valuation method that sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method).

promise (in a contract with a customer)
An obligation to transfer a good or service (or bundle of goods or services) that is distinct.

property, plant and equipment
Tangible assets that:

(a) are held for use in the production or supply of goods or services, for rental to others or for administrative purposes; and
(b) are expected to be used during more than one period.

prospective application (of a change in accounting policy)
Applying the new accounting policy to transactions, other events and conditions occurring after the date as at which the policy is changed.

provision
A liability of uncertain timing or amount.

prudence
The exercise of caution when making judgements under conditions of uncertainty. The exercise of prudence means that assets and income are not overstated and liabilities and expenses are not understated. Equally, the exercise of prudence does not allow for the understatement of assets or income or the overstatement of liabilities or expenses.

public accountability
An entity has public accountability if:

(a) its debt or equity instruments are traded in a public market, or it is in the process of issuing such instruments for trading in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or
(b) it holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses (for example, banks, credit unions, insurance companies, securities brokers/dealers, mutual funds and investment banks often meet this second criterion).

publicly traded (debt or equity instruments)
Traded, or in process of being issued for trading, in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets).

recognition
The process of capturing for inclusion in the Statement of Financial Position or the statement(s) of financial performance an item that meets the definition of one of the elements of financial statements – an asset, a liability, equity, income or expenses. Recognition involves depicting the item in one of those statements – either alone or in aggregation with other items – in words and by a monetary amount and including that amount in one or more totals in that statement.

recoverable amount
The higher of an asset's (or cash-generating unit's) fair value less costs to sell and its value in use.
related party

A related party is a person or entity that is related to the entity that is preparing its financial statements (the reporting entity):

(a) a person or a close member of that person's family is related to a reporting entity if that person:
   (i) is a member of the key management personnel of the reporting entity or of a parent of the reporting entity;
   (ii) has control or joint control over the reporting entity; or
   (iii) has significant influence over the reporting entity.

(b) an entity is related to a reporting entity if any of the following conditions apply:
   (i) the entity and the reporting entity are members of the same group (which means that each controlling NPO, controlled entity and fellow controlled entity is related to the others);
   (ii) one entity is an associate or jointly controlled entity of the other entity (or an associate or jointly controlled entity of a member of a group of which the other entity is a member);
   (iii) both entities are jointly controlled entities of the same third entity;
   (iv) one entity is a jointly controlled entity of a third entity, and the other entity is an associate of the third entity;
   (v) the entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity;
   (vi) the entity is controlled or jointly controlled by a person identified in (a);
   (vii) the entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity;
   (viii) a person identified in (a)(ii) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

related party transaction

A transfer of resources, services or obligations between related parties, regardless of whether a price is charged.

relevance

Relevant financial information is capable of making a difference in the decisions made by users.

relevant activities (of an investee)

The activities that significantly affect the investee's returns.

reliability

The quality of information that makes it free from material error and bias and represents faithfully that which it either purports to represent or could reasonably be expected to represent.

reporting date

The end of the latest period covered by the financial report or by an interim financial report.

reporting entity

An entity that is required, or chooses, to prepare general purpose financial reports.

reporting NPO

A reporting NPO is a single NPO, part of an NPO or a combination of NPOs that is required, or chooses, to prepare general purpose financial reports.

reporting period

The period covered by a financial report or by an interim financial report.

research

Original and planned investigation undertaken with the prospect of gaining new scientific or technical knowledge and understanding.

residual value (of an asset)

The estimated amount that an entity would currently obtain from disposal of an asset, after deducting the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

retrospective application (of a change in accounting policy)

Applying a new accounting policy to transactions, other events and conditions as if that policy had always been applied.

revenue

Income arising in the course of an NPO’s ordinary activities.

separate financial statements

Those presented by an entity in which the entity could elect, in accordance with paragraphs G9.25–G9.26, to account for its investments in controlled entities, jointly controlled entities and associates, either at cost less impairment, at fair value with changes in fair value recognised in profit or loss, or using the equity method following the procedures in paragraph 14.8.
service recipient

Individual, group of individuals or entity that is in receipt of services, goods or advocacy of an NPO.

service concession arrangement

An arrangement whereby a government or other public sector body contracts with a private operator to develop (or upgrade), operate and maintain the grantor’s infrastructure assets such as roads, bridges, tunnels, airports, energy distribution networks, prisons or hospitals.

service condition

A vesting condition that requires the counterparty to complete a specified period of service during which services are provided to the entity. If the counterparty, regardless of the reason, ceases to provide service during the vesting period, it has failed to satisfy the condition. A service condition does not require a performance target to be met.

service potential

The capacity to provide services that contribute to achieving the NPO’s objectives. Service potential enables an entity to achieve its objectives without necessarily generating net cash inflows.

severe hyperinflation

The currency of a hyperinflationary economy is subject to severe hyperinflation if it has both of the following characteristics:

(a) a reliable general price index is not available to all entities with transactions and balances in the currency; and
(b) exchangeability between the currency and a relatively stable foreign currency does not exist.

share-based payment arrangement

An agreement between the entity (or another group entity or any shareholder of any group entity) and another party (including an employee) that entitles the other party to receive:

(a) cash or other assets of the entity for amounts that are based on the price (or value) of equity instruments (including shares or share options) of the entity or another group entity; or
(b) equity instruments (including shares or share options) of the entity or another group entity;

provided the specified vesting conditions, if any, are met.

share-based payment transaction

A transaction in which the entity:

(a) receives goods or services from the supplier of those goods or services (including an employee) in a share-based payment arrangement; or
(b) incurs an obligation to settle the transaction with the supplier in a share-based payment arrangement when another group entity receives those goods or services.

small and medium-sized entities

Entities that:

(a) do not have public accountability; and
(b) publish general purpose financial statements for external users.

An entity has public accountability if:

(a) it files or is in the process of filing its financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market; or
(b) it holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses.

societal accountability

An expansive view of accountability that recognises a general accountability to society at large due to the importance of NPO goods and services, the funding environment, the preferential treatment that NPOs can receive compared to other organisations, and the need to ensure the effective operation of the wider sector.

stand-alone value (of a good or service)

The price of a good or service that is used internally or provided separately to a service recipient.

state (employee benefit) plan

Employee benefit plans established by legislation to cover all entities (or all entities in a particular category – for example, a specific industry) and operated by national or local government or by another body (for example, an autonomous agency created specifically for this purpose) which is not subject to control or influence by the reporting entity.

Statement of Cash Flows

A financial statement that provides information about the changes in cash and cash equivalents of an entity for a period, showing separately changes during the period from operating, investing and financing activities.
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Statement of Changes in Net Assets</strong></td>
<td>A financial statement that presents the surplus or deficit for a period, items of income and expense not recognised directly in Statement of Income and Expenses for the period, the effects of changes in accounting policy and corrections of errors recognised in the period, the amounts of changes in equity and movements between funds.</td>
</tr>
<tr>
<td><strong>Statement of Financial Position</strong></td>
<td>A financial statement that presents the relationship of an entity's assets, liabilities and interests of holders of equity claims as of a specific date (also called the balance sheet).</td>
</tr>
<tr>
<td><strong>Statement of Income and Expenses</strong></td>
<td>A financial statement that presents all items of income and expense recognised in the period, except for items of income and expense explicitly required to be recognised in the Statement of Changes in Net Assets and totals to the surplus or loss for a period.</td>
</tr>
<tr>
<td><strong>surplus or deficit from operating activities</strong></td>
<td>The difference between items of income and expenses in the reporting period that do not include those items to be shown separately on the Statement of Income and Expenses or in the Statement of Changes in Net Assets.</td>
</tr>
<tr>
<td><strong>subsidiary</strong></td>
<td>An entity that is controlled by another entity.</td>
</tr>
<tr>
<td><strong>tax base</strong></td>
<td>The tax base of an asset or liability is the amount attributed to that asset or liability for tax purposes.</td>
</tr>
<tr>
<td><strong>tax expense</strong></td>
<td>The aggregate amount included in total comprehensive income or equity for the reporting period in respect of current tax and deferred tax.</td>
</tr>
<tr>
<td><strong>taxable profit (tax loss)</strong></td>
<td>The profit (loss) for a reporting period upon which income taxes are payable or recoverable, determined in accordance with the rules established by the taxation authorities. Taxable profit equals taxable income less amounts deductible from taxable income.</td>
</tr>
<tr>
<td><strong>taxable temporary differences</strong></td>
<td>Temporary differences that will result in taxable amounts in determining taxable profit (tax loss) of future periods when the carrying amount of the asset or liability is recovered or settled.</td>
</tr>
<tr>
<td><strong>temporary differences</strong></td>
<td>Differences between the carrying amount of an asset or liability in the Statement of Financial Position and its tax base.</td>
</tr>
</tbody>
</table>
| **termination benefits** | Employee benefits payable at the earlier of the following dates:  
(a) when an entity can no longer withdraw the offer of those benefits; and  
(b) when the entity recognises costs for a restructuring that is within the scope of Section 21 and involves the payment of termination benefits. |
| **timeliness** | Having information available to decision-makers in time to be capable of influencing their decisions. |
| **timing differences** | Income or expenses that are recognised in surplus or deficit in one period but under tax laws or regulations are included in taxable income in a different period. |
| **total comprehensive income** | The change in equity during a period resulting from transactions and other events, other than those changes resulting from transactions with owners in their capacity as owners (equal to the sum of profit or loss and other comprehensive income), as defined by the IFRS for SMEs Accounting Standard. |
| **transaction consideration** | The amount of resources to which an NPO expects to be entitled. |
| **transaction costs** | The costs to sell an asset or transfer a liability in the principal (or most advantageous) market for the asset or liability that are directly attributable to the disposal of the asset or the transfer of the liability and meet both of the following criteria:  
(a) they result directly from and are essential to that transaction; and  
(b) they would not have been incurred by the entity had the decision to sell the asset or transfer the liability not been made. |
<p>| <strong>treasury shares</strong> | An entity's own equity instruments, held by the entity or other members of the consolidated group. |
| <strong>understandability</strong> | Classifying, characterising and presenting information clearly and concisely makes it understandable. |
| <strong>unit of account</strong> | The right or the group of rights, the obligation or the group of obligations, or the group of rights and obligations, to which recognition criteria and measurement concepts are applied. |</p>
